 5. Where a person knowingly makes a false claim and falsely verified the plaint, he can be convicted of one or the other, but not of both. And since verification was necessary to prefer false claim, prosecution should be under S. 209, 1901 A. W. N. 187.

3. Affidavit by accused. See False information—2.

An application was put in for transfer of a case on some facts which were denied by the other party by counter affidavit and the statement of the Magistrate. 4. Attempt.

It a witness makes a statement and later on in the course of same deposition contradicts

it and says it is untrue, he is guilty of attempt to commit perjury if the first statement can be proved to be false. 1927 N. 189=103 I. C. 101=28 Cr. L. J. 645.

5. Basis of prosecution.

1. As a written complaint is not verified, it cannot be basis for prosecution for perjury. But the examination of the complainant under S. 200 being taken on oath and read over to him can be basis for prosecution. 1926 N. 141=26 Cr. L. J. 1401.
2. Depositions not read over to witness cannot be basis for prosecution 1924 C. 705=51 C. 236=81 I. C. 803=25 Cr. L. J. 1027, 42 I. C. 783=18 Cr. L. J. 1039.
3. Opinion of handwriting expert, without being examined on oath and the opinion of the Court about the handwriting cannot be basis for the prosecution. 1 R. 290=1924 R. 17=76 I. C. 425=25 Cr. L. J. 185.
4. Where an approver makes a statement under a pardon not given during enquiry under Cr. P. Code, the statement cannot form basis of an alternative charge of offence under S. 193. 46 B. 61=1922 B. 138=64 I. C. 40=23 Bom. L. R. 884.
5. A statement recorded under S. 164, Cr. P. C., can be basis for prosecution. 45 B 834=1921 B 3=60 I. C. 593=22 Cr. L. J. 241, 16 S. L. R. 285.
6. Depositions to which the procedure laid down in S. 360, Cr. P. C., has not been applied cannot be used for prosecution under S. 193. S. 360 applies equally to accused as well as witnesses. 1921 P. 149=62 I. C. 584=12 Cr. L. J. 568.
7. A prosecution for perjury should not be ordered if the statements are discrepant owing to inaccuracies of mind and are not deliberately false. 19 Cr. L. J. 230.
8. A hearsay evidence should not be made the subject of prosecution. 7 A. L. J. 618.

6. Burden of Proof—

2. Prosecution must prove that it is not probably but necessarily false. 56 I. C. 660.

4. Prosecution must prove that the statement is false. Burden cannot be thrown on accused to establish good faith as to defence, 1934 P. 133=144 I. C. 1011=34 Cr. L. J. 917. 1933 P. 513=34 Cr. L. J. 912 and 36 A. 362 Rel. on.

7. Charge—

1. In a charge for perjury, the incriminating passages stated to be false must be specified in the charge. 2. In an alternative charge it is not proper to set out two long depositions which are in some respects contradictory, leaving the accused to find out for himself in respect of which particular contradiction, it is, that he is said to have committed an offence. 9 W. R. 25, 42 I. C. 783=18 Cr. L. J. 1039=1917 P. 299.

4. A charge is a precise formulation of the specific accusation made against a person, who is entitled to know its exact nature at the earliest stage. 28 C. 434.

 2. Omission of the names of the witnesses in the F. I. R. who ultimately support the prosecution is not such a matter which would throw suspicion upon the story for the prosecution. 1933 L. 1005, 1928 L. 507, 1928 L. 657=29 Cr. L. J. 378. *Contra*. 1934 O. 325, 4 P. R. 1918.

18. **Recording of.—Duty of Police officer—**
 1. The failure of the Sub-Inspector to follow the express provision of law in omitting an entry of the information in the station diary would have an important bearing if the real dates of the report is in question but where it is not, there is no prejudice to the accused. 131 I.  2. It does not depend on the sweet will of the Police Officer to record F. I. R. or not. 58 C. 1312=1931 C. 745=33 Cr. L. J. 138.

20. Suspicion in—

1. People have no right to launch criminal prosecution against others on mere suspicion. A man is justified in saying to the Police "I have my suspicions against B and you may direct enquiries against him." But if he gives information to the Police that B is guilty of the offence and a prosecution follows, in which there is no evidence to connect B with the crime, then the prosecution must be taken to be both false and frivolous. 1932 B. 177=137 I. 3. Telegram to Police Officer is not F. I. R. but it cannot be excluded from evidence. The statement recorded after the telegram is really the first information report. A telegram is not a writing given to the Police, signed by the person making the statement. A telegram stands in no better position than a village gossip. 1935 C. 403=156 I. C. 400=36 Cr. L. J. 919=39 C. W. N. 403, 1928 M. 791=110 I. C. 461=29 Cr. L. J. 717 and 1915 M. 312=25 I. C. 630=15 Cr. L. J. 633 Rel. on.

26. Witness named in—but not called.

1. The fact that certain persons named in the first information report as being witnesses of occurrence does not make it necessary for prosecution to call any one of them. Not does it give rise to presumption under S. 114(g) of Evidence Act. The mere statement of complainant that some one was witness of the occurrence is not conclusive. 58 C. 1335=1932 C. 118. See 1926 C. 728, 1922 L. 28.

1. Comparison of—

1. It is impossible to fix the impression of a bare feet for long in the memory, and the impression of a foot print formerly seen with that belonging to a suspect attested subsequently when the former is no longer under one's eye, is of no utility and can serve no purpose. *Criminal Investigation by Dr. Hans Gross, 3rd. 1914, P. 329.*
2. For the impression of a booted foot it always suffices for future use to have an exact description of the impression of the sole with the note of measurements and number, care being taken to indicate all dimensions, the number of nails (not only

Foot Prints—(contd.)

of those which exist but of those which are missing) in the front part of the sole and in the heel separately, the shape and condition of preservation of the latter, patches if there be any, and every other distinctive sign. If the question subsequently arises as to the connection between the sole of which the impression has been found and that of a suspected individual, all that is necessary is to measure and count the whole again. *Ibid.*

3. We must have the two impressions (mentioned above) on the table before us. We must measure and compare them several times before being able to pronounce any opinion about them. *Ibid.*
4. Comparison of foot prints after two months with prints which the tracker saw at the spot, when the original foot prints were not preserved, has no value. 1933 L. 299.
5. It is unsafe to rely completely on the evidence of tracker as to correspondence of tracks. 65 P. L. R. 1917=18 Cr. L. J. 897, 71 P. L. R. 1910.

2. In running.

1. One can conclude, from the length of the step, the force of the impression of the anterior edge of the sole, and from the depth of the ball of the toe, compared with the depth of the impression of the heel, that there has been running, and also whether that running has been rapid or slow. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 340.*
2. In rapid running the impression of the heel is deeper than that of the ball of the toe. Alighting on the ball of the toe is only the result of the slowness of the running, just as alighting on the heel is the result of the rapidity of the running. *Ibid.*

3. In walking.

1. Every person walks by first carrying a big forward and then leaning the centre of gravity of the body upon it, in order to be able to continue in the same manner with the other leg. It is not correct to say that the leg operates like pendulum, on the other hand a complicated mechanical movement brings it to the front. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 334.*
2. This mechanism of walking furnishes us with the following results in connection with foot prints or impressions :—
 - (a) Since at each step the centre of gravity first goes over to the leg upon which the weight is carried, the load must glide from the interior to the exterior edge of the foot. What is shown by very clean foot prints is a certain twisting which starts from the inside edge of the foot and goes towards the ball of the little toe and in consequence of the thrust to detach the foot from the ground passes suddenly under the big toe.
 - (b) The back part of the heel gives the strongest impulsion in walking and ought in consequence to appear much more strongly impressed than the rest of the heel. Hence nearly all men of normal stature use chiefly the exterior and back part of the underneath part of the heel. Brandt of Lundau found that 98 per cent. of soldiers walk in this way, while only 2 per cent. press more on the interior surface of the sole and the heel. This is important, for in a case where the last peculiarity is found, it would be an almost conclusive sign by reason of its rarity.
 - (c) In a foot print there are two deep spots : the posterior edge of the heel, by reason of the energetic thrust of this edge into the soil, and the ball of the big toe, by reason of the pressure which the body exercises upon it.
 - (d) Inside portion of the front part of the foot presents an impression of the whole surface of contact and therefore it appears larger in foot print than it really is. It glides a little outwardly and only at that point produces the deepest impression.
 - (e) The foot, at each pace, before leaving the soil, gives a thrust in order to supply the leg with the spring required to carry it forward. This is particularly necessary in quick walking or when the ground is slippery. The consequence of this thrust is that the anterior edge of the sole makes a deeper cut into the ground. On a firm ground two marks in the form of an arch will be found : the posterior edge of the heel and the anterior edge of the sole. These two marks will give the length of

Foot Prints—(contd.)

foot and one can make certain that foot print comes from a person who walks quickly or carries a burden. If the steps are long, they belong to a tall person.

- (f) Distinctive marks are produced in sand, dirt, and thick mud according to the manner of walking. The heel gives way a little at the spot where it was first thrust. There are two impressions of the heel and the balls of the toe, which give the real distance, but owing to slipping of the heel forwards and the ball of the toe backwards, the nearer each other than in reality: that is the foot print will be sensibly smaller than the foot which has produced it.
- (g) Tired, aged, infirm or awkward persons are too feeble or unskilful to bend the leg sufficiently at the knee and produce *dragging impressions* on the ground. The sand or snow, etc., must not be too deep, for in this case the raising up of the foot to a sufficient height fatigues even robust persons who would also leave dragging impressions behind them. *Ibid*, Pp. 334—337.
3. Deductions made are only relative and have only comparative value. It is impossible to give measurements or fixed sizes, for the numerous factors—the size, the height, and the other corporeal singularities of the individual walking, his burden, his gait, and the variable nature of the soil—differ in every case, and may be combined in so many diverse ways that it is absolutely impossible to give precise indications on this matter. *Ibid*, P. 337.
4. It is easy to recognise a stoppage, for the hind foot is drawn forward and forms a second impression beside the other. It may even be guessed approximately whether stoppage has been short or prolonged. *Ibid*, P. 347.
5. A person may have been forced to walk backward, in which case the steps are shorter, the directing line is hesitating and uncertain, as we do not know where we are going, the impressions present besides a quite distinctive digging of the toe, when the individual in question is forced to take relatively long pace. *Ibid*, P. 348.

4. Length of step.

1. Length of step is the distance of one foot print from the next, measured from the middle of the heel of the one to the middle of the heel of the other. This distance depends upon the height of the person, the rapidity of the walk and also upon habit. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 345.*
2. As a general rule it may be said that, of two equally agile men, the taller has the longer steps, and of two parallel trails, the foot print more frequently in the same distance belongs to the shorter person and that occurring less frequently to the taller person—presuming the two have walked together at the same speed. *Ibid*, P. 346.
3. Old people, invalids, people afflicted with hernia and other infirmities of the lower part of the stomach, take short steps although of tall stature. People who are in the habit of walking with precaution habitually take short steps. *Ibid*.
4. Long steps are met with among soldiers who have been for years in the army, surveyors, and especially railway employees. These latter are often obliged to walk upon the permanent way and they prefer to walk upon the sleepers the distance of which exceeds the length of ordinary pace. *Ibid*.
5. For a person walking at the same speed, the length of pace, as a rule, remains the same. If a short step is noticed it follows that the walker wishes to avoid a stone or paddle, etc., or perhaps he has looked back while walking. This may be important in determining whether the person in question has passed the spot only after a shower of rain. *Ibid*.
6. The length of pace varies from 50 to 100 cms. (20 to 40 in.), the average length may be taken: for the slow walk of people out for a stroll, 70 cms. (28 in.); for the average pace of business men 80 cms (36 in.). A pace of hundred cms. (40 in.) is only attained in running. A running pace of two metres (6½ feet) is rarely met with. *Ibid*.
7. The pace diminishes with age. A man of forty years old takes a pace about 30 inches and a man of the same height but thirty years of age takes paces of from 32 to 33 inches. *Ibid*, P. 347.

5. Measurements of—.

1. The accurate observer, trained to take exact measurement, will prefer the impressions of booted feet to the bare feet. He will carefully take all measurements of the sole, will count the nails, measure the pieces of leather nailed on to the sole, etc., and will give a perfect image of the impression. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 327.*
2. Measurements in the case of bare feet give very uncertain results, for the plant of the bare foot leaves always a rounded impression and never presents fixed borders like the sole of the shoe, and in consequence it does not produce a clean impression such as one is able to utilise from the point of view of measurements. *Ibid.*
3. In considering the measurement of a foot it must not be forgotten that the foot itself varies considerably, e. g., it is much smaller in cold weather or after a long rest than during hot weather or after a long march. *Ibid, P. 352.*
4. A foot in repose is shorter than a foot warmed by walking and swollen by the heat and the blood, the latter having a downward tendency; a dry sole is shorter than a damp one, be the humidity due to a wet road or, in fine weather, to perspiration from the foot. *Ibid, P. 358.*

6. Observation and preservation of—.

1. The fault which is generally committed by the investigating officer is that it is commonly in the immediate neighbourhood of the crime that foot prints are looked for, and not further away. It rarely happens that we find on the scene of the crime itself foot prints of any utility either through the criminal having taken the precaution to efface than or on account of their having been trodden upon and rendered invisible by the arrival of other persons. These reasons no longer exist when we make investigations at some little distance from the scene of action. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, Pp. 324-325.*
2. It is in the nature of things that a criminal does not return by the same road immediately after having accomplished the crime, but on the contrary he makes of in a round about direction. *Ibid, P. 325.*
3. No doubt we do not always have the opportunity of deducing so much from single print, but it will always be possible if circumstances are not too unfavourable, to obtain some positive information. But good results may be obtained if one follows a foot print. *Ibid, P. 322.*
4. Impressions of bare foot specially should be preserved, to serve later as an accurate means of comparison. The best method of obtaining these impressions is to produce them on papers. *Ibid, P. 323.*
5. Where a large number of articles have been carried away from the scene of crime and the thief has rested on the road, and laid down his burden; or has lost or even thrown away one of the stolen articles. These are certificates of identity of the foot print as certain as can possibly be. Another strong case is that of a single foot print, evidently produced by the criminal and found near the spot, resembling other foot prints which lead further away. *Ibid, P. 325.*
6. Comparison of foot print after two months with prints which the tracker saw at the spot, when the original foot prints were not preserved, has no value. 1933 L. 299.

7. Of Bare or Booted-feet—Shoes—.

1. In case of booted feet, an intelligent shoe maker can always give useful information. He can say whether the shape of the shoe is common in the neighbourhood, or whence it is likely to come, whether the boot has been repaired and what the repairs are, what class of persons is in the habit of wearing shoes of that kind, whether the wearer uses his shoes in a peculiar manner, wears out more on one toe than on another, and what peculiarities in the bodily build of the wearer experience teaches him are present. A shoe maker can even point out sore places, that there is a connecting link of cause and effect between the pain and the resistance, which determines the wearing away of a special portion of the sole. Thus if one has a sore place or corn on the ball of the big toe, one will naturally tread more heavily on the heel and outer side of the foot so as to relieve the pressure on the part that pains. *Criminal Investigation by Dr. Hans Gross, Ed. 1934. P. 326.*

Foot Print—(contd.)

2. The sole of a shoe furnishes, thanks to the nails, repairs, etc., so many signs of identity that it is much more easy to work with foot prints of booted feet than with those of bare feet. "The booted foot gives more clues, the bare foot has more physiognomy." *Ibid*, P. 327.
 3. The details of all the impressions of a bare foot are in each particular case so distinctive and so characteristic that it is always possible to differentiate them one from another, and recognise again the same impression. *Ibid*, P. 327.
 4. Identification of foot prints of accused with shoes is valueless, as there can be a large number of similar shoes. 24 Cr. L. J. 587=73 I. C. 331.
8. Of a person with burden.
1. People who carry heavy burdens walk with straight feet. The bearer of the burden is not in a condition easily to correct at will the oscillation produced by the displacement of the leg, for his legs are by reason of their load less mobile and less elastic. He

 2. When we find that a trial has suddenly altered as regards the angle of the foot, if there be no other possible explanation, we may presume that the person leaving the foot prints was hurried and has laid the burden down. *Ibid*.
 3. If the foot prints of the thief when he has arrived at the house turn outwards, and when he has gone away are straight, it is very probable that he has carried a heavy burden. *Ibid*, P. 345.
 4. If a person's foot prints turn inwards and then outwards, it is because he has laid down his burden or handed it over to some one else, etc., *Ibid*.
9. Reproduction of—.
1. Foot prints which seem important should be covered with a large box and guarded by a trustworthy man. The most radical method is to carry away the original impression by placing round the foot print an iron coffin embedded deeply in the ground. The soil is then dug all round the coffin and the mound is removed. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 359.*
 2. Best results are obtained by using plaster. Pending taking up of the cast, the foot print should be photographed vertically from above. *Ibid*, P. 362.
 3. For foot prints in dust or sand, no oil or grease should be used. *Ibid*, P. 364.
 4. For foot prints in snow, plaster or joiner's glue; for foot prints in sand, dust, flour, etc., plaster or stearine and for other foot prints, plaster or wax, or in case of need, cement, fat or suet, clay, paste or bread crumb should be employed. *Ibid*, P. 365.
10. Value of—.
1. Foot prints are often of decisive importance, but we must know how to observe, preserve and utilise the impressions in order to be able to get any good out of it. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 320.*
 2. As a rule foot prints are but seldom found where they are wanted. When they exist, they are rarely entire and complete, and for that reason are considered of no value. *Ibid*.
 3. As regards really clean foot prints, it seldom happens that they are preserved so as to remain in tact, or to inspire certainty that they have some connection with the case. People who have come upon the scene of a crime after it has taken place also leave traces of their feet, fouling the important print, so that one can no longer tell which is significant foot print and which the useless one. *Ibid*.
 4. When well-preserved traces do exist, the essential thing is to be able to interpret them and to know how to make good use of them. On this science is dumb and has hardly even approached the question. *Ibid*.
 5. A foot print is an impression like other impressions and it is not always well defined and when it is defined one cannot take it away with one; even if one could, it would be impossible to search the whole town and make experiments with every citizen to see if he is the author of the crime. These considerations detract from the value of foot prints. *Ibid*.

 9. If the distances between each of the impressions of the right foot and each of the impressions of the left foot are different, and if the lines joining the right heels and those joining the left heels form an irregular zig zag, it is because the central organ of the apparatus of locomotion is defective and the foot print belongs to one who suffers from brain or spine disease; he is paralytic, inebriate, giddy, or badly wounded person. *Ibid.*

The false proportion is often discovered. Some irregularities will appear. The line of march becomes unsteady, the step seems hesitating and uncertain, and when the shoes are too big, dragging and heavy, and this is clearly seen from the impression. *Ibid, P. 349.*

FULUS IN UNO, FALSUS IN OMNIBUS. (False in particular false in all). See Evidence—11.

1. It is a dangerous maxim, especially in India, for if a whole body of testimony were to be rejected because the witness was evidently speaking untruth in *one* or more particulars, it is to be feared that witnesses might be dispensed with. There is always a fringe or embroidery to a story, however true in the main when main part of the deposition is true, it should not be arbitrarily rejected because of a want of veracity on perhaps some very minor point. *Field's Law of Evidence in B. India, 8th Ed., Pp. xl, xli.*
2. But the case will be different if one of the *essential* circumstances in the story be clearly unfounded. Thus to use a felicitous expression of Mr. Hallams "*is to pull a stone out of an arch* the whole fabric must fall to the ground" *Ibid.* See also *Constitutional History of England, Vol. II, P. 637.*

GANG OF DACOITS—S. 400, Penal Code.

1. Belonging to—

1. The word "belong" implies something more than a casual association. It involves the idea of continuity rather than permanency and also of long connection to warrant the inference, that the accused had identified himself with the gang. 1928 C. 309=110 I. C. 449=29 Cr. L. J. 705=47 C. L. J. 471, 63 I. C. 455=1921 A. 32 7 I. C. 1012, 19 A. L. J. 725.
2. Merely belonging to a dacoit gang or associating with them is not within the section which punishes only an association for *habitually* committing dacoity. Relations, dependants and servants of the dacoits are thus excluded. 1 C. W. N. 146, 9 P. R. 1880 Cr., 18 P. L. R. 1910, 1886 A. W. N. 65, 255 P. L. R. 1912.
3. The term "belong" indicates a more or less intimate connection with a body of men with the common purpose of habitually committing dacoity. 1930 O. 455.
4. Mere membership of a robber tribe is not sufficient. 37 P. R. 1869 Cr.

2. Essentials and Evidence.

1. The mere fact that the women lived as wives or mistresses with dacoits is not sufficient to convict them, unless they are associated with them for the purpose of habitually committing dacoities. 9 A. L. J. 565=10 I. C. 23.
2. The section excludes persons who merely assist or shelter dacoits. 1 B. L. R. 156.
3. Persons associating with the dacoits for friendship sake or joining them in drinks or meeting them at fairs, weddings or other social functions are not guilty. 110 P. L. R. 1916=35 I. C. 1003.
4. Evidence showing the actual participation by accused in any given dacoity is evidence both of his association with the gang and his object in such association. 128 I. C. 739=1930 Cr. C. 1079=1930 O. 455, 11 Cr. L. J. 551=7 I. C. 1006
5. Evidence of commission of an offence or that the accused were bound down under S. 110, Cr. P. C., is admissible. 52 C. 595=1925 C. 872=26 Cr. L. J. 1037, 38 C. 408, 36 P. W. R. 1912, 47 C. 154 and 27 C. 139 Dist.
6. Evidence of previous dacoities committed by the gang is admissible 1 C. W. N. 146 (149), 14 C. 710, 38 C. 408, 27 C. 139.
7. For convicting a person belonging to a gang, the Court need not look for the complicity of each accused in every one of the dacoities proved to have been committed. If one or more of the accused had taken part in the dacoities, the presumption is strong that a gang had committed all these dacoities. 89 I. C. 836=1925 O. 374=26 Cr. L. J. 1412=27 O. C. 385.
8. Evidence that members of the gang committed several burglaries is relevant to the charge. 1925 O. 144=26 Cr. L. J. 123, 38 C. 408 *Cont.* 32 M. 179.
9. Evidence of bad character or having been bound is admissible not as evidence of character but to prove habit and association. 1930 O. 455, 52 C. 595=1925 C. 872=87 I. C. 925=26 Cr. L. J. 1037.
10. It is not necessary that the gang should be of habitual dacoits but there should be a gang which is associated for habitual dacoity. 1888 B. U. C. 418.
11. Accused cannot be convicted merely because he belongs to tribe or caste of professional dacoits or he belongs to a criminal tribe or committed other offences than dacoity. 32 M. 179, 16 C. W. N. 69=13 I. C. 279.

Further Inquiry—(contd.)

12. That the accused was suspected of being implicated in a dacoity or was believed to be a dacoit, is inadmissible in evidence. 27 C. 139, 37 P. R. 1869 Cr.
13. A number of dacoities committed on the same day would not condemn an offender into a habitual dacoit, just as receiving stolen goods of the proceeds of different robberies from a dozen thieves does not make the receiver a habitual one. 19 C. 190.
14. Previous conviction and orders are merely corroborative evidence and are not basis of conviction. 32 M. 179.
15. Only those persons can be convicted under S. 400 who have either taken part in the crime or been employed for the purpose of scouting or in other way facilitating the commission of crime. 1 O. W. N. 660.
16. Association for the habitual pursuit of dacoity is the gist of the offence under S. 400. 16 C. W. N. 69.
17. A conviction can be had even if no dacoity is proved. 1923 C. 309=29 Cr. L. J. 705.
18. Evidence under S. 400 that accused habitually commits theft is inadmissible. 45 B. 958=1923 B. 71=25 B. L. R. 214=24 Cr. L. J. 867=75 I. C. 67.
19. Evidence of previous conviction is inadmissible under S. 400 to prove habit and association. 1930 O. 455=128 I. C. 739=7 O. W. N. 862.
3. Jurisdiction. S. 181, Cr. P. C.
A resident of Native State was arrested in that State and was charged in British India for belonging to a gang of dacoits who had committed dacoities within the jurisdiction of that Court. It was held that Magistrate had jurisdiction over him. 1 P. R. 1911 Cr.

4. Procedure.

1. Where a sentence is already passed for the offence of committing dacoity, there is no bar to the passing of a sentence under S. 400. 1925 O. 374=26 Cr. L. J. 1512.
2. A conviction under S. 400 cannot be considered bad in law merely because the evidence on the record would also have justified a conviction of a specific offence under S. 395. 1930 O. 455=1930 Cr. C. 1079.
3. S. 400 is highly penal one and the offence is one of a very special character and entirely the creature of statute and it must therefore be strictly construed. 23 W. R. 18, 16 C. W. N. 69.

5. Sentence.

In the case of a gang consisting of desperate men prepared to proceed to all lengths in carrying out their crimes, the heaviest possible sentences should be passed. 68 P. L. R. 1911.

GANG OF THIEVES (BELONGING TO—). S. 401, Penal Code.

1. Belonging to— See Gang of dacoit—1.

1. The word "belong" used in S. 401 is a very comprehensive term. A person who receives stolen property from a gang of thieves is not within the section. 1927 L. 524=99 I. C. 851=28 P. L. R. 19=28 Cr. L. J. 179.
2. For other cases see Gang of dacoit—belonging to.

2. Essentials and Evidence.

1. Evidence of previous conviction of theft is admissible to prove habit. 14 Bom. L. R. 373=15 I. C. 811, 191 P. L. R. 1915.
2. Evidence that accused was bound down under S. 110, Cr. P. C., on the ground that he was by habit a robber, thief or house breaker is relevant for proving this offence. 38 C. 408, 27 C. 139, 3 P. R. 1915, 13 P. R. 1914, 36 P. W. R. 1912, 1930 S. 211.
3. Evidence of any number of offences extending over any period is relevant. S. 234, Cr. P. C., does not apply to such cases. 55 I. C. 994, 21 Cr. L. J. 386=47 C. 154=31 C. L. J. 192.
4. If a large number of thefts are committed in a locality during the presence of a gang there is evidence of habitual association. 1923 L. 327=24 Cr. L. J. 703.

Gang of Thieves (belonging to)—(contd.)

5. S. 401 should not be resorted to when the accused might have been responsible for distinct and individual offences. The Police should not be encouraged to sweep into a wide net large number of persons whom they suspect or who give them trouble. 1886 A. W. N. 16, 37 P. R. 1869, 9 P. R. 1880, 36 P. W. R. 1912, 3 P. R. 1915 Cr., 110 P. L. R. 1916.
6. It is not necessary that every person guilty of this offence should have actually taken part in any theft, since it is association only that is punishable. 1929 O. 321=118 I. C. 423, 13 P. R. 1914 Cr.
7. Mere joining a gang of thieves is insufficient. To make a person liable there must be proof of the community of purpose and intention. 110 P. L. R. 1916.
8. Where the gang is a fluctuating body and draws recruits from every locality, the men who come and go are not guilty under S. 401, as they are not habitual associates of dacoits. 16 A. W. N. 1886.
9. Evidence though not believed for the purpose of conviction under S. 379 or S. 392 may yet be relied upon for the purpose of conviction under S. 401. 1929 O. 321=118 I. C. 423=30 Cr. L. J. 922, 1928 O. 430=29 Cr. L. J. 1009.
10. If once it is proved that gang was formed for the purpose of habitually committing theft, all persons who join afterwards in committing one or more thefts come within S. 401. 1923 L. 666=77 I. C. 984=25 Cr. L. J. 520.
11. Reports made to the Police from time to time showing the names of particular suspects are inadmissible as being hearsay. 1930 S. 211=31 Cr. L. J. 1046.
12. The evidence that Panchayat made enquiry into theft and called a person before it as suspect or that a person accepted money to search the stolen property does not prove any ingredient of S. 401. 1926 L. 439=94 I. C. 264=27 Cr. L. J. 600.
13. Stolen property was traced through accused's information. He is not guilty under S. 401 as the existence of gang is not proved. 1925 L. 604=26 Cr. L. J. 1024.
14. Evidence of repute as to accused person being of bad character or a thief is not admissible. 13 P. R. 1914 Cr.
15. Habit can be proved by an aggregate of acts. 9 P. R. 1880 Cr.
16. Indian British subjects associated with foreign subjects in foreign territory for purposes of habitual theft or robbery are liable. 33 P. R. 1886 Cr.
17. The *agoo* (habitual receiver of stolen property) is a member of gang. 13 P. R. 1914 Cr.
18. Mere membership of robber tribe is not sufficient for conviction. 37 P. R. 1869 Cr.
19. Where accused arrested together had committed thefts, etc., but there was no proof of habitually committing theft, S. 401 does not apply. 9 P. R. 1880 Cr., 13 P. R. 1914 Cr.
20. Proof of concert with persons associated for purposes of habitually committing theft or robbery is necessary. 37 P. R. 1869 Cr.
21. Certain persons were found together away from their houses and were in the habit of visiting *melas* (fairs) together and one of them was arrested in the act of picketing pocket and when arrested many of them gave false names. Held, the offence under S. 401 was not proved. 27 C. 139.
22. Evidence of commission of several thefts, of meeting together at different places, before and after the commission of thefts and burglaries and evidence of systematic thefts of cattle by individual accused are sufficient to support conviction under S. 401. 47 C. 154=55 I. C. 994=21 Cr. L. J. 385=31 C. L. J. 192.
23. The possession of stolen property by gang and the fact that the country through which the gang passed was free from petty crimes when they were not about, are admissible facts. 7 O. C. 163=1 Cr. L. J. 690.
24. T and it is perhaps
 well advised to
 1932 L. 298=

25. Mere fact that accused received stolen property from the gang is not sufficient to convict them under S. 401. 1932 L. 486=138 I. C. 424=33 Cr. L. J. 584. 1927 L. 524 Rel. on. 13 P. R. 1914 Cr. and 1930 R. 114 Dist.

3. Former judgment.

A former judgment in which accused was convicted of dacoity is admissible for the purpose of proving that the accused is a person of criminal tendencies to commit theft, who may be a member of the gang. The judgment does not show that he had any habit of committing theft in the period under consideration. 1925 B. 195=89 I. C. 527, 38 C. 408, 14 Bom. L. R. 373=13 Cr. L. J. 539=15 I. C. 811.

4. Procedure.

1. A conviction under S. 401 is not bad in law merely because the evidence on record would also have justified a conviction under S. 379 or S. 392. 1929 O. 321=118 I. C. 423=30 Cr. L. J. 922=6 O. W.N. 441.
2. The fact that a person is bound down under S. 110, Cr. P. C., does not preclude his being tried under S. 401, Penal Code. 55 I. C. 994=21 Cr. L. J. 386=47 C. 154.
3. Police should proceed with substantive cases and leave gang cases alone. 1932 L. 298.

5. Sentence.

1. While assessing sentence under S. 401, the Magistrate should take into consideration previous conviction and orders under S. 110, Cr. P. C., even when S. 75, Penal Code, does not apply. 1930 S. 211=126 I. C. 468=31 Cr. L. J. 1046, 39 B. 36.
2. Separate sentences for being member of a gang associated for the purpose of committing burglaries and for actually taking part in burglaries though legal, are not strictly equitable, for it is double punishment. 1932 L. 298=33 Cr. L. J. 251.

GIFT TO RECOVER STOLEN PROPERTY, S. 215, Penal Code.

1. Attempt.

1. Mere proposal to the owner of the lost property to recover it on the receipt of a certain amount on the condition that thieves should not be prosecuted is sufficient under S. 215. 45 A. 159=1923 A. 83=76 I. C. 191=25 Cr. L. J. 127.
2. If there was a demand of a larger sum for the return of stolen property and the owner offered a smaller sum which was refused, it is not an attempt under this section. 20 A. 389, *Contra* 2 L. B. R. 310=1 Cr. L. J. 1116, See 45 A. 159.
3. A proposal for payment of an illegal gratification is an attempt under S. 215, whether it fructifies into an agreement or not. 1 Cr. L. J. 1116=2 L. B. R. 310.

2. Defence.

It is a defence to a charge under S. 215 for the accused to say that he was the actual owner of the property and that he offered the money to bring the offenders to justice. 1923 S. 163=1 Cr. L. J. 481=46 A. 915.

3. Essentials and Evidence.

1. S. 215 does not apply to actual thief. 8 L. 253, 1925 L. 563=88 I. C. 353, 23 A. 81, 50 A. 155=1923 A. 22=29 Cr. L. J. 21.
2. Where a thief took money to recover stolen property but took no steps to bring the thieves to justice he is guilty under S. 215. 25 A. 915=1924 A. 783=85 I. C. 225=25 Cr. L. J. 481.

Gift to recover stolen Property—(concl'd.)

3. Where accused was offered money to trace out horses of the owner which were lost and which work he undertook and failed. He is not guilty. 50 A. 186=1928 A. 22=106 I. C. 437=29 Cr. L. J. 21=25 A. L. J. 866.
4. Where no offence is proved, acceptance of reward is not penalized. Accused was found in possession of complainant's cow and took 12 rupees for its return which he subsequently refused. He is not guilty as it was not proved that he was deprived of cow by means of an offence. 9 P. R. 1915 Cr.=29 I. C. 669, 6 I. C. 250.
5. Where buffaloes of one S were stolen, which the accused agreed to find if he was paid money and promised to say nothing about the payment and took no steps to trace the thieves. He is guilty of attempt. 45 A. 159 (160)=1923 A. 83.
6. Complainant stated in the first information report that his bullocks had gone astray but before trial Magistrate stated that they were stolen. He paid accused money in order to secure the restoration of bullocks. Held, that it was not proved that an offence punishable under the Penal Code had been committed in respect of missing bullocks. 1931 L. 157=32 P. L. R. 38=131 I. C. 369, 9 P. L. R. 1915 Cr., 6 I. C. 250.
7. To convict accused it is not sufficient that he undertook to trace out and restore the lost property on payment of some remuneration. It must be further proved that property was lost by commission of an offence and he is endeavouring to screen the offender. 131 I. C. 800=1931 A. 710, 1932 P. 241=11 P. 392.
8. Taking money in order to help to find stolen property and convict thief is no offence. The important point is that offender should know the criminal and screen him from justice. 1935 S. 105.
9. The primary aim of the section is to punish all trafficking in crime by which a person, knowing that property has been obtained by crime, and knowing the criminal makes profit out of the crime while screening the offender from justice. 50 A. 186=1928 A. 22=29 Cr. L. J. 21=106 I. C. 437.
10. Screening or attempting to screen offender is not ingredient of offence. 1933 C. 599.
11. Taking money to return donkey which had gone stray, is not an offence under S. 215, 1936 S. 145.

Procedure.

1. S. 215 does not apply to a thief and therefore a double conviction under S. 215 and S. 379 or S. 411 is illegal. 28 I. C. 997=16 Cr. L. J. 421, 24 I. C. 351, 9 I. C. 421=12 Cr. L. J. 72, 23 A. 81.
2. Where an accused person has taken a ransom for the restoration of stolen property and fails to return it, he can be convicted under S. 420, Penal Code, and conviction need not be confined to S. 215. 1923 R. 37=21 Cr. L. J. 529.

IFT TO SCREEN OFFENDER FROM PUNISHMENT. Ss. 213-214, f. P. C.**Compounding of an offence unlawfully.**

1. Ss. 213-214, I. P. C., punish the unlawful compounding of an offence. If there was no offence, accused is not guilty although he may have intended to screen one whom he suspected to be an offender. 23 C. 420, 37 B. 658.
2. The intention of the legislature is to suppress mal-practice when offences have really been committed, or when persons really guilty are screened and not to ensure general veracity on the part of the public in regard to imaginary offences. 14 M. 400, 23 C. 420. See 23 Bom. L. R. 823.
3. An Advocate writing a threatening letter to a Magistrate to return bribe paid to him by his client and promising to hush up the matter if money is returned, the Advocate is guilty and he cannot plead instructions of client as defence. 132 I. C. 553=1931 R. 83=32 Cr. L. J. 934.

Essentials and Evidence

1. The concealment or suppression must be an offence. If a person is acquitted of an offence the foundation of offence under S. 213 or 214 fails. 37 B. 658, 46 I. C. 424.
2. S agreed to give 10 rupees to a witness, in consideration of his not giving evidence against K who was charged with house breaking. He refused the offer and gave

evidence but K was acquitted. Held, S cannot be convicted under S. 214 as K was acquitted. 14 M. 400, 23 C. 420.

3. Where two of the accused had offered a gratification to a public servant, for his screening them and not proceeding against them, whose books he had seized. Held, that S. 214 applied and not Ss. 164—169, Penal Code. 13 P. R. 1881 Cr.
4. Accused in breach of forest rules, worked two sawpits instead of one and when detected by the forester offered him five rupees for not proceeding further with the case. Held, he is not guilty, as the amount was offered for compounding the offence, though to a person who had no authority to compound it. 15 I. C. 990.
5. Actual concealment or screening even for a short time is sufficient. The fact that the very same person subsequently did prosecute even to conviction would not purge the offence. 52 C. 151=1925 C. 85=25 Cr. L. J. 345.
6. Where a person is acquitted of the principal offence, no conviction under Ss. 213-214 lies. 23 C. 420, 37 B. 658, 46 I. C. 424.
7. S. 213 has no application where only an acceptance of or attempt to obtain or agreement to accept, any gratification or restitution on a promise to conceal, screen or abstain is proved and no more. 52 C. 151=1925 C. 85=26 Cr. L. J. 345.
8. G entrusted certain jewellery to M, who pledged the same with S under circumstances which constituted such pledging an offence of criminal breach of trust. The jewellery was returned on the undertaking not to prosecute him for criminal breach of trust. M was accused under S. 406 but was acquitted. S and G were charged under S. 213. Held, they were not guilty as no criminal breach of trust was proved. 37 B. 658=15 Bom. L. R. 694=14 Cr. L. J. 463=20 I. C. 613.

GOOD BEHAVIOUR. See Security for good behaviour.

GOOD CHARACTER. Ss. 53-54, Evidence Act. See Bad Character.

1. Evidence of—

1. The mere fact that a person has enjoyed the confidence of his superiors or that he had in fact led a life of honesty during the past, is no reason to suppose that he will not succumb to temptation at the close of his career, but before a man of this type and such antecedents is adjudged guilty, the evidence against him must be of unimpeachable character. 1978 L. 647=110 I. C. 676=29 Cr. L. J. 740.
2. No importance can be attached to the evidence of good character when the case against the accused is clear. 8 B. 223 (227), 16 C. 310.
3. Unless evidence of good character is led, the bad character of the accused cannot be proved. 42 C. 957, 7 P. R. 1895 Cr., 15 P. R. 1888 Cr., 11 P. R. 1908 Cr.
4. Where accused leads evidence of good character by way of defence, the Code does not entitle the prosecution to lead rebutting evidence as a matter of right. But Magistrate may, in his discretion, allow such evidence to be given. 1930 M. 448=31 Cr. L. J. 1198.

2. The question of good faith must be considered with reference to the position of the accused and circumstances under which he acted. 12 B. 377.
3. Where accused chained up his brother who was subject to fits of violent insanity in a town where medical aid was available, he did not act with due care and caution. (1923) 21 A. L. J. 391.

6. A Police Officer, seeing a horse, resembling one which his father had lost a short time previously, tied up in B's premises jumped to the conclusion that it was a stolen horse, while in fact it was not, arrested him without any due inquiry or credible information. Held, that he acted without exercising due care and caution. (1868) 10 W. R. 20 Cr.
7. If a Police Officer makes a search without complying with the preliminary requirements of S. 165, Cr. P. C., it is not made in good faith. 10 P. 821=1932 P. 95.
8. Due care and caution imply a genuine effort to reach the truth, and not the ready acceptance of an ill-natured belief. 17 Bom. L. R. 82, 27 I. C. 657, 41 C. 1023, 1934 O. 124.
9. Accused seeing a child stooping down and believing him to be a demon, dealt a blow. Held, he was guilty under S. 304-A. 11 P. R. 1888.

1. The question whether an emergency exists or not is one of fact which the Court may inquire into. But the Governor-General may be in possession of facts which he may not be willing, or be compelled, to disclose. All that the Court can do is to enquire whether there is evidence from which the Governor-General may reasonably conclude that an emergency exists. 55 B. 263=1931 B. 57=32 Cr. L. J. 403.
2. The power given to the Governor-General by S. 72 is an absolute power and cannot be reviewed by Courts. 12 L. 280=1931 P. C. 111=32 Cr. L. J. 727.

Each Judge of the Supreme Court of Nigeria has jurisdiction to entertain an application for a writ of Habeas Corpus in term, time or in vacation, and he is bound to hear and determine such an application on merits, notwithstanding that some other Judge of the same Court has already refused a similar application. 1923 P. C. 300=113 I. C. 273=26 A. L. J. 1169=30 Cr. L. J. 113.

6. Legality of detention.

1. A was arrested and remanded to Police custody on suspicion of being connected with offence under S. 302 read with S. 120-B. 3. The sentences passed under Martial Law are legal. 55 B. 763=1931 B. 57.

7. Minors and their custody.

1. The High Court before passing an order in respect of a minor child, ought to take into consideration the interest and welfare of the child. 12 Bom. L. R. 891=11 Cr. L. J. 687, 48 M. 299.
2. The Court will not ordinarily force a child to remain in custody to which the child objects. 33 M. 288, 48 M. 299.

5. Powers of Habeas Corpus may be exercised for restoration of child to its natural guardian. 1926 R. 76=95 I. C. 65=27 Cr. L. J. 737.
6. Minor applicant's nephew went to visit his sister. There was no suggestion as to the sister or her husband not being proper persons. Held, there was no improper detention and the order under S. 491 should not be passed. 1927 R. 329=104 I. C. 705=28 Cr. L. J. 865=6 Bur. L. J. 111.
7. Father, a motor driver, applied for a writ of Habeas Corpus for custody of his son aged 7. There was no body in the house to look after such a child. The Court must look to the child's interest and should not interfere. The proper course is under Guardian and Wards Act, S. 25. 1929 M. 33=126 I. C. 111=31 Cr. L. J. 985.
8. If mother in charge of a minor child, is likely to be converted to Christianity no writ would be issued, but proceeding can be had under Guardian and Wards Act. 1928 M. 1087=112 I. C. 472=29 Cr. L. J. 1048.

Hanging—(contd.)

4. Causes of death in—.

1. Simple blocking of the air-passages (asphyxia pure and simple). *Taylor's Med. Jur.*, 1928, Vol. I, P. 684.
2. Congestion of venous blood in the brain (pressure on jugular veins). *Ibid.*, P. 684.
3. Lack of arterial blood to the brain (pressure on carotids). *Ibid.*, P. 684.
4. Syncope from the pressure on the vagus nerves. *Ibid.*, P. 684.
5. Injury to the spinal column and the cord. *Ibid.*, P. 684.
6. Combinations of any of the above. *Ibid.* P. 684. See *Lyon's Med. Jur.*, 1935, P. 291.

5. Was body hung before or after death.

1. Among the external appearances, it is chiefly to the mark produced by the cord on the neck that medical jurists have looked for the determination of the question. *Taylor's Med. Jur.*, 1928, Vol. I, P. 692-693.
2. The circumstance that an ecchymosed mark may be produced by suspending a recently dead body bears out the statement of Merzdorff—that it would be in the highest degree difficult, if not utterly impossible to determine medically from an inspection whether a man had been hanged while living, or whether he had been first suffocated and his body suspended immediately after death. *Ibid.*, P. 693.
3. Sometimes, besides ecchymoses, there are abrasions of the skin in the course of the cord, and these are known to have been produced during life by the effusion of blood which accompanies them. *Ibid.*, P. 693.
4. The depression made by the ligature may be hard and brown, although it does not usually acquire this colour until some hours have elapsed after death. *Ibid.*, P. 693.
5. There is no certain and constant sign by which the hanging of a living person can be determined from an inspection of the dead body. *Ibid.*, P. 694.
6. All the external marks may be simulated in a dead body, and the internal appearances do not always furnish characteristic evidence. *Ibid.*, P. 694.
7. A ligature mark on the neck does not necessarily indicate suspension of the body; but when due to suspension of the body, it is usually high upon the neck, oblique and non-continuous, or if situated lower on the neck it is continuous. *Lyon's Med. Jur.*, 1935, P. 299.

6. Was it accident, suicide or homicide

A. Marks of ligature and injuries :—

1. Suicides more frequently take the material that is most accessible—braces, handkerchiefs, etc., or there may be evidence to show where the material came from and how it reached its destination. *Taylor's Med. Jur.*, 1928, Vol. I, P. 698.
2. In hanging, the mark of the cord is generally oblique, being higher at the back part of the neck, in consequence of the loop formed by it yielding more in this direction than in front. But it is an error to suppose that this want of obliquity in the impression can afford any evidence in favour of the act having been homicidal. *Ibid.* P. 698.

hanging—(concl'd.)

8. In cases of death from hanging, the presumption is always in favour of suicide, even if the body is found partly suspended. *Lyon's Med. Jur.* 1935, P. 300.
9. A person who is weak, insensible or even asleep may be murdered by a single individual by hanging. *Ibid.* P. 301.

B. Circumstantial evidence—

1. We should observe whether the doors and windows of the apartments are secured on the inside or on the outside ; whether the dress of the deceased is at all torn or discomposed, or the hair dishevelled ; whether the attitude of the body is such as to show interference after death ; whether there are marks of blood about the body, on the ligature, or in the room ; whether the hands are bloody, or present marks of wounding or struggling ; whether the rope or ligature corresponds to the impression seen around the neck ; and lastly, whether the cord is of sufficient strength to support the weight of the deceased. *Taylor's Med Jur.* 1928, Vol. I, P. 705.
2. The strongest evidence of homicide is often found in the attitude and the state of the dress of the dead body. *Ibid.* P. 705.
3. When there are indications of violent struggling, the dress may be found disordered, unless it has been smoothed or arranged by the murderer after the death of the deceased. *Ibid.* P. 706.
4. In this connection sight must not be lost of the peculiar tricks of lunatics, who will occasionally throw a room into great disorder before committing suicide, and, moreover as they may have made an attempt (previous to hanging) by cutting, blood may be scattered about the room. *Ibid.* P. 706.
5. The presence of marks of self inflicted mechanical violence tends to strengthen the presumption of suicidal hanging. *Lyon's Med. Jur.* 1935, P. 302.
6. Two cord marks on the neck, one having the characters of a strangulation, and the other those of a hanging mark, may be found in a case of hanging, if the cord has been passed twice round the neck. *Ibid.* P. 302.

HARBOURING AN OFFENDER. Ss. 216, 216-A., 216-B. and S. 212, Penal Code.

1. Essentials and Evidence.

1. To warrant conviction under S. 216 it must be shown that the warrant to arrest was a legal one and the harbouring was with the intention of preventing him from being apprehended. 52 B. 151=1928 B. 184=29 Cr. L. J. 317.

4. Assisting evasion of apprehension is harbouring. It is immaterial whether the evasion lasts six hours or six years. 1923 L. 223=24 Cr. L. J. 659, 72 I. C. 949, 23 I. C. 701.
5. A person charged for harbouring offender did not know that he was proclaimed offender till Police Officer informed him. J. 377=31 Cr. L. J. 772=125 I. C. 178, 1926 L. 206=7 L. 30.
6. The knowledge of the harbourer cannot be presumed from a mere publication of the name of the offender in the Criminal Intelligence Gazette, nor it can be inferred from the offender adopting false name and harbourer misdescribing him as his relation. 23 I. C. 201=15 Cr. L. J. 349.

2. Harbour, meaning of— S. 216—216-B. I. P. C.

1. The word harbour should be construed liberally. A person harbouring another in a house is guilty although the house belongs to a different person. 16 I. C. 509=13 Cr. L. J. 701=14 Bom. L. R. 583.
2. "Assisting a person in any way" is not limited to methods *Ejusden Gensur* with supplying other necessary things. 40 I. C. 731=21 C. W. N. 1062=18 Cr. L. J. 731. See 25 A. 264.

 6. Mere giving of meal to proclaimed offenders is not an offence under S. 216. 1925 L. 289=84 I. C. 1050=26 Cr. L. J. 410. See 1935 R. 294, 25 A. 261.

 8. 'Harbour' includes the supplying a person with shelter, food, drink, money, clothes, arms, ammunitions or means of conveyance or assisting a person in any way to evade apprehension. Mere knowledge of the whereabouts of an offender does not amount to harbouring him. 1935 C. 550=157 I. C. 1030, 1935 R. 294=158 I. C. 500, 73 I. C. 691, 21 C. W. N. 1062.

 10. Where the accused men actually tried to mislead the Police by telling lies as to the whereabouts of an offender. They were found by Court, not to have harboured him. 25 A. 261.
 11. The word "harbour" must be liberally construed, so that an occasional visitor to an escaped convict might be convicted of this offence. 14 Bom. L. R. 583=16 I. C. 509
- 3. Harbouring dacoit or Robber.** S. 216-A., I. P. C.
1. Harbouring dacoits in general does not fall under S. 216-A. The section renders it penal to harbour persons who intend to commit a particular dacoity. 1925 S. 295=87 I. C. 916=26 Cr. L. J. 1028=19 S. L. R. 111.

2. A trial was held on Sunday and was finished the same day. Although it is not illegal, yet highly irregular and the conviction should be set aside even if the accused did not ask for adjournment. 31 I. C. 352=17 Bom. L. R. 918=16 Cr. L. J. 752, 1930 N. 255-124 I. C. 619=31 Cr. L. J. 705.

HEARING COUNSEL See Arguments—2.

HEARSAY EVIDENCE. See Dying Declaration.

1. In India, it is most dangerous to accept vague statements of hearsay information. Often it so happens that what a man hears, he believes that he saw it himself. 192 O. 187=74 I. C. 535=24 Cr. L. J. 791.

But it must be the expression of independent opinion based on hearsay and not mere repetition of hearsay. 23 A. 37 (51).

4. Hearsay evidence amounting to evidence of general repute is admissible in proceedings under Chapter VIII of Cr. P. C. (security cases). 6 Bom. L. R. 34, 6 B. 34, 2 P. W. R. 1909 Cr

7. If a witness is called by the prosecution and then cross-examined as hostile, his evidence should not on that account be left out of account. It should go along with other evidence to the jury to decide the truth. 36 C. W. N. 356=1932 C. 523, 1930 P. 247=124 I. C. 836=31 Cr. L. J. 721=9 P. 474.
8. The fact that the statement of the witness differed from the statement recorded by the Sub-Inspector shortly after the occurrence, is not a sufficient reason to cross-examine him as hostile. 1923 C. 463=24 Cr. L. J. 193, 1930 C. 276.
9. If the defence is compelled to call a prosecution witness as defence witness, the defence has the right to cross-examine him 28 C. 594.
10. The mere fact that at a Session trial a witness tells a different story from that told by him before the Magistrate does not necessarily make him hostile. The proper inference in such a case is that he is neither hostile to this side nor that, but that the witness is such that he should not be believed unless supported by other evidence. 13 C. 53, 2 C. 642 (644), 61 C. 399=1934 C. 636.
11. Before contradicting a witness by a previous statement, it must be shown to have been made voluntarily. 1934 C. 636=61 C. 399.

15. The definition that a hostile witness is one who is not desirous of telling the truth is dead and buried. 1933 P. 517, 58 C. 1404.
16. If prosecution apprehends that a witness will not adhere to the statement already made, it cannot directly ask him if he made any statement. It can be asked in cross-examination only when he is declared hostile. 1 P. 758=1923 P. 62, 20 A. 155.
17. That the testimony of a witness is adverse to party calling him is sufficient to obtain leave to cross examine him. Value of his testimony should be judged from cross-examination. 1933 P. 517=146 I. C. 993, but see 1934 A. 226, 6 C. W. N. 513 Rel. on.
18. Either side can rely upon the evidence of hostile witness, but the evidence must be considered as a whole. 1933 P. 517=146 I. C. 993.
19. The fact that witness's answer is in direct conflict with evidence of other prosecution witnesses is no reason for declaring him hostile. 1936 M. 516.

HYPOTHETICAL FACTS.

Court should not base its judgment on hypothetical state of facts which were not put forward by the prosecution and were never suggested to accused to meet them. 11 Cr. L. J. 245, 27 Cr. L. J. 1346=98 I. C. 466.

HYPNOTISM

1. Human personality divides itself into two spheres, viz., "the waking state" (the superior consciousness) and the "dream state" (the inferior consciousness). The latter state exists whenever we dream or when in a fit of sleep walking or distraction, we act without knowing what we are doing. It is in the sphere of this inferior consciousness that all the acts of a person under the influence of hypnotism are placed, and by arranging these phenomena in a category of known facts we attempt to form a clear idea of that state. *Criminal Investigation*, by Dr. Hans Gross, Ed. 1934, P. 120.
2. Hypnotism has most resemblance to sleep. But we may distinguish sleep from hypnotism by designating the latter by the phrase "state of suggestibility." To "suggest" is to produce a dynamic change in the nervous system of a person under the influence of another person. *Ibid.*
3. In the hypnotic state three stages may be distinguished.

Hypnotism—(concl'd.)

- (a) *Somnolence*,—state in which the subject can still open the eyes.
- (b) *Light sleep*,—(hypotaxia-dream)—state in which he partly submits to the influence of suggestion.
- (c) *Deep sleep*,—somnambulism with amnesia (forgetfulness) after waking. *Ibid.* p. 121.

4. The effect of hypnotism has been established scientifically.

- (a) It may affect the property or moral character of the person hypnotised.
- (b) Every kind of extortion may be committed with its assistance.
- (c) It may suggest crimes to be committed
- (d) It may suggest illness, etc.
- (e) The courage necessary for the performance of crime may be suggested with its help.
- (f) Persons who have committed no crime may be unjustly accused by a person under its influence
- (g) On the other hand a person who has knowingly committed a crime may plead suggestion by another.
- (h) Traces of wounds and strangulations may be produced by suggestion and subsequently serve as proofs.
- (i) Abortion may be brought about by suggestion.
- (j) All kinds of illness—especially of the nerves, and convulsions may be the consequence of illicit or awkward hypnotising.
- (k) Involuntary suggestion may be practised by the investigating officer himself or other persons to be questioned.

We may say that the danger of hypnotism are not so very great and are better known than formerly. *Criminal Investigation by Dr. Hans Gross, 1934, Ed., Pp. 121-125*

IDDAT. See Maintenance—14, Bigamy—14.

Maintenance is allowed to a divorced Muhammadan wife during the period of *iddat*. 5 P. R. 1905 Cr., 10 Cr. L. J. 502.

IDENTIFICATION

1. Application for—.

1. An application for varying the order in which the accused should stand is reasonable, if some particulars are furnished that by disturbing the order, the witness would not be able to identify the accused. 9 Mys L J. 335.
2. If accused contests identity parade must be held. 1934 C. 169.

2. As basis for conviction

1. Identification of the accused by the principal witnesses supported by the identification by other witnesses is insufficient, if knowing the identity and names of the accused, *did not mention* it to the Police. 1929 P. 517=122 I. C. 541=31 Cr. L. J. 421.
2. Identification test is not quite sufficient to form the basis of conviction, though it may perhaps add some weight to other evidence against the accused. 1929 S. 149=115 I. C. 328=30 Cr. L. J. 456. 1924 O. 295=81 I. C. 949.
3. Delay is seriously prejudicial to the course of justice where identification is a material issue. 1928 P. 39=104 I. C. 705=28 Cr. L. J. 855=9 P. L. T. 217.
4. A mistake due to confusion of ideas is quite possible identification. 1924 O. 295=81 I. C. 949=28 Cr. L. J. 1125.
5. If the case entirely depends on identification conviction should not be had on evidence of difficult or unsatisfactory nature. 27 P. R. 1858 Cr.

3. By aged and old persons.

Memory of aged persons in respect of recent events is notoriously fallible. "An old man who combines a venerable appearance with a failing memory is the witness most to be feared by either side." *Moore on Facts*, Vol. II, 1908, P. 1372. *Art of Cross-Examination* by P. R. Aiyar 1920, P. 543.

4. By Beard.

1. The identification made of a man who is said to have been wearing a beard at the time, and whose beard is concealed or absent at the time of identification, is by no means convincing, and when it stands alone, must be regarded as an unstable piece of evidence. Magistrate must hold two identification parades in such cases. 86 I. C. 817 (820)=1925 A. 405.
2. Beards differ like noses or the mouths which they cover and the accused should be put up with others of similar appearance, in the identification parade. 86 I. C. 817 (819-820)=1925 A. 405.

5. By clothes.

It is not safe to rely upon the article of clothing when the body cannot be identified on account of advanced decomposition. 15 P.W. R. 1915 Cr. See 1923 L. 40=25 Cr. L. J. 783=81 I. C. 271.

6. By co-accused.

Identification by co-accused while on trial is not admissible. 45 A. 300=1923 A. 352.

7. By dying person.

It is, in general, an injudicious proceedings to take a suspected person before one who is dying, in order that he may be identified; inasmuch as at that time the victim may be semi-delirious—a state of mind which is not easily recognised by non-professional persons—and confessions or statements then made should, when they implicate other persons and are not strongly corroborated by circumstances, be regarded with great suspicion. A fatal mistake in London was made by a woman who identified a wrong person, who was executed. *Taylor's Med. Jur., Ed. 1928, P. 50.*

8. By flash of fire arm.

1. On a dark night and away from every source of light, the person who fired the gun might be identified within a moderate distance. If the flash were very strong and smoke very dense, and the distance great the person firing the piece could not be identified. *Taylor's Med. Jur., Ed. 1928, P. 543.*
2. There is comparatively little flash with nitro-powder, and consequently little chance of identification of a person by the light produced by the discharge. *Ibid.*
3. Hill made a series of experiments and the conclusion he drew was "that all stories of recognition from the flash of gun or pistol must be founded upon fallacy." *Will's Circumstantial Evidence, 6th Ed., P. 183.*
4. In *Rex v. Brookes*, 31 *State Trials* 1121, 1135, 1137 experiments were made from which it appeared that recognition by flash of firearm was impossible. *Ibid.*
5. The flash caused by the discharge of pistol or gun provided the circumstances are favourable affords sufficient light for recognition and identification. The favouring circumstances are close proximity to the discharge on one side of the line of fire, absence of other lights and not much smoke from the powder. *Lyon's Med. Jur., Ed. 1904, P. 55.*
6. Identification by the light of firearm or other flashes is impossible. 4 P. L. R. 1915. *Will's Circumstantial Evidence, Pp. 43—182.*

9. By flash of lightning.

A flash of lightning undoubtedly affords sufficient light to discern the features, etc., of another, as to be able to identify him. *Lyon's Med. Jur., Ed. 1935, P. 105. Centra-
stantial Evidence, Pp. 43—182, 183.*

... distinction

Identification—(contd.)

10. By finger prints.

1. Identification by means of finger-prints has long since established its claim to trustworthiness, and is a most important branch of criminal investigation both for the detection of crime and the identification of the criminal. *Lyon's Med. Jur.*, 1935, P. 95.
2. Prints left on weapons or other objects at the site of the crime have been found to correspond exactly with those obtained from the fingers of a suspected person, and have then formed convincing proof of guilt. *Ibid*, Pp. 95-96.
3. Justices Blair and Burkitt of the Allahabad High Court in *Man Singh*, accused, as the thumb impression exactly with the thumb impression photographed also *Pioneer*, June 7, 1901.

11. By gait.

We are constantly in the habit of recognizing friends and acquaintances by the character of their gait, but it is less reliable than the voice as the sole evidence of identity. *Taylor's Med. Jur.*, Ed. 1928, P. 116.

12. By Hair.

1. The value of the hair in identification is tolerably obvious under ordinary circumstances. The colour, character and length of the hair should be considered. *Taylor's Med. Jur.*, 1928, Pp. 151-152.
2. Tidy is of opinion that both hair and nail may grow for a time after death. But it is accepted as a fact that growth of hair after death does not take place. The skin shrinks after death, and hence a man who had been shaved just previous to death might in twenty-four hours appear not to have been shaved. *Ibid*, P. 153.
3. The hair of animals is distinguishable from those of human beings. They are, generally speaking, coarser, thicker and less transparent than those of human being. The hair of some animals may be at once distinguished by the eye or by the pocket lens, as that of the cow, the horse, the deer; but the hairs of some dogs, such as skye, terrier and spaniel, being long and silky, closely resemble that of man. *Ibid*, P. 156.
4. To find out from what part of body the hair comes, comparison with hairs of known situation is absolutely essential. The hair of the eye brow and eye lash is stouter than that of the head, and of the pubes and axillae is stouter than rest of the body. It is necessary to find out by means of microscope whether they have been indented, cut or bruised at either or both ends. A spermatozoon or other body might possibly be found adhering to a hair. All these matters may help in deciding where a hair came from: the seat of blow might for instance, be known and a hair on a blunt weapon when compared with another from the same seat of injury may show similarity or not. *Ibid*, P. 157.
4. There are many characters of hair which may serve as corroborative points in identity either of a person or of a given individual hair, but they are mainly those denoting the race from which the person came. The curly short crisp hair of a negro, is differentiated from the hair of any European race; the straight lank hair of most aborigines is much coarser than hair of similar straightness occurring in more civilised races. *Ibid*, P. 152.
5. Colour in its natural state offers but little means of positive identification beyond the fact that the hair on the dead body is of the same colour as that of the missing person. The colour may be artificially altered by means of dyes, or the presence of the colour may be concealed by applying lamp black to obtain a black colour and flour, chalk, etc., mixed with some greasy substance to obtain a white colour. But these are easily detected by washing it in water. In the case of dyes it will be seen that bases of hair will show a short length of natural colour, the hair on pubes are not dyed, the skin of the scalp or face may show the application of such a dye as walnut juice. *Ibid*, Pp. 151-152.
6. The colour of the hair may be darkened by the use of metallic dyes, chiefly lead or silver compounds; or rendered lighter by chlorine or hydrogen dioxide solution.

Identification—(contd.)

7. For the detection of lead or silver compound, the hair may be digested in dilute nitric acid, the acid liquid evaporated to dryness, and the usual chemical test applied to a solution of the residue; or the hair may be incinerated and the metal sought for in the ash. *Ibid*, footnote.
 8. Examination of hair is necessary when we may establish thereby the identity of a corpse or the age, constitution, etc. of a dead person, which information owing to advanced decomposition would not otherwise be obtainable. *Criminal Investigation by Dr. Hans Gross, Ed. 1931, P. 131.*
 9. The hair mixed with substances in putrefaction, changes colour to no considerable extent; at the most it will become a little lighter or a little darker. *Ibid*, P. 136.
 10. Almost every man has on his head a few of the other essentially different hairs, for instance, blonde persons have almost always a few dark thick hairs. A lady had a rich wavy soft hair, but on one place, on account of a scar caused by a wound received early in life, the hair is straight, rough to the feel, and noticeably lighter in shade. No one would believe that a hair from the scarred place and one from another portion of the head belonged to the same person. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 137.*
 11. When proof of the "identity" of hairs is to be considered, the matters with which they are artificially coloured must not be forgotten; the colouring matter may be got rid of in various ways, e.g., washing in water, dilute hydrochloric acid, nitric acid, or chlorine water. *Ibid*.
- 13. By Photograph.**
1. In comparing photographs for the purpose of identification following cases may occur:—(a) *Comparison of one portrait with another.*—If the portraits are of different sizes, they must be enlarged to make them of the same size. Then measurements must be taken with compass, (b) *Comparison of a portrait with an accused.*—The precaution of clothing and dressing the hair of the accused as he is with photograph must be taken. (c) *Comparison of portrait with a person at liberty.*—All the features of the photograph must be carried in the memory. (d) *Comparison of a portrait with our recollection.*—Supposing the witness has seen the accused only once, when he cheated, robbed and wounded him, the witness's opinion will be of little value. His recognition will inspire more confidence if when he is able to pick out the person from a number of similar photographs, and does not recognize him simply because he had a moustache and there is in the collection only one photograph of a person with a moustache. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 181*
 2. Enormous difficulty is always experienced in recognizing persons from photographs, especially when the person recognizing is a simple-minded fellow who has rarely seen photographs and has never before tried to find resemblances. *Ibid*.
- 14. By Scar. See Wound—35.**
1. If the witnesses as to identification were only able to pick out the appellant after their attention has been drawn to the scar marks on their faces, their evidence is worthless. 1925 L. 19 (21)=5 L. 396=27 Cr. L. J. 170=93 I. C. 884.
 2. Scars or cicatrices have frequently proved their value as means of identification. *Lyon's Med. Jur., 1935, P. 101.*
 3. As to the age, formation and disappearance of scar, see Wound—35.
- 15. By Tatoo Marks.**
1. Tatooing which exist or which have existed on the bodies of living or dead person may be very important in determining identity. *"Criminal Investigation" by Dr. Hans Gross, Ed. 1934, P. 111. Lyon's Med. Jur., 1935, P. 101.*
 2. Tattoos can be made to disappear artificially by submitting them to the corrosive action of an acid, especially indigo extract (indigotin Disulphoric acid). The application of a paste containing salicylic acid and glycerine for about a week will make the tatoo disappear. A strong solution of tannin and of silver nitrate will have the same result. *Ibid*.
 3. When a scar is thus artificially removed, a scar is always left behind. *Ibid*.

Identification—(contd.)

4. About the age of tatoo mark in general not much can be said. A fresh tatoo with little pigment and an old tatoo with much pigment look nearly alike. *Ibid*, P. 112.

16. By Teeth.

Identity of a person can be established with the help of experienced dentists when any traces caused by teeth are discovered, e.g., wounds caused by biting, forgotten or discarded smoking materials (cigar ends, pipes, cigar or cigarette-holders, etc.), marks on pens or pencil, etc. "*Criminal Investigation*" by Dr. Hans Gross, Ed. 1934, P. 126.

17. By Voice.

1. To recognize a person by the voice alone would be a risky proceeding in a Criminal charge, though it is often enough accepted upon less important occasions. *Taylor's Med. Jnr.*, 1928, P. 116.
2. Stammering, stuttering and lispng are the most obvious peculiarities, and may under certain circumstances, as when people are held quarrelling or in excited conversation, become of importance in identification. *Ibid*.
3. False teeth may alter a voice. *Ibid*.
4. It is very difficult to identify a person in a pitch dark night merely by the modulation of his voice and it is risky to convict a person merely on such identification. 1928 L. 92:29 Cr. L. J. 758=110 I. C. 790.
5. Testimony of a witness that he recognized the voice of a person with whom he conversed over a telephone is sufficient evidence of identity. *Lord Electric Co. v. Morrill* 178 Mass 304; 59 N. E. Rep. 807. quoted in *Art of Cross-examination* by P. R. Ayar, Ed. 1920, P. 524.
6. Some persons have such peculiar voices, they can be identified by acquaintances who hear them talk, without seeing them. It is possible for persons to identify a dog by merely hearing it bark, without seeing it. *Wilbur v. Hubbard* 35 Barb (N. Y.) 304 quoted in *ibid*.
7. The impression taken once or twice of a person's voice, gait or carriage is of little value for the purpose of identifying him. The voice may not have been in its proper, usual or natural tone due to anger, cold, etc. *Ram on Facts*, P. 63 quoted in *ibid*.
8. Animals and things may be identified by those familiar with them, by the noises they make. *Art of Cross-examination* by P. R. Ayar, Ed. 1920, P. 546.
9. A waggon maker can be a reliable witness to the identification of a buggy which passed in the night by a peculiar "rattle" of the wheels. *Ibid*, *Moore on Facts*, Vol. II, 1908. P. 1373.

18. Change in dress or appearance.

The combination of arrangement of human features and lineaments are ordinarily so unique in each person and the peculiarities of individual expression, tone of voice, gesture and carriage, so marked and striking that a friend or acquaintance has a little chance of mistaking personal identity. But material changes in dress or personal appearance may seriously weaken a supposed identification. *Cunningham v. Burdell*, 4 Brad. (N. Y.) 343, 473, 474. See *Art of Cross-examination* by P. R. Ayar, 1920, P. 522.

19. Colour blindness.

1. Colour blindness is of importance in cases of colour signals on Railways, ships or in mines, or when there is a question of the colour of a garment. "*Criminal Investigation*" by Dr. Hans Gross, Ed. 1934, P. 126.
2. A colour-blind man can see blood only on a green background (as for instance on the grass or on green or yellow clothes) and that with difficulty. *Criminal Investigation* by Dr. Hans Gross, Ed. 1934, P. 126.

20. Circumstances aiding or retarding.

1. *Peculiarities of features.*—Stature, feature, some defect, deformity, blemish or other thing natural or accidental sometimes attract particular notice which make

Identification—(contd.)

such an impression upon a person that will enable him long after to remember it. It is by the face that persons are chiefly known; and no two faces are perfectly alike. We have a perfect impression and remembrance of the countenance of a friend—though not of features—although we may not be able to describe it. *Ram on Facts*, P. 5 and wearing or loss of moustaches, wigs, accidents to face, long absence in foreign countries and frequency of observation should also be considered. *Art of Cross-examination* by P. R. Aiyar, Ed. 1920, P. 533—537.

2. Want of correct observation due to (a) want of sufficient time to observe; (b) want of sufficient light, (c) want of sufficient opportunity; (d) great distance; (e) observer's defective eyesight; (f) or his intoxication; (g) or terror; (h) dress, which is sometimes more noticed than the person wearing it. *Ibid*, Pp. 538-539.

21. Dark night.

1. Identification in dark night of accused not previously known has no value. 93 I. C. 892=27 Cr. L. J. 492, 1930 O. 60=31 Cr. L. J. 689=124 I. C. 444.
2. When complainant followed the accused on a dark night, their identification is doubtful. 1923 L. 161=5 L. L. J. 82.
3. Identification made at night during dacoity when blows are struck and people are terrorized, is generally of little value. 104 I. C. 714=1927 C. 820=28 Cr. L. J. 874=1933 L. 299, 27 Cr. L. J. 492.
4. If the night was dark, it is difficult to believe that witness can identify accused after two or three months. 1925 L. 426=26 Cr. L. J. 693, 1935 L. 146.

22. Delay in—

- ✓ 1. Delay in identification is seriously prejudicial to the course of justice if it is material issue. 28 Cr. L. J. 865=1925 P. 59=104 I. C. 705.
2. In dacoity cases no Court will convict the accused unless identified in Jail soon after his arrest. 1924 A. 645=85 I. C. 245=26 Cr. L. J. 501.
3. When there was delay in identification after the arrest of accused but there was no opportunity for witnesses to see the accused, the evidence should not be discarded. 1932 L. 488=34 Cr. L. J. 379. See 1932 S. 55=33 Cr. L. J. 641 and 1924 A. 645.
- ✓ 4. Identification parade must be held at the earliest opportunity and all available witnesses must attend at the first parade. 1934 L. 641.

23. Description of accused before—

If the witness gave no description of accused previous to the identification of accused his evidence is unreliable. 1925 L. 426=86 I. C. 69=26 Cr. L. J. 693.

24. Distance at which a person can be recognized.**A. In day light.**

Presuming the eye sight to be normal and the light good, one is able in broad day light to recognize :—

- (a) Persons whom one knows very well, at a distance of from 50 to 90 yards; when there are particular and characteristic signs, 110 yards; in exceptional cases up to 165 yards.
- (b) Persons one does not know very well and has not often seen from 28 to 33 yards. *Criminal Investigation* by Dr. Hans Gross, 1934, P. 185.

B. In moon light.—

1. By moonlight one can recognize, when the moon is at the quarter, persons at a distance of from 21 feet, in bright moonlight at from 23 to 33 feet; and at the very brightest period of the full moon, at a distance of from 33 to 36 feet. In tropical countries the distances for moonlight, may be increased. *Criminal Investigation* by Dr. Hans Gross, Ed. 1934, P. 185.
2. These are only approximate indications; in practice they are of but slight value. Firstly the statement concerning good normal eye-sight and good light is vague and there are other supplement circumstances to influence it. *Ibid*.

Identification—(contd.)

3. The gaseous air of the town compared with the limpid atmosphere of the mountain diminishes the range of vision by at least 10 per cent; the position of the sun, the back ground, the wind, and the temperature, also combine to affect it to perhaps the same extent (10 per cent). *Ibid.*

C. One possession of witness as to personal identity:—

One faculty of combination, which unconsciously comes into play, may corroborate our preception so that we may be completely led into error. If a person at a distance of say 220 yards sees a man first come out and then go into the house of A and knows that A lives alone in the house, he will suppose, if the man resembles A in his exterior aspect that the man is indeed A and will maintain the fact, as if he had seen him distinctly. In such cases verification must always be made at the spot. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 185.*

25. Distinguishing marks—

Merely because some persons identified had distinguishing marks is not sufficient to conclude that the parade was held improperly. But where grave suspicion has been thrown on the prosecution, the identification may be open to grave suspicion. 1935 A. 592=157 I. C. 545.

25.A. Evidence of—

1. Witness picked out accused in the identification parade held by Magistrate but stated at the trial that they were shown to him before. Held, that though the value of such identification is little, the fact that he had said, he had identified them is admissible. 1928 L. 545=103 I. C. 265=29 Cr. L. J. 366.
2. If the witness fails to recognize the accused in Court, the evidence of identification in Jail is weakened, although he stated there that accused had taken part in dacoity. The latter statement is admissible in evidence, 1927 O. 369=106 I. C. 721=29 Cr. L. J. 129, 7 L. 91, 1925 A. 223, 1930 O. 455. See 1927 O. 598, 1921 A. 215.
3. Identification in Jail is no substantive evidence. It is to be used as corroboration of identification made at the trial. 1925 O. 726=83 I. C. 852=26 Cr. L. J. 1236.
4. Note of identification must contain full particulars and must be proved by the Magistrate. 1925 P. 158=81 I. C. 45=25 Cr. L. J. 557.
5. Identification by co-accused is not admissible and secondary evidence of identification by him is clearly inadmissible. 45 A. 300=24 Cr. L. J. 526.
6. Statement made by witness at an identification parade might be used to corroborate his evidence in Court. 5 L. 396=1925 L. 19=27 Cr. L. J. 170.
7. Evidence of officer conducting identification parade is only admissible, if the identifying witness is called to support his identification on oath. 45 A. 300=1923 A. 352.
- ✓ 8. Identification in Court is valueless unless accused was identified by the same witness in the Jail identification parade. 1925 L. 137=82 I. C. 230=25 Cr. L. J. 1272.
9. If the witness gave no description previous to identification, his evidence is unreliable. 1925 L. 426=86 I. C. 69=26 P. L. R. 40=26 Cr. L. J. 693.
10. Witness not seeing the accused for six years, his failure to identify is no ground for discrediting his evidence. 1926 L. 392=95 I. C. 593=27 Cr. L. J. 817=27 P. L. R. 743.
11. Power to identify varies according to the power of observation. An illiterate villager is frequently more observant than an educated man. 1928 O. 430=112 I. C. 337=29 Cr. L. J. 1009, 1930 O. 455.
12. Mere picking out in the identification parade is not enough. The witness must give particulars in Court as to how he identified him and the details of the part which accused took in the crime. 5 L. 396=1925 L. 19=90 I. C. 954=27 Cr. L. J. 170.
13. If there is a possibility of the witness having seen the features of the accused before the parade, the evidence of identification is worthless. 21 P. W. R. 1917 Cr.=41 I. C. 820.
14. Ability to identify in reply to a question by Court is useless. 1923 L. 662=5 L. L. J. 477, 1923 L. 161=5 L. L. J. 82.

Identification—(contd.)

15. Identification by the flash of fire arm is impossible. 5 P. L. R. 1915, 27 P. R. 1868.
 16. Failure of some witnesses to identify the accused does not render identification by other witness valueless. 1931 L. 178=131 I. C. 277=32 Cr. L. J. 684.
 17. Evidence of identification should be carefully scrutinized. Previous acquaintance with accused, time and opportunities for observation must be noted. 1929 A. 928=121 I. C. 103=31 Cr. L. J. 206.
 18. In case of gravest doubt as to whether the two prisoners were in fact identified, the benefit of doubt must be given to both. 5 L. L. J. 317.
 19. If the Committing Magistrate himself conducts the identification parade and then gives evidence before himself by going into the witness box the trial is not vitiated. 29 Cr. L. J. 129=1927 O. 369=106 I. C. 721, 27 A. 33.
 20. No reliance can be placed on a witness who identified the accused but according to the story of the prosecution, is not a reliable witness. 1932 S. 55.
 21. Evidence of identity should be considered with caution. 137 I. C. 79=1932 O. 99=9 O. W. N. 32=33 Cr. L. J. 381.
 22. It is sufficient if accused is identified by witnesses. It is not necessary that official witnesses and the record should be produced, especially where the identification of accused was never in issue. 1930 M. W. N. 1138.
 23. A witness who knows the accused previously and who had ample opportunity of observing him at the dacoity and who immediately named him to the villagers and the Police is credible. 8 I. C. 317=11 Cr. L. J. 623.
 24. Each case is to be judged on its own merits. 1932 L. 488.
 25. The number of wrong identifying and consistency of identifications made at different times must be considered. 1932 O. 287=141 I. C. 511=9 O. W. N. 766.
 26. Prosecution witnesses identified accused in diffused light from electric torches. Jury was allowed to experiment it in the absence of accused. Held, that the procedure was irregular. 1934 C. 744.
 27. Evidence of test identification is admissible under Ss. 155 and 157, Evidence Act, and otherwise also. 1935 C. 311=39 C. W. N. 488, 1921 A. 215=95 I. C. 477=27 Cr. L. J. 813 Diss from.
 28. Identification parade was held after five years and witnesses stated that six persons took part but identified two persons, only three persons were mentioned in the F. I. R. Held, that accused were entitled to benefit of doubt. 1935 L. 146=1935 Cr. C. 237.
 29. In case of identification of ornaments of small value the opinion of the Assessors is of great weight, as they are well acquainted with the ways of ordinary men. 1925 O. 452=89 I. C. 155.
 30. Evidence identification must not be too readily accepted. 1932 O. 317, 39 I. C. 295.
- 26. How to be carried.**
1. The accused was in the custody of Jail officials and not Police officers, and was mixed with persons of same class or position, dressed in the same manner who were allowed to change their clothes from time to time and alter their appearances by shaving or cutting their hair. The accused was not allowed to communicate with each other after arrest. The result in the notes prepared by him was that the identification proceedings were absolutely honest and careful. 1917 O. 369=106 I. C. 721=29 Cr. L. J. 129.
 2. Identification parades do require most careful scrutiny. 1924 M. 232=76 I. C. 289=25 Cr. L. J. 145=1923 M. W. N. 695=45 M. L. J. 406.
 3. Identification must be made immediately after the arrest. In dacoity cases, no Court would convict the accused, who was not identified in the Jail soon after his arrest. 1921 A. 645=85 I. C. 245=26 Cr. L. J. 501=22 A. L. J. 501.
 4. Court should vary the order in which the accused should stand at the time of identification, if asked to do so by the accused. 9 Mys. L. J. 385.

Identification—(contd.)

5. Presence of Police Constable in the room where identification is held is objectionable. 1914 L. 692.

27. In reply to question in Court.

Ability to identify in reply to question in Court is useless. 1923 L. 662, 1923 L. 161.

28. In Moon lit night. Sec—24-B.

1. Chances of error in identification become greatly increased when the identification is based upon a momentary glimpse in the confusion and excitement of the moment at a moon lit night. 1932 O. 99=9 O. W. N. 32=137 I. C. 79=33 Cr. L. J. 381.
2. A man can be recognized in moon lit night. 1936 R. 60.

29. Means for—

The means available for identification are:—1. Mental Power. 2. Memory. 3. Education. 4. Speech. 5. Gait. 6. Handwriting. 7. Complexion. 8. Likeness of features. 9. Occupation marks. 10. Clothes, jewellery and articles in pockets. 11. Race. 12. Deformities, birth marks, peculiarities of nails, etc. 13. Injuries leaving permanent results. 14. Anthropometry. 15. Dactylography (the finger print system of identification). 16. Stature, weight. 17. Teeth. 18. Scars and Tatoo marks. 19. Sex. 20. Hair. 21. Age. *Taylor's Med. Jur.*, 1928, P. 115.

30. Mistakes in—

1. "A person may be mistaken, and sometimes is, as to the identity of his best known friend," said Judge Tuck of New Brunswick in *Palmer v. Baird* 29. N. Bruns 42-45. See *Art of Cross-examination* by P. R. Ayar, 1920, P. 525.
2. "Most people cannot easily remember faces" says Professor Colegrove. *Moore on Facts*, Vol. II, 1903, P. 1367. See *Art of Cross-examination* by P. R. Ayar, 1920, P. 525.
3. A large proportion of mankind, never see faces accurately at all. See *Ibid*.
4. So many mistaken identifications are made that "the jury must receive and consider evidence of personal identity which is inconsistent with other evidence in the case, with scrupulous care and caution." See *Ibid*.
5. As to illustrations of mistaken identity see *ibid* and *Will's Circumstantial Evidence*, Pp. 182—184.
6. Value of identification depends on two factors (1) Identifying persons must not have been seen accused after crime; (2) no mistakes must be made by identifying witnesses or they must be negligible. 1936 A. 373.

31. Objections by accused to—

When the accused protests that the identifying witness knows him before, much value should not be attached to identification. 1925 O. 226=35 Cr. L.J. 889, 148 I.C. 1192.

32. Object of—Parade.

1. Although the body is decomposed, it can be identified by means of clothes, age, height, etc. 81 I. C. 271=1923 L. 40=25 Cr. L. J. 783. See 15 P. W. R. 1915 Cr.
2. Where the head is cut off and the rest is swollen, identification by looking at the photograph is not reliable. 9 Mays. L. J. 142.

35. Of stolen property. See Receiving stolen property—8.

36. Of thing. See Identification of things.

37. Parade. Sec—26.

1. The Magistrate should make a list of outsiders mixed with the accused for the purpose of identification with their names and addresses. (b) The Magistrate should note in what connection the witness identifies him. (c) If a wrong person

Identification—(contd.)

is identified it should be noted. (d) It is the duty of the Magistrate to record any complaint or objection made by accused, at the time of identification parade, and if the complaint is absolutely futile, he may note it as such. 1935 L. 230=150 I. C. 1056=35 Cr. L. J. 1180.

2. Identification parade must be held at the earliest opportunity and all available witnesses should be required to attend at the very first parade. 1934 L. 641=1934 Cr. C. 973.
3. The question whether a witness has or has not identified a man during investigation is not one which is in itself relevant at the trial. The actual evidence is that given by witnesses in Court. Its value is not strengthened by the recognition of witness at the parade, although, on the other hand, its value will be destroyed if it is shown that they have failed to identify accused prior to trial. 1936 Pesh. 166.

38. Parade held by Police.

1. Statements made by witnesses to Police during the investigation are not admissible to corroborate the evidence given at the trial. 6 L. 171=1925 L. 399=27 Cr. L. J. 438, 1926 P. 232=27 Cr. L. J. 484.
2. Where identification proceedings held by the Police are not supervised by the Magistrate, the proceedings under S. 162, Cr. P. C., will be inadmissible under S. 157, Ev. Act, to corroborate their testimony given in Court. 1935 C. 311=158 I. C. 843. *Contra* 1929 N. 36=29 Cr. L. J. 963, unless the parade is held in the town of Calcutta or Bombay. 54 B. 52, 53 C. 650, 1932 B. 196.
3. Evidence of Police Officer regarding the identification of accused by the prosecution witnesses in the parade is admissible, being a simple exposition of fact or circumstance witnessed by him, and S. 162 is no bar as it does not relate to any statement made to the Police. 1929 N. 36 (38)=29 Cr. L. J. 953=112 I. C. 51.
4. Identification parade held by Police requires most careful scrutiny, for if a person has seen the accused before the parade, he will identify him. 1924 M. 232=25 Cr. L. J. 145=76 I. C. 289, 1924 O. 295=25 Cr. L. J. 1125.
5. A girl was robbed and she identified the accused in a test identification held by Police. Held, her statement was inadmissible. 1935 C. 311=39 C. W. N. 488, 27 Cr. L. J. 813, 1925 C. 161 and 1926 C. 320 Ref., 1921 A. 215, *Contra* 1929 N. 36, 1920 P. 334.

39. Proportion of persons mixed with accused.

1. The proportion of five other persons to one accused person for identification is the standard for the purpose of satisfying the Court that identification is correct. If this standard is not fully satisfied, the identification should not be rejected but should be subjected to rigid scrutiny. 1935 A. 652=157 I. C. 146=1935 Cr. C. 652. Cr. Appeal No. 248 of 1927 decided by Allahabad High Court on 15th May 1928 Rel. on.
2. Each suspect must be mixed with at least ten under-trials. 1936 A. 373.

40. Precautions about—Parade.

Presumption of precaution having been taken in identification parade is hardly sufficient to render it truly valuable. 1922 L. 31=23 Cr. L. J. 449.

41. Record of—

It is not correct procedure to have the Magistrate who conducted the identification parade simply depose to a memo which he prepared at the time. He must first give oral evidence of the same. 93 I. C. 1051=1926 L. 378=27 Cr. L. J. 555.

42. Statements of witnesses as to—at parade.

1. When a person who picked out accused at the identification parade, is called as witness, at the time of identification become admissible, not to corroborate or contradict him. 27 Cr. L. J. 813=95 Cr. L. J. 1358, 1925 O. 726=26 Cr. L. J. 1236, 5 L. 396=1925 L. 19=27 Cr. L. J. 170=91 I. C. 954.
2. Where a witness states in Court that he cannot identify any one, his statement at the time of identification parade is not admissible. 95 I. C. 477=21 Cr. L. J. 813=1921 A. 215. *See* 1926 O. 36 *Contra* 1928 L. 546=29 Cr. L. J. 366.

Identification—(contd.)

3. If a person at the parade says "I saw this man who is now before me taking part in the offence," this statement can be proved by the Magistrate, although the witness does not remember whom he identified there. 1926 O. 36=26 Cr. L. J. 1564=90 1. C. 444, 5 L. 396.
4. The evidence of a Magistrate that in his presence a witness identified certain accused is hearsay evidence. The statement is not made on oath and it is not in Courts. Such statements can only be used to corroborate or contradict the evidence which he gives in Court. 27 Cr. L. J. 813=95 1. C. 477, 5 L. 396=1925 L. 19, 1926 O. 36=26 Cr. L. J. 1564.
5. If the witness is unable to recognize the accused in Court, his statement can be brought on the record under S. 288, Cr. P. C., if he was able to pick out accused in the Court of Committing Magistrate. 47 A. 39=1925 A. 223=27 Cr. L. J. 836, 27 Cr. L. J. 813.
6. If the witness states that he identified certain persons in Jail but cannot do it at the trial, the identity of the accused can be established under S. 9, by the evidence of the officer conducting parade. 47 A. 39, 1926 O. 36=26 Cr. L. J. 1564.
7. Statements at identification parade are not admissible as substantive evidence. If some persons are not identified in Court, statements in identification parade are not admissible. 1934 L. 641, 1927 A. 163, 1921 A. 215=27 Cr. L. J. 813, 1925 L. 19=5 L. 396, 1925 L. 137 Rel. on. 1925 A. 223=47 A. 39 Dist.
8. Accused pointed out to a Magistrate at an identification parade another person as being one of the dacoits, who took part with him in the dacoity. 6. The fact that a witness makes mistake in identification is no reason for discrediting his evidence in other matters. 45 A. 300=1923 A. 352=24 Cr. L. J. 526.
7. Sometimes the identification of the particular accused by witnesses to whom they were strangers is useful. 19 P. W. R. 1916 Cr.=33 1. C. 636=17 Cr. L. J. 156.
8. When the complainant made no mention of the offender in F. I. R. the subsequent statement that he identified him at the time of attack is unreliable. 91 P. L. R. 1915=10 P. W. R. 1915 Cr.=27 1. C. 346=16 Cr. L. J. 222.
9. The power of observation and memory of different persons varies and the fact that the witness fails to identify a culprit does not render the identification by other witnesses valueless. 1931 L. 178=131 1. C. 277=32 Cr. L. J. 684.
10. The test for finding if the identification of accused by the deceased could be relied on would be, whether deceased mentioned the assailants' name soon after the occurrence, when he had no opportunity of consultation with others. 1931 M. W. N. 731.

14. When the trial of accused turns upon question of wrong identity, test identification must be held. 1934 C. 169=35 Cr. L. J. 601.
15. The Magistrate conducting the parade must take intelligent interest, as life and liberty of accused person may depend on his vigilance and caution. 1933 L. 946=146 I. C. 364.
16. Where the identification is based upon a momentary glimpse in the confusion and excitement of the moment at night, though it was moonlit night, chances of error become greatly increased. 1932 O. 99=33 Cr. L. J. 381=137 I. C. 79.
17. In determining what weight should be given to the identification test, (i) the number of 'wrong persons' picked out, (ii) consistency of identifications made at different times, (iii) large number of men paraded along with the suspects, (iv) picking out of many persons at random should be considered. 1932 O. 287=34 Cr. L. J. 197=141 I. C. 511.
18. If the witness identified three suspects ns against four "wrong men" the identification test should not carry much value. 1933 O. 49=34 Cr. L. J. 382=142 I. C. 831.
19. It must be determined whether all the persons identified were previously known to the witnesses or were perfect strangers to them, the time of occurrence, the state of light and the opportunities which the witnesses had of identifying them. 1929 A. 928=31 Cr. L. J. 206=121 I. C. 103.

24. Evidence of a witness given in Court should be accepted only if he identifies the accused whom he previously identified in Jail. 1925 L. 137=25 Cr. L. J. 1272=82 I. C. 280.
25. As a geneneral rule, failure of the witness to identify the accused in Court, whom he identified in Jail, weakens his evidence. 1930 O 455=32 Cr. L. J. 162, 23 Cr. L. J. 850, 1927 O. 369=29 Cr. L. J. 129., 1928 L. 546=29 Cr. L. J. 365.

IDENTIFICATION OF ANIMALS.**1. By hoofs or foot mark.**

As a rule the fore hoof of a horse is rounder and more confined, whilst the rear-hoof is more elongated and more open. The size and shape of the shoes, the number of the nails and the distance from one another, etc., are often so characteristic that their impressions may very well serve to establish identification. *Criminal Investigation* by Dr. Hans Gross, Ed. 1934. See 5 L. 396=1925 L. 19=27 Cr. L. J. 170.

2. By skin.

There are peculiarities in animals from which one can recognise them. 25 P. R. 1883 Cr.

IDENTIFICATION OF DEAD BODY. See Identification—34.**1. To determine sex.**

When the entire body is available there is no difficulty in determining the sex. When mutilated fragments of a body or only bones are available for examination, the following are the more important sexual characteristics of the skeleton in the female —

1. The bones are smaller, thinner and lighter and muscular attachments less prominent than in the male.
2. The *pelvis* is shallower, wider, ilia more expanded, sacrum more concave than the male (where it is straighter), the symphysis shorter, pubic arch wider, with edges more diverted, foramina more triangular and outlets larger than in the male.
3. The *ribs* have a greater curvature than in the male. *Lyon's Med. Jur., Ed. 1904, P. 32.*

2. Value of—

1. Although the body is decomposed it can be identified by means of clothes, age, height etc. 1923 L. 40=23 Cr. L. J. 783, 15 P. W. R. 1915 Cr.

2. Cloth

1. Identification of ordinary clothes is impossible. 1922 A. 24.
2. The fact that cloth found in the house of accused answers to the general description of the stolen clothes as given by the complainant is not sufficient proof of identity, that the cloth found had a particular stamp on it is not a sufficient proof. 1 L. 102=57 I. C. 167.

Identification of things—(concl'd.)

3. Coins found on the thief must be proved to be the actual coins before they can be treated to be stolen property. 1925 S. 17=26 Cr. L. J. 1315.
4. Evidence of—

 4. By constant use a thing can be recognized. A carpenter, a mason or a workman by remembrance of their general appearance can recognize his tools and most people their dress and other things by frequently seeing, handling or using them. *Ibid*, P. 545.
 5. Where stolen article is of ordinary make and there is nothing peculiar in it, the evidence of a complainant—a person of ordinary position, as to its identification is not sufficient. 22 P. W. R. 1912 Cr.=13 Cr. L. J. 555, 81 I. C. 48.

IMPOTENCY.

1. Causes of—

- (a) *Age.*—In females, there can be no limit to the oldest age, she can be potent to allow the act. In males, a man of eighty is capable of becoming a father. As to the age at which a well formed male child is capable of getting an erection nothing need be said, it is a function inherent in the structure of a healthy penis. The legal presumption is that the generative faculty does not disappear through age.
- (b) *Illness.*—As a general rule, diseases which do not affect the brain nor spinal cord, and which are not attended with great debility do not prevent intercourse. Blows on the head or spine by affecting the brain and spinal marrow may produce impotency.
- (c) *Emotion.*—Emotion is an exceedingly common cause of temporary impotence, and in a few exceptional cases it is reported to have caused permanent impotency as regards one particular female. Tact and possibly a slight exhibition of drugs will usually overcome this form of impotency.
- (d) *Deformities or defect.*—In some instances there is an arrest of development in the external organ. Even the presence of two or three penis, is no bar to exercise of sexual power.
- (e) *Disease or drugs.*—Temporary impotency may be caused by acute disease of the penis, e.g., the chordee of gonorrhœa, sores on the glandular fore skin, etc. Complete destruction or removal of testicles does not at once destroy the power of coition. If the testicles are removed after puberty, the power of erection remains for a long

1. S. 167, Evidence Act, applies to civil as well as criminal cases. 1 C. 207, 2 B. 61, 9 A. 609, 25 M. 61, 5 Bom. L. R. 434, 28 B. 129.
2. The wrongful reception or rejection of evidence is an error of law. 11 G. W. N. 1028.
3. Evidence should not be rejected without giving sufficient reasons. 11 C. W. N. 380.
4. An accused in a trial by jury is entitled to the verdict of jury on question of fact, and where verdict is vitiated by the improper admission or rejection of evidence, the conviction should be set aside and accused retried. 21 C. 955, 4 C. W. N. 576, 30 C. 822, 4 C. W. N. 196.
5. According to Bombay High Court, if part of the evidence is irrelevant or inadmissible, High Court can uphold the verdict on remaining evidence or may direct retrial. 19 B. 749 (761), 27 B. 626, 39 M. 449.
6. In case of appeal against acquittal, High Court will not order retrial if the evidence could not support a conviction. 26 M. 1.
7. High Court has power under S. 26 of the Letters Patent to review the whole case and to determine whether admission of rejected evidence would have affected the result of retrial. 17 C. 642, 2 B. 61.
8. Where inadmissible evidence is admitted, there are two points for consideration, firstly whether the reception of the inadmissible evidence has in fact occasioned failure of justice, and secondly whether if it is excluded, there was sufficient evidence to justify the verdict of jury. 1925 C. 161=26 Cr. L. J. 307.
9. A Magistrate cannot import his personal opinion, about the personal character in the decision of the case, nor he can refuse to believe evidence in accused's favour on that account. 50 I. C. 171=20 Cr. L. J. 283.
10. Where the evidence improperly admitted is very trivial and cannot have occasioned a failure of justice. High Court should not order a retrial but make an enquiry under S. 167, Evidence Act. 14 C. W. N. 493=11 Cr. L. J. 196=11 C. L. J. 301.
11. Privy Council set aside conviction for abetment of murder, which was mainly based on inadmissible evidence, and when that evidence was excluded, there did not exist any reliable evidence on which a capital conviction could safely be based. 36 M. 501, 6 B. L. R. 495.
12. Misreception of a piece of evidence, which is inadmissible, but which has very little weight, does not vitiate the trial. 1930 P. 247=31 Cr. L. J. 721.
13. The mere fact that an inadmissible piece of evidence is on the record through a technical error, should not stand in the way of conviction. 1923 P. 119.
14. Order excluding evidence can legitimately be attacked in an appeal against the order of acquittal. 1927 S. 23=27 Cr. L. J. 1217=97 I. C. 1041.

Improper Admission or Rejection of Evidence—(concl'd.)

15. Though this section implies that improper reception of evidence is not to be made a ground for the reversal of judgment, unless it was objected to by the party, yet S. 256 of Cr. P. C. (of the old Act) lays down that Judge can prevent the production of inadmissible evidence whether it is objected to by the parties or not. 11 B. H. C. R. (Cr. C.) 44.
16. It is incumbent on the Court to investigate whether independently of the evidence improperly admitted there is sufficient evidence to justify conviction. 47 C. 671 = 1920 C. 500 = 58 I. C. 929, 1935 M. 528 (540) = 68 M. L. J. 73.
17. The object of trial in every case is to ascertain the truth. It is necessary that Courts should be in a position to estimate at its true worth the evidence given by witnesses. And nothing that is calculated to assist it in doing so ought to be excluded, unless for reasons of public policy the law requires its exclusion. 11 Bom. H. C. R. 120, 1935 S. 145 (171).
18. Sessions Judge upheld the conviction after excluding wrongly admitted evidence, but the trial took a different course, the case was sent back for retrial. 1933 C. 136 = 34 Cr. L. J. 294.
19. A finding will not be disturbed if after throwing aside the evidence which ought not to have been admitted, that still remains sufficient evidence to support the finding. 1932 S. 201, 1926 L. 20, 1926 P. 211, 1924 B. 480, 1925 M. 245, 9 A. 609, 11 Bom. H. C. 90.
20. Where an objection with regard to the admissibility of evidence is taken before Court, the Court should ignore the evidence wrongly admitted. If it is not done, High Court usually remands the case for a finding with reference to admissible evidence. 1925 M. 245 = 25 Cr. L. J. 1275.
21. Conviction will be set aside if evidence of bad character is admitted. 1931 P. 345 = 32 Cr. L. J. 1025 = 133 I. C. 449.
22. S. 167 is applicable whether the objection is taken in appeal or revision, though such an objection standing alone is hardly sufficient for revision. 23 B. 177.

10. Review of its own judgment. *See* Review—5.

INQUIRY. See Preliminary enquiry, Further enquiry.

The enquiry of a case is not deferred till such time as the Magistrate begins to record evidence but commences—not with the lodging of complaint or even with the issue of process—but with the appearance of accused on such process before the Magistrate to answer the charge. 32 Cr. L. J. 1161=134 I. C. 361=1931 B. 411.

INSANE PERSON—TRIAL OF. Ss. 458—473, Cr. P. C.

Proceedings are revived against the accused if certificate is issued under S. 473. But if certificate is not proved, the trial is not illegal. 1934 L. 1934 L. 123, 2 C. 356.

INSANITY. S. 84, Penal Code.

1. Applicability of S. 84.

Where the accused was of unsound mind at the time of committing the murder but he knew perfectly well that he is doing a wrong thing. S. 84 does not apply. 46 A. 243=1924 A. 413=81 I. C. 171=25 Cr. L. J. 683.

2. Burden of proof and Court's duty.

1. The *onus* of proof when the plea of insanity is taken by the accused lies on him and it must be affirmatively proved that he was insane at the time of the commission of an offence. 1929 C. 1=30 Cr. L. J. 494, 21 Cr. L. J. 317.
2. Where the evidence as to insanity of accused is conflicting, the accused should be convicted as on him lies the burden of proving insanity. 1924 A. 186=77 I. C. 236=25 Cr. L. J. 348=21 A. L. J. 776.
3. The plea of insanity is a defence to criminal responsibility. It must, therefore, be established by defence either from the prosecution evidence or independently by the defence. 22 C. 317, 50 I. C. 991, 55 I. C. 477, 21 A. L. J. 776.
4. That the plea must be taken and proved by defence is scarcely a rule which the Court will observe in every case. 27 C. W. N. 290=1923 C. 460.
5. If the Court entertains doubts about the sanity of prisoner, he should try the fact of such unsoundness of mind by medical examination. Merely putting questions to him is insufficient. 1 B. H. C. R. 33.

3. Degree of insanity

1. Medical and legal standard of insanity are not identical. From the medical point of view, it is probably correct to say that every man at the time of committing murder is insane and is not in sound, healthy and normal condition but from the legal point of view he is sane so long as he can distinguish between right or wrong or there is a guilty mind. 1923 L. 508=25 Cr. L. J. 395.
2. The mere presence of five circumstances, viz., (1) absence of any motive, (2) absence of secrecy, (3) multiple murders, (4) want of pre-arrangement, and (5) want of accomplices does not fulfil the requirements of S. 84. A man may be suffering from insanity in the sense the word is used by an alienist but may not be suffering from unsoundness of mind as defined in S. 84. 8 L. 114=1927 L. 52=99 I. C. 323=27 P. L. R. 823=28 Cr. L. J. 120.

4. Delusions.

1. Existence of delusions which indicate a defect of sanity and uncontrollable impulse is not sufficient. 1929 C. 1=33 C. W. N. 136=30 Cr. L. J. 494.
2. Accused had a delusion that the deceased had connection with his girl wife and killed him, although no such thing happened at all. He was convicted of murder. 28 C. 613, 41 I. C. 142, 43 I. C. 423=19 Cr. L. J. 135.
3. If a person breaks some body's head and due to insane delusion thinks he is breaking a jar, or kills a child thinking that he is saving him from sin and sending him to Heaven, he is incapable of knowing the nature of his act. 23 C. 604, 30 P. R. 1918 Cr.=20 Cr. L. J. 1=48 I. C. 492.
4. Accused was suffering from fever and being annoyed with cries of the children, cut their throats and went to sleep. The Court held the accused guilty as there was no evidence of delirium and commended him to the mercy of Government. 14 B. 512.
5. Accused in paroxysm of fever believing that he was surrounded by objects intending to harm him took a sword and killed goat and a girl. Held, he was guilty. 12 M. 459.
6. Accused killed his wife. He was under a delusion that armed men would come to his house and take away his wife. It was shown that accused ceased attending to

5. An inquest report by Magistrate cannot be taken into consideration under S. 202, Cr. P. C., by another Magistrate. 1932 C. 121=33 Cr. L. J. 218.
6. A report or finding under S. 176 is not necessary. And if there is one it does not form part of the proceedings. 3 C. 742.
7. Accused is entitled to get copies of inquest report and statement of witnesses at the inquest. 1925 M. 424, 1933 C. 861.

3. By Police. S. 174, Cr. P. C.

1. A man who comes forward without being summoned and volunteers information at a Police enquiry under S. 174 is not bound to give true answers. 1922 L. 133=65 I. C. 434=23 Cr. L. J. 82=6 P. W. R. 1922 Cr.
2. Proceedings under S. 174, Cr. P. C., should be kept quite distinct from the proceedings taken on complaint regarding the same death. 1927 L. 30=99 I. C. 54=5 L. L. J. 524=28 Cr. L. J. 26=27 P. L. R. 779.
3. When the body cannot be found or has been buried, there can be no investigation under S. 174. 27 P. R. 1908 Cr=9 Cr. L. J. 105.
4. Refusal to answer questions when summoned under S. 175 (1), Cr. P. C., during the course of investigation under S. 174 is an offence. 27 P. R. 1908 Cr.
5. A verbatim report of the statements of witnesses examined at the inquest may be of great use to the Court in testing the value of evidence subsequently given. 12 Cr. L. J. 124=9 M. L. T. 321.

4. Confession of accused.

The confession under S. 25 need not be a confession of the crime which the Police Officer is at the moment investigating. If A says to Police Officer during investigation under S. 174 "I noticed B murdering, while I was murdering Z" his confession that he murdered Z cannot be proved. 1932 M. 24=1931 M. W. N. 1138=61 M. 3. The loss of self control due to alcohol is not sufficient. 14 Cr. L. J. 427.

6. Essentials and Evidence—Proof—

1. To establish insanity it must be proved that accused was labouring under such a defect of reason from disease of the mind that he did not know the nature and quality of the act he was doing or if he did know it, he did not know that it was wrong. 1929 C. 1=115 I. C. 561=30 Cr. L. J. 494, 1932 A. 233, 32 I. C. 671, 94 P. L. R. 1909, 30 P. R. 1918 Cr.
2. Accused's disease of mind must have been formed before the act was done. 115 I. C. 561=1929 C. 1.
3. That the accused was in a bewildered state of mind a day or two before the occurrence is not sufficient. 1928 P. 363=103 I. C. 424=29 Cr. L. J. 393.
4. Antecedent and subsequent mental condition is not *per se* sufficient. At the time of the act accused must be unable to know its nature. 8 L. 684.
5. Absence of motive is no ground for inferring insanity. 112 I. C. 222=29 Cr. L. J. 1006, 40 P. R. 1905 Cr., 1927 L. 52, 1929 C. 1=115 I. C. 561, 23 C. W. N. 621, 9 L. 371=1928 L. 796, 1925 M. 1238=91 I. C. 78.
6. The fact that an accused is a person of weak inhibition does not make him insane. Frantic humour or something unaccountable in a man's action is insufficient. He should be totally deprived of his understanding and memory and does not know what he is doing. 111 I. C. 331=29 Cr. L. J. 827, 8 L. 684, 109 I. C. 364.
7. If the accused charged for murder was conceited, odd and irascible and his brain was not alright, it is not sufficient. 1927 L. 567=103 I. C. 59=28 Cr. L. J. 635.
8. A man cannot be exempted under S. 84 because he is ailing for some time before the crime, that he does not take food and there is no apparent motive for committing the offence. 1930 N. 63=120 I. C. 733=31 Cr. L. J. 164, 50 I. C. 991.
9. Mere eccentricity or singularity of manner is insufficient. 1929 C. 1=115 I. C. 561.
10. Evidence of pre-meditation and design or resistance of arrest negatives plea of insanity. 1929 C. 1=115 I. C. 561=30 Cr. L. J. 494.
11. Accused, a Ganja smoker, set fire to a building and ran away. It was shown that he used to threaten his parents and beat his wife and used to throw away his food. Insanity is not proved. 1928 M. 196=106 I. C. 559=29 Cr. L. J. 63, 13 I. C. 916.
12. Accused was charged with murder. There was no motive for the crime and he did not disappear and said "Arrest me, I have shed blood". He took no interest in inquiry. Four months before murder he showed symptoms of insanity which continued for a year. Held, that the accused was insane. 1924 O. 190=24 Cr. L. J. 741.

3. Where the accused did not report an accidental death of a person, who fell from a tree, it would not come within the meaning of "unnatural" as used in S. 45. 1922 N. 87=66 I. C. 1001=3 Cr. L. J. 345.
4. The report to Police must state facts. 51 C. 402=1924 C. 476=81 I. C. 220=25 Cr. L. J. 732.

2. Liability of—on whose land lawful assembly is held. S. 154, I. P. C.

5. A person is not guilty under S. 154, unless there is finding that the riot was premeditated. 12 W. R. 75.

1. Accused struck a blow on his wife's head with a plough-share which though not likely to cause death, made her unconscious. Believing her to be dead and to lay the false defence of suicide, he hanged her by a rope and caused her death by strangulation. Held, he was not guilty of murder or culpable homicide but under S. 326. 42 M. 547=1920 M. 862, 18 C. W. N. 1279, 6 W. R. 559 (1866), 15 B. 194, 1923 A. 545.
 2. Accused placed the deceased while unconscious on the Railway line and death was caused. There were some marks of strangulation but death was not due to it. There was no evidence that accused thought deceased to be dead before placing her on the Railway line, nor that it was done to commit suicide or committed murder. Held, he was guilty of murder. 1933 M. 798=34 C. 483, 1923 A. 545=25 Cr. L. J. 703, 26 I. C. 483. Cr. L. J. Ref.

3. Accused struck deceased two or three times on the head, threw him in a pool of water containing few inches of water, and removed money. Later on he threw it into canal. Held, he was guilty of murder and not under Sec. 323—379, I. P. C., as his action was continuous. 1931 L. 27=32 Cr. L. J. 483.
4. Accused struck the deceased on head with the intention of killing him. Believing him to be dead, he set fire to the hut in which he was lying. Held, he was guilty of attempt to murder. 15 B. 194. *Contra* 26 I. C. 157=15 Cr. L. J. 709, 1931 L. 27, 1933 M. 798.

1. A conviction based solely on evidence given by the witnesses before Committing Magistrate and retracted by them at the trial is unsustainable. 17 P. R. 1919 Cr., 51 P. R. 1537, 21 A. 111 and 23 A. 633, unless corroborated by independent evidence. 5 L. 321 (323), 12 M. 123, 27 C. 295, 1925 P. 440=91 I. C. 258.

50 Distinction between culpable homicide and—.

1. All murder is culpable homicide but not vice versa. Every act falling within S. 299 and not falling under S. 300 is culpable homicide not amounting to murder. 11 Cr. L. J. 295.
2. Culpable homicide may not amount to murder where notwithstanding that the mental state is sufficient to constitute murder, still one of the exceptions to S. 300 applies or where the mental state though within the description of S. 299, is not of special degree of criminality required by S. 300. 30 I. C. 113=16 Cr. L. J. 561=19 C. W. N. 653.
3. The distinction between the intention to cause injury sufficient in the ordinary course of nature to cause death and the intention to cause injury likely to cause death, depends upon the degree of probability of death resulting from the act committed. 10 Cr. L. J. 359.
4. When the intention to cause death or to cause such bodily injury as is likely to cause death co-exists with knowledge described in Ss 299 or 300, the knowledge merges in the intention and a higher degree of guilt is imputable. 32 P. R. 1887, 27 P. R. 1283, Cr.
5. All acts of killing done with the intention of killing or to inflict bodily injury likely to cause death or with the knowledge that death must be the most probable result are *prima facie* murder, while those committed with the knowledge that death will be likely result fall under S. 304. 3 A. 776, 30 Cr. L. J. 141.
6. Where it is difficult to find whether the offence falls under S. 302 or S. 304, the accused should be convicted under S. 304. (1829) S. J. L. R. 459.

51. Drunken Brawl.

When only one blow was given in a drunken brawl in the accused's house, no offence under S. 302, or S. 304 but one under S. 326 was committed. 1934 L. 477.

52. Events leading up to assault.

Events leading to and preceding the assault on deceased must be considered. 1934 R. 44=35 Cr. L. J. 855=148 I. C. 1069.

53. Evidence. See—20. See Eye witness.

1. Although the evidence of admission of guilt to villagers is sufficient to justify the conviction, such evidence must be closely scrutinized. 117 I. C. 737=30 Cr. L. J. 829=1929 O. 271.
2. When the only account of what happened on the night of murder is given by accused himself and it is his admission contained in that statement, it should be accepted in its entirety and if it establishes any mitigating circumstances, the accused should

- he given the benefit of it. 1930 L. 269=121 I. C. 178=31 P. L. R. 35=31 Cr. L. J. 226.
3. Where the person admittedly knew that his wife had been murdered shortly after midnight and yet he made no report to Police station, nor made any attempt to find out as to who killed his wife, his conduct was unnatural and may lead to the conclusion that he was the real murderer. 116 I. C. 193=1929 O. 190=30 Cr. L. J. 567.
 4. In a murder case there was no counter story worth believing on behalf of the accused. The motive was evident and he confessed his guilt to his uncle. His subsequent conduct showed that he knew the truth but put forth numerous falsehoods. Ifeld, he was guilty of murder. 30 Cr. L. J. 829=1929 O. 272.
 5. The mere fact that accused pointed out dead body is not sufficient to convict him of murder. 1929 L. 558=114 f. C. 719=30 Cr. f. J. 375.
 6. If the facts point either to murder or to suicide, the accused is not guilty. 52 M. 529=1929 M. 487=121 I. C. 157=31 Cr. L. J. 223.
 7. Where death has been caused, it is no defence that the deceased was suffering from a complaint which would have caused death in any event. 44 f. C. 338.
 8. Where a person causes the death of another person, it is for him to show that his act was removed from the category of murder by one of the exceptions to the section. 17 A. L. J. 866.
 9. Accused visited the deceased's shop. They slept together on cots in front of the shop and in the morning the deceased was found murdered and accused disappeared. Some stolen property was recovered from him and his shirt was blood stained. Ifeld, he was guilty of murder. 1929 S. 179, 1926 B. 513.
 10. Accused knew where the bodies of murdered men were and he confessed his guilt to Lambardar of the village. Ifeld, it was not safe to rely upon the confession to Lambardar, and he was guilty under S. 201 only. 1928 L. 858=111 I. C. 449=29 P. L. R. 486=29 Cr. L. J. 865.
 11. Where it is doubtful whether confession was made before or after discovery and there is no other evidence, the accused should be acquitted. 68 I. C. 17=23 Cr. L. J. 481.
 12. Where the prosecution witnesses are untruthful as to the greater part of their evidence, it is dangerous to convict on the residue without corroboration. 1930 O. 460=128 f. C. 211=32 Cr. L. J. 94.
 13. Where there is no sufficient corroboration of approver's story conviction is bad. 1922 L. 311.
 14. Where real murderers were concealed being public favourites or deceased was unpopular and no evidence was forthcoming, the accused should be acquitted. 1929 P. 527.
 15. Where assessors find only some of the accused guilty and evidence is the same, a conviction under S. 302 is improper when truth is kept back. Dying declaration in Punjab is generally of no weight. 30 P. L. R. 536.
 16. The mere fact that accused pointed out a heap of *Turi* belonging to a Zamindar from which blood stained weapon was recovered and accused had some injuries on his person is not sufficient to convict him of murder. 1928 L. 335=10 L. L. J. 58.
 17. Where the only evidence against the accused was the evidence of motive and his production of dead body from his fields, conviction under S. 302 was not sound. 107 I. C. 482=29 Cr. L. J. 252, 1927 L. 541, 1926 L. 88.
 18. The mere fact that accused has knowledge where corpse is buried, does not prove that he was the murderer. 6 L. L. J. 54=75 I. C. 693, 18 P. R. 1917 Cr., 1926 L. 138=89 I. C. 901.
 19. The mere fact that property belonging to deceased is recovered from a place pointed out by the accused is not sufficient to convict him of murder. 96 I. C. 849=27 Cr. L. J. 993.

Murder—(contd.)

20. Going with a *Toka* on the day of murder is insignificant as many zamindars carry *Tokas* for their agricultural work. 77 I. C. 602.
21. The mere pointing out of body of the person murdered would not by itself be sufficient evidence for a conviction of murder, but if the appellant has never explained how he came by his knowledge of the place where the dead body lay, it may be sufficient. 68 I. C. 841=23 Cr. L. J. 617=1922 L. 189.
22. Where the accused committed an unprovoked and cowardly assault on a person and fractured his skull and took him by surprise, he was guilty of murder. 27 Cr. L. J. 766=95 I. C. 286.
23. Conviction of murder on the statement of a person found to be unreliable cannot be supported. 100 I. C. 359=1927 M. 1112=28 Cr. L. J. 279.
24. Where a witness sees a murder committed and gives no information his evidence is no better than that of an accomplice. 76 I. C. 824=25 Cr. L. J. 264.
25. Where the dying man pointed to the accused as the person inflicting injury, and the confession of the accused that he committed murder is sufficient to convict him of murder when there was other evidence of struggle between the accused and the deceased. 49 C. 600.
26. Suspicious circumstances alone are not sufficient. 9 L. 671.
27. After the report of gun N. and L. were found at the scene of occurrence each with a gun in his hand and it was not proved who fired the shot, none of them was guilty of murder when there was no evidence of common intention. 11 C. W. N. 1085.
28. It is unsafe to rely upon evidence of witnesses who have resiled from their previous statements. 1925 M. 879=88 I. C. 91=1925 M. W. N. 319.
29. The failure to record the statement of the first informant and his non-production before the Sessions Judge, makes the case suspicious. The recording of the statement of the second informant does not make him the first informant. 1 P. 401=71 I. C. 353=24 Cr. L. J. 129.
30. Chemical Examiner's negative report regarding absence of traces of blood in the earth, leaves and grass taken from the alleged place of occurrence will not displace strong direct evidence of the place of murder. 1924 C. 625=26 Cr. L. J. 5.
31. Observations by investigating officer made on the spot require the same sort of corroboration by independent witnesses as in the case of inquest report. 15 A. L. J. 340.
32. The fact that blood stained garments are found in a house is insufficient to convict an occupant of murder. 26 P. R. 1916 Cr.
33. Withholding of evidence is certainly a flaw in prosecution, still each case depends upon its own facts. 1932 L. 500=137 I. C. 691=33 Cr. L. J. 497.
34. It was found that a child was murdered by one or other of the two accused. Both were convicted under S. 201, I. P. C., only. 1932 M. 748=33 Cr. L. J. 814=139 I. C. 725.
35. Where in a murder case there is only one eye-witness and he is disbelieved on several points, it is unsafe to convict on his evidence, when there is no motive. 1934 O. 373.
36. In ordinary murder cases unconnected with faction feuds there is no reason to suspect the evidence of relatives. 1934 L. 870.
37. Deceased denounced accused long after attack and just before death. There was no other corroboratory evidence. Accused must be given the benefit of doubt. 1933 R. 95=34 Cr. L. J. 747.
38. In a charge of murder or attempt to murder the fact of accused being member of terrorist association is irrelevant. 1936 L. 341=37 Cr. L. J. 504.
39. Concerted attack by two accused armed with deadly weapons amounts to murder. It does not matter which of them attacked with the weapon. 1936 L. 341=37 Cr. L. J. 504.

54. Exceeding right of private defence. See Right of private defence—19.

55. Exceptions—onus—. See Burden of Proof—3.

If accused wants to have the benefit of any exception, the onus is on him to prove it. But when ignorant or ill-defended person is being tried, the Court may examine the facts to see if some exception applies. But there must be a plea based on exception by the accused. 1931 M. W. N. 873.

56. Explanation by accused—. See Defence—.

1. The mere pointing of dead body in a field is insufficient for conviction, but if the appellant has never explained how he came by his knowledge of the place where body lay, it may be sufficient. 68 I. C. 8+1=1922 L. 189=23 Cr. L. J. 617.
2. Accused confessed his guilt to his uncle and there was motive for murder. His subsequent conduct showed that he knew the truth but put forth numerous falsehoods. Held, he was guilty of murder. 30 Cr. L. J. 829=1929 O. 272.
3. Where the only account of what happened on the night of murder is given by the accused himself and it is his admission contained in that statement, it should be accepted in its entirety and if it establishes any mitigating circumstances, the accused should be given the benefit of it. 1930 L. 259=121 I. C. 178=31 Cr. L. J. 226.
4. If a person is poisoned shortly after eating food which must have been prepared by his wife and no explanation is coming forth as to what happened, there is a violent presumption that he was poisoned by the members of his family. But where in addition to it there is an attempt at persistent lying to account for his absence and corpse was hidden by them, the presumption becomes certainty. 49 A. 57=1926 A. 737=27 Cr. L. J. 1068=97 I. C. 44.
5. The accused on his trial is merely on the defensive and owes no duty to any one but himself. He cannot be convicted because he has not tried to explain to the Court how a death has occurred or by what means. (1894) Unrep. Cr. C. 686, 1930 M. W. N. 1211.
6. If prosecution does not present true facts, as to how a man was killed, it is not necessary for accused to plead right of private defence. 1925 P. 175=26 Cr. L. J. 647.
7. Proof of case must depend on prosecution evidence rather than on absence of explanation by accused. 1936 C. 73=37 Cr. L. J. 394.
8. If accused is involved by evidence in a state of considerable suspicion, he must for his own safety, prove facts to prove innocence. 1936 C. 73=37 Cr. L. J. 391.

59. Hurt to companions of deceased.

1. Accused were sent up for trial under Ss. 302—149 and acquitted, they can be convicted under S. 323 for having caused hurt to the companions of accused in the same transaction, provided the offence is clearly brought out by the evidence. The omission of charge under S. 323 would not render the conviction illegal. 1931 L. 566, 34 C. 325 and 34 C. 698 Dist.
2. Sessions Judge can add charges under S. 326, I. P. C., for causing injuries to the prosecution witnesses, when the original charge was for murder. 1924 L. 413=71 I. C. 593, 9 S. L. R. 37 Foll. 32 C. 22 and 4 I. C. 903 Dist.

60. Injuries sufficient to cause death. See—51.

61. Intention—. See Motive—weapon.

1. A person giving a violent blow on the neck must be presumed to have the intention of killing. 97 I. C. 93=23 Cr. L. J. 61.

Murder—(contd.)

2. A person giving a *lathi* blow on the head must be presumed to have the intention of causing such bodily injury as is likely to cause death. But it does not necessarily follow that a *lathi* blow on the head is sufficient to cause death. 7 P. 633, 1930 L. 490, 1928 L. 93.
3. Where there is nothing more than a fatal result to indicate an intention to cause death and no weapon is used, it is unsafe to convict him of murder. (1881) 1 Weir 229, 13 Cr. L. J. 145.
4. Intention is a question of fact to be decided on the circumstances of each particular case. 44 I. C. 679.
5. A person striking another on a vital part must be presumed to have the necessary intention. 24 I. C. 601.
6. A person who inflicts injury on another which ends fatally, which he knew was likely to cause death, is guilty of murder though he had no wish or motive to cause death. In such a case the law will presume an intention to cause death and the burden is on the accused to show that he had no such intention. 18 I. C. 675 = 14 Cr. L. J. 115.
7. A brutal assault with *lathi* causing death is not ordinarily murder, unless the accused intended to cause death or to cause such bodily injury as is sufficient to cause death. 30 I. C. 998, 7 S. L. R. 29. See 37 C. 315, 35 A. 560.

12. The fact that a person is killed by repeated blows negatives the plea that there was no intention to kill the accused. 157 P. L. R. 1911 = 56 P. W. R. 1911 Cr = 12 Cr. L. J. 214.

14. If blows perforated heart and divided the intestine the intention is proved. 92 I. C. 222.

18. Where four accused deliberately lay in wait for the deceased intending to beat him with *lathis* on account of enmity and broke six ribs and numerous other injuries. 82. **Treatment.** See Wound 17—, Death by negligence —7.
 1. The mere fact that more prompt or better treatment would have saved the deceased cannot exonerate the accused from liability for the death. 108 I. C. 164=29 Cr. L. J. 345, 1932 O. 279=9 O. W. N. 655.
 2. The deceased fell down on account of two serious injuries and was taken to Hospital. He felt it after he was progressing well and died a month and a half after the occurrence, of pneumonia. Medical evidence showed that death was not due to injuries. Held, that the accused was not guilty under S. 304. 81 I. C. 181.
 3. If one gives blows to another, who neglects to cure the wounds, dies, it is murder or man-slaughter according to circumstances. 29 Cr. L. J. 345.
 4. The fact that victim did not take great care or neglected to take care of his health after assault, which hastened his death is immaterial. 1934 O. 405=35 Cr. L. J. 1113.
 5. Where death was due to the ignorance of deceased and the unskilful treatment and the injuries were only the remote cause of death, the accused was not guilty of culpable homicide. 1935 R. 418.
83. **Undue advantage.**
 1. When a person during the course of a sudden fight, without premeditation, took undue advantage and acted in a cruel manner in using knife or dagger, he was guilty of murder. 9 Bom. L. R. 145, 4 L. L. J. 276, 6 L. L. J. 527.
 2. Where a person uses deadly weapon in a sudden fight against an unarmed man, he is not entitled to the benefit of Exception 4 to S. 300. 2 L. B. R. 320, 30 Cr. L. J. 173.
 3. If a man uses a hatchet to an unarmed man, without any apprehension of injury to himself, he cannot claim the protection of Exception 4. 28 Cr. L. J. 415, 8 L. L. J. 188.

Murder—(contd.)

4. Accused's party pursued the complainants in three boats and when they had them in their powers, landed and attacked them with spears and killed three of them. Held, they were guilty of murder. 8 C. L. J. 551.
5. Accused being inimical to the deceased came to his field and beat him with sticks so severely that he died within few minutes. Fourteen ribs were fractured and both the lungs and spleen were ruptured. Held, they were guilty of murder. 31 P. R. 1914 Cr.
6. In order to apply Exception 4, the accused must not have taken undue advantage or acted in cruel manner. 1932 L. 606=33 P. L. R. 718.

84. Weapon—nature or use of. See Weapon—Wound.

1. When there is nothing more than a fatal result to indicate an intention and no weapon is used, it is unsafe to convict the accused of murder. (1881) 1 Weir 299, 13 Cr. L. J. 145.
2. Where the weapon used, the part of the body aimed at and pierced and violence with which the blow was inflicted lead to inference that accused intended to cause such bodily injury as was likely to cause death, even though the accused did not intend to cause death, the accused can be convicted of murder. 124 I. C. 680=31 Cr. L. J. 731=1930 L. 154.
3. Where a person gives a club wound sufficient to cause death, he is guilty of murder irrespective of intention to cause death. 1926 O. 184=90 I. C. 147=26 Cr. L. J. 1491.
4. It would be most unsafe to suggest that in all cases where death is caused by a single blow from a hollow bamboo, the offence is not murder. The size and the weight of the stick, the manner in which it is used and the actual injuries caused by the blow must all be considered. 65 I. C. 495=1921 L. B. 4.
5. A *takwa* or *chhavi* is a deadly weapon and a person who strikes a blow on the head with such a force as to cut through the skull is guilty of murder. 88 I. C. 995, 69 I. C. 439.
6. Where death is caused recklessly and without premeditation, the safer criterion to decide the nature of the offence committed is the nature of weapon used. 14 Cr. L. J. 459=20 I. C. 619.
7. Accused killed a person by striking him one blow on the head, with a long and heavy bamboo. The nature of injury showed that very great force was used. Held, he was guilty of murder and although the weapon used was not one that would of necessity cause fatal injury. 11 L. B. R. 115.
8. If blows by heavy weapon as rice pounder are given on the head, accused must be regarded to have intended injury sufficient in ordinary course to cause death. 1935 R. 427.
9. The number of wounds is not the criterion but the position of combatants with regard to their arms must be considered. A single grievous hurt to an unarmed man may amount to murder. 1935 Pesh. 59=1935 Cr. C. 357.
10. Incised wound $7\frac{1}{2} \times 3 \times 3\frac{1}{2}$ near the nostril points to intention necessary for murder. 1933 R. 95=34 Cr. L. J. 747.
11. In case of wound five inches deep, intention is to cause death. 1936 R. 474.
12. A person who kills another by striking with a *da* on the forehead is guilty of murder. 1936 R. 477.

85. Who gave the fatal blow not certain. See Culpable Homicide

1. When all the accused joined in beating the deceased mercilessly, but it was not shown who inflicted the fatal blow, the accused may be sentenced to transportation for life instead of death. 1932 L. 186=137 I. C. 282=33 P. L. R. 1.
2. When both assailants were proved to have been armed with *kayan* but there was single blow on the head which caused death and it was not certain who gave the fatal blow. Held, that they were guilty under S. 302 and not under S. 304 or S. 325. A sentence of transportation for life was proper. 133 I. C. 557=32 Cr. L. J. 1083=1931 L. 538.

3. When the common intention to murder brutally is carried out, the mere fact that it is impossible to say as to who gave the fatal blow, is not sufficient to impose the lesser penalty of transportation for life. 1535 L. 337=156 L. C. 745. 1932 L. 133=137 L. C. 282 Dict.

2. A Judge being a shareholder of the Prosecuting bank received under S. 556, Cr. P. C. and the Chief Justice took up the case from that point. OATH AGAINST OATH.

OATHS ACT (X OF 1873.)**S. 1.**

Evidence given under special oath is conclusive only as against the person who offers to be bound by it; but it does not prevent the Court from prosecuting him for perjury. 1924 A. 511=82 I. C. 359.

S. 4.

All Courts are authorised to administer oaths and affirmations in the discharge of their duties. 34 P. R. 1916 Cr.

S. 5.

1. A child of tender years should be examined as a witness only after the Court had satisfied itself that he can fully understand and the Court should comply with the provisions of S. 6 of Oaths Act. 120 I. C. 514=31 Cr. L. J. 114.
2. Mere fact that the Court advisedly refrained from administering oath to a boy of six does not render his evidence inadmissible. 38 A. 49, 61 I. C. 705.
3. An accused is competent to testify under S. 118, Evidence Act, but he is incompetent to be a witness. 1932 R. 190=10 R. 511.
4. S. 5 was intended to apply to an accused person while he is under trial and not when he is convicted. 54 C. 52.

Ss. 9 and 11.

1. Ss. 9 and 11 are not intended to apply to criminal proceedings. 58 I. C. 147=21 B. L. R. 898.
2. Special oath only binds the parties and not the Court. If a person takes a social oath and makes a false statement to his knowledge, Court can challenge truth and prosecute him for perjury. 1924 A. 511, 68 I. C. 45.

S. 13.

1. S. 13 cures the form of oath and even an entire omission to take an oath but does not cure the absence of authority in the officer administering the oath. 1929 B. 136=116 I. C. 248=30 Cr. L. J. 593.
2. S. 13 applies equally whether the omission is due to the deliberate act of the Court or to some oversight or negligence on the part of the presiding officer. 1921 P. 109=61 I. C. 705.
3. When the interpreter omits to take oath, it must be proved that the interpretation was made accurately. The omission does not make the deposition inadmissible. 36 C. 808.
4. When the officer is not authorized to administer an oath the statement made to him does not amount to an affidavit. 8 I. C. 897.

S. 14.

1. Evidence of a child witness cannot be brushed aside as inadmissible merely because no oath is administered to her. 1923 L. 332=76 I. C. 1037=21 Cr. L. J. 317.
2. The word "omission" to take an oath under S. 13 includes only an accidental and not a deliberate omission to take an oath. 36 I. C. 463, 43 I. C. 86.
3. Omission to administer an oath even if intentional would be cured by S. 13. 58 I. C. 817, 41 C. 406.

The *obiter dicta* in previous order of the High Court Judge is not binding. 4 P. R. 1919 Cr., 4 P. R. 1919, 4 P. R. 1509, 10 B. 176 and 54 C. 42 Dist.

OBJECTIONS BY COUNSEL.

1. Duty to record.

1. If a Judge disallows a question, the Pleader should have the question and order disallowing it recorded, as such a refusal on the part of Judge is illegal. 36 I. C. 463=17 Cr. L. J. 500, 55 I. C. 593=21 Cr. L. J. 321.
2. Some latitude should be allowed to a member of Bar, insisting in the conduct of his case upon his question being taken down or his objections noted where the Court thinks the question inadmissible or the questions untenable. There ought to be a spirit of give and take between Bench and Bar in such matters and every little persistence on the part of a Pleader should not be turned into the occasion of a criminal trial unless the Pleader's conduct is so clearly vexatious as to lead to the inference that his intention is to insult or interrupt the Court. 6 Bom. L. R. 541 (543)=1 Cr. L. J. 612

2. Omission to object. See Consent.

1. An erroneous omission to object to the admission of irrelevant testimony does not make it available as ground of judgment. 19 A. 76, 39 M. 160, 30 B. 109, 1921 P. 61.
2. A ground of waiver cannot prevail in a criminal trial. 10 Bom. H. C. R. 497.
3. A prisoner can consent to nothing. It is the duty of the Judge to see that accused is condemned on legal evidence. 9 Bom. H. C. R. 353, 2 C. 23, 6 C. 83, 6 C. 95 (97), 20 C. 851, 123 I. C. 209=32 Cr. L. J. 91.

2. Charge.

1. A charge under S. 292 should be made specific in regard to the representations alleged to have been exhibited. 1 C. 356, 1 L. B. R. 262.

3. Destruction of—.

On a conviction under Ss. 292-293, I. P. C., the Court can order the destruction of all copies of the thing in respect of which the conviction was had. See S. 521, Cr. P. C.

4. Essentials and Evidence.

1. The test of obscenity is whether the language complained of would corrupt those whose minds are open to immoral influences. The form of expression and not the actual meaning is important. 19 I. C. 504=15 Bom. L. R. 307=14 Cr. L. J. 248, 20 B. 193, 32 C. 247, 37 I. C. 521, 1932 C. 651.
2. There should be no printing of descriptions exciting sensuality but descriptions of diseases with appropriate remedies therefor intended only for doctors and patients are not criminal. 25 P. R. 1917 Cr.
3. The literary eminence of the author of the book containing obscene matter does not justify the offence under S. 292. A publication describing illicit love for another man's wife and selling at a low price, leaves no doubt about the obscene nature in law, inspite of the person's intention being only to publish classical work. 37 I. C. 521=18 Cr. L. J. 153.
4. Pamphlet containing vulgar abuses and ridiculing the head priest and his followers if obscene falls under S. 292. 22 Bom. L. R. 166=62 I. C. 401.

6. An allowance must be made for the primitive directness of expression, which though coarse is not obscene. 19 I. C. 504=15 Bom. L. R. 307.
7. Whether the book is a scientific treatise or only an obscene book in the guise of science, the scope and object of the work must be looked at. 28 A. 100.
8. The intention of the writer is immaterial. 28 A. 100, 37 I. C. 521, 3 A. 837, 20 B. 193, 15 Bom. L. R. 307, 32 C. 247, 25 P. R. 1917 Cr.
9. The question whether a picture or print is obscene or not is one of fact and not law. 20 B. 193.
10. Motive is immaterial if the book is obscene. Motive can mitigate the offence. 1932 C. 651=36 C. W. N. 985, 28 A. 100 Rel. on.

5. Liability of proprietor and printer.

The printer or the proprietor of an obscene print is not guilty if the management of the printing was in the hands of the agent, unless there is evidence that the work was executed with authority, knowledge or consent. 18 P. R. 1889 Cr., 35 P. R. 1905 Cr., 10 A. W. N. 175.

Obscene Books, Paintings, etc.—(concl'd.)

6. Religious books containing obscene matter.

1. The publisher of a religious book described the acts prohibited during the fast of Ramzan, including sexual intercourse of various kinds, which were set out in indecent details. He was held guilty under S. 292. 5 P. R. 1917 Cr.=34 I. C. 473.
2. A religious book is not obscene, though it may contain passage of doubtful decency. 39 C. 377.
3. Accused wrote a book denouncing the religion of Islam as a reply to certain attacks on the practices of Hinduism. It was not immoral but was held to be immoral and the accused was found guilty. 3 A. 837, 28 A. 100.

OMISSION TO APPREHEND ACCUSED. Ss. 221-222—225-A. I. P. C.

1. The duties of a chawkidar as private citizen ought not to be confounded with his duties as a public servant. When the legal obligation of chawkidar to arrest or detention has not been established, he is not guilty for intentionally suffering a pilferer to escape from his detention. 1929 A. 935=120 I. C. 205=31 Cr. L. J. 12.
2. If accused intentionally aids a prisoner to escape, he is guilty under S. 222 even though the attempt is frustrated. 1929 L. 631=30 Cr. L. J. 1103=119 I. C. 762.

2. An omission by an owner of a house to give information of a sudden or unnatural death is not an offence. (1887) 1 Weir 101.

1. The accused must plead guilty or not guilty by his own mouth and not through his counsel. 15 W. R. 42, 6 Bom. L. R. 861.

2. Admission by a Pleader, especially by a Pleader engaged by the Court for the accused and not by the accused himself, is not binding on him. 2 Bom. L. R. 751.

B. Conviction on—

1. After an accused has claimed to be tried, any confessional statement made by him should be laid before the Jury. Such an admission should not be taken as a plea of guilty upon which a Judge may record a finding, without taking the verdict of Jury. 7 Bom. L. R. 731.

2. It is left entirely to the discretion of the Judge in each case whether in spite of the plea it is or it is not desirable to enter upon the evidence. 115 I. C. 582=1928 C. 775=30 Cr. L. J. 508.

3. Under S. 271 (2) all that is incumbent on the Judge is to record the plea. It is not obligatory on him to convict him thereon. 93 I. C. 241.

4. Sentence passed on plea of guilty is not illegal. 73 I. C. 266.

5. The word 'thereon' shows that the conviction must be upon the plea recorded before the Sessions Judge and not on a confession made before the Committing Magistrate. 2 N. W. P. H. C. R. 479.

6. Some corroborative evidence is necessary to warrant a Court of Sessions in acting upon the confession made before the Committing Magistrate, which is retracted at the trial. 23 B. 316, 1898 A. W. N. 22.

7. If the Judge does not think fit to convict accused on his plea of guilty, he should proceed to try him as if the plea has been one of 'not guilty' and take all evidence. 23 M. 151, 13 W. R. 55.

8. After a plea of guilty, a trial may be continued when it is thought necessary to ascertain the part taken by the accused in order to assess the punishment but it is unfair to defer the conviction of the accused solely for the purpose of using his confession against his co-accused. 30 A. 540, 23 A. 53.

9. Under S. 271 it is open to the Court to accept or reject a plea of guilty. 13 C. W. N. 552.

Plea of Guilty—(contd.)

10. If the prisoner pleads guilty to the offence of murder, he cannot be convicted for culpable homicide only. 3 S. L. R. 58, 2 Weir 335.
11. Independent evidence should be taken by Court notwithstanding accused's plea of guilty. 83 I. C. 881=26 Cr. L. J. 177.
12. In a case where the natural consequence would be a sentence of death, the trial should not end with the plea of guilty and evidence should be taken as if there had been a plea of 'not guilty.' 1928 C. 775=115 I. C. 582, 19 A. 119, 8 Bom. L. R. 240, 19 Bom. L. R. 356.
13. In case of qualified plea of guilty, evidence should be taken. 19 A. 119.

C. Duty of Judge.

D. Record of.

1. If the accused pleads guilty the plea should be recorded, where no such plea appears on the record, the conviction must be set aside. 7 C. 96, 5 A. L. J. 157.
2. It is incumbent on the Magistrate to record the plea of guilty. 93 I. C. 241.
3. If the statement of the accused is in a foreign language, it is not necessary that the plea must be recorded in the words of that language. It should be recorded in the language in which it is conveyed to the Court by the interpreter. 5 C. 826.

E. Refusal to plead—

1. The accused can plead 'guilty' under S. 271 or he can claim to be tried under S. 272 or he can refuse to plead which is taken to be the same as claiming to be tried. 41 C. 1072.
2. If the accused pleads guilty the Magistrate should consider whether the accused understands the charge. 1935 R. 49=12 R. 616=36 Cr. L. J. 336=153 I. C. 390.

F. What is sufficient or not—

1. The accused must distinctly and unequivocally admit the guilt, otherwise it is not sufficient. Where the accused made a long rambling statement more or less admitting the guilt, it would be better if the Judge records a formal plea of "not guilty" and proceeds to try him. 5 A. L. J. 157.
2. Where the accused admitted the guilt but said that he had committed the offence under the influence of certain persons mentioned, it was held that it was not a plea of guilty. 1886 A. W. N. 66.

4. Where the prisoner said that he beat his wife but he did not say whether he had any intention of causing such bodily injury as was likely to cause death, it was held, that it was not a plea of guilty. 8 Bom. L. R. 240, 2 Weir 336.
5. An accused person does not plead to a section of criminal statute, but to the facts alleged to disclose an offence under that section. 7 L. 359.
6. If no offence is proved, accused cannot be convicted on plea of guilty. 55 A. 857.

5. In summons case. S. 243, I. P. C.

1. Where an accused pleads guilty and shows no sufficient cause why he should not be convicted, he can be convicted. 27 I. C. 910, 29 Cr. L. J. 893=111 I. C. 573, 46 A. 41, 50 A. 559, 1928 O. 402, 60 C. 351.
2. Independent evidence should be taken notwithstanding accused's plea of guilty. 63 I. C. 881, 1931 B. 195.
3. The admission of the accused should be recorded as nearly as possible in the words used by the accused, because the right of appeal depends upon whether he pleaded guilty or not. 1889 A. W. N. 81, 5 Bom. L. R. 999.
4. The admission of the accused should be recorded at once, and not afterwards from the rough notes nor from the Magistrate's memory. 15 M. 83.

L. J. 1239, 13 C. W. N. 552.
2. If a person pleads guilty, the Judge may either convict him and may be called as witness or put him on his trial. 40 I. C. 742, 58 C. 1214, 1935 C. 580.
3. If the Court accepts the plea of guilty and convicts the accused, his trial is at an end and he may be called as witness against or for any person who has been accused along with him. 23 M. 151.
4. Where in a joint trial of several accused, one of them pleads guilty, his statement cannot be taken against the co-accused, as he ceases to be jointly tried, because his trial ends with his plea. 22 M. 491, 4 C. 483, 22 A. 445, 7 A. 160, 7 M. 102, 15 B. 66, 15 P. R. 1911 Cr., 38 M. 302.

1. Aconite.

1. *Fatal dose.*—Of the root sixty grains have proved fatal; but it is probable that this is much in excess of the minimum fatal dose. Of the pharmacopoeial tincture two or three drachms might probably be fatal. *Taylor's Med. Jur.*, 1928, Vol. II, P. 715

2. *Duration.*—Death usually ensues within a few hours, but may be delayed. *Ibid*, P. 716.

3. *Symptoms.*—In from three to five minutes after chewing the root of aconite, or after contact of any of its preparations with the tongue, a hot, burning, astringent sensation is experienced on the tongue, extending to the fauces and to the lips, especially the lower. The sensation soon becomes very severe. The patient feels cold, especially in the extremities and the skin is cold, clammy and perspiring. The patient is restless and there may be twitching of the muscles, and great muscular weakness is complained of. Respiration is slow and laboured, the pulse slow and irregular. *Ibid*, P. 716. *Criminal Investigation by Dr. Hans Gross*, 1934, P. 444.

4. *Test of.*—The only test available is by taste. *Criminal Investigation by Dr. Hans Gross*, 1934, P. 444.

2. Arsenic. See Hurt by Poison—1, Murder—23—35

1. *Fatal dose.*—The fatal dose in an adult may be assigned at from two to three grains. *Taylor's Med. Jur.* 1928, Vol. II, P. 492.

2. *Duration.*—The average time at which death takes place is twenty four hours, but the poison may destroy life within a much shorter period. There are many authentic cases reported in which death has occurred in from three to six hours. *Ibid*, P. 493.

3. *Symptoms.*—In an acute case of arsenical poisoning by the mouth the individual usually first experiences faintness, depression, nausea, and sickness, with an intense burning pain in the region of the stomach, increased by pressure. The pain in the abdomen becomes more and more severe; and there is violent vomiting of brown turbid matter, mixed with mucus and sometimes streaked with blood. These symptoms are followed by purging which is more or less violent. The colour of the vomited matters may be blue or black when coloured arsenic has been taken, or

It may be injurious to man owing to added preservative. *Taylor's Med. Jur.*, 1928, Vol. II, P. 884.

9. Hydrochloric Acid

1. *Fatal dose*.—Remarks similar to those made on nitric acid may be used for hydrochloric. The smallest quantity of hydrochloric acid which has as yet been known to prove fatal was a teaspoonful in the case of a girl fifteen years of age. *Taylor's Med. Jur.*, 1928, Vol. II, P. 382.
2. *Duration*.—These are similar to those of nitric acid. *Ibid*

10. Mercury.

1. *Fatal dose*.—The difference between the amount of calomel and of corrosive sublimate that can be given without a likelihood of any unpleasant symptoms is very extraordinary; three grains of the latter would almost inevitably entail death if not vomited, whereas three grains of the former is but a very ordinary medicinal dose. The smallest doses of corrosive sublimate which have destroyed life are two and three grains respectively. Of nitrate of mercury a drachm has proved fatal, probably more due to the nitric acid than to mercury. Of the cyanide twenty grains have proved fatal. *Taylor's Med. Jur.*, 1928, Vol. II, pp. 442-443.
2. *Duration*.—The symptoms in acute cases come on within a very few minutes. They are rarely, if ever, delayed more than ten minutes, thus contrasting rather markedly with arsenic. In an acute case, a person commonly dies in from one to five days; but death may take place much sooner or later than this. *Ibid*, P. 443.
3. *Symptoms*.—In the acute cases the particular salt swallowed seems to have no particular relation to the symptoms produced. In the first place there is perceived a strong metallic taste in the mouth, often described as a coppery taste; and there is during the act of swallowing a sense of constriction almost amounting to suffocation, with burning in the throat, extending downwards to the stomach. In a few minutes violent pain is felt in the abdomen, especially in the region of the stomach, and increased by pressure. The tongue is white and shrivelled—the skin cold and clammy, the respiration difficult; and death is commonly preceded by fainting, convulsions, or general insensibility. *Ibid*, P. 444.

11. Nicotine.

Symptoms of.—Nicotine is recognised by the well-known odour of tobacco juice. The general symptoms of nicotine poisoning resemble those of *Dhatūra*. *Criminal Investigation by Dr. Hans Gross*, 1934, P. 445.

12. Nitric Acid.

1. *Fatal dose*.—The smallest quantity of this acid which we find reported to have destroyed life is about two drachms. *Taylor's Med. Jur.*, 1928, Vol. II, P. 375.
2. *Duration*.—Death commonly takes place in from eighteen to twenty-four hours, and is sometimes preceded by a kind of stupor, from which the patient is easily roused. *Ibid*, P. 376.
3. *Symptoms*.—There are gaseous eructations from the chemical action of the poison, swelling of the abdomen, violent vomiting of liquid or solid matters, mixed with

Poison—(contd.)

the admixture of bile may render them of a deep green. The pulse is small, frequent, and irregular, sometimes wholly imperceptible. This is almost constant and is probably due to the direct action of the poison on the heart muscle. The skin is cold and clammy in the stage of collapse, at other times it is hot. The respiration is painful from the tender state of the stomach. There is great restlessness, but before death stupor may supervene, with paralysis, tetanic convulsions, or spasms in the muscles of the extremities. *Ibid*, P. 495. See *Criminal Investigation* by Dr. Hans Gross, 1934, P. 442.

4. *Use of*.—Arsenic is largely used as an antidote to fevers of all kinds, as an aphrodisiac in cases of rheumatism, gout, and syphilis, and externally for skin diseases such as itch and eczema. It is also employed for many industrial purposes, as curing skins and gold-working ; and preserving roofs, floors, and walls of buildings from the ravages of vermin and particularly white ants. *Criminal Investigation* by Dr. Hans Gross, 1934, P. 442. *Taylor's Med. Jur.*, 1928, Vol. II, P. 923.

3. Atropine.

Symptoms of.—Atropine and all the forms of belladonna strongly dilate the pupil of the eye ; sometimes this dilation is so great that the membrane of the iris is reduced to a very narrow circular ring ; besides, the person poisoned will complain of this dilation which produces a very disagreeable effect on the eyes. *Criminal Investigation* by Hans Gross, 1934, pp. 444-445.

4. Carbolic acid or phenol.

1. *Symptoms of*.—The odour of phenol is known all over the world and is very readily recognised. *Criminal Investigation* by Dr. Hans Gross, 1934, P. 444.
2. *Use of*.—Carbolic acid or phenol, a commonly used disinfectant of the present day, is a very ready instrument of poisoning. *Ibid*.

5. Castor Oil.

1. *Fatal dose*.—The smallest exactly recorded fatal dose of the seeds is two. *Taylor's Med. Jur.*, 1928, Vol. II, P. 843. The oil itself can hardly be said to have any toxic properties. *Ibid*.
2. *Duration*.—In the recorded fatal cases death has followed only after a few days' interval. In the fatal case from two seeds (above) the patient, a dock labourer, succumbed on the sixth day. *Ibid*, P. 844.
3. *Symptoms*.—At the time of eating the seeds there is an absence of any disagreeable taste or sense of heat in the mouth and throat. Soon after the pulp has been swallowed there is severe pain in the abdomen, copious and painful vomiting with bloody purging, thirst and convulsions, terminated by death. *Ibid*, P. 844.

6. Cocaine.

1. *Fatal dose*.—About two-thirds of a grain seems to be the smallest recorded dose which has caused death. *Taylor's Med. Jur.*, 1928, Vol. II, P. 785.
2. *Duration*.—Local anaesthesia is produced in a few minutes by cocaine solutions, and a similar period usually elapses before ill effects are produced by toxic doses in acute cases. As in the case of morphia, danger is not over for many hours after a large dose, in one unaccustomed to the drug. *Ibid*, P. 786.
3. *Symptoms*.—Deafness ; loss of taste and smell ; profuse perspiration ; intermittent pulse ; shallow, irregular, gasping convulsive breathing ; impairment of gait and speech ; muscular rigidity ; convulsive twitchings and paralysis are none of them rare in the cases taken as a whole. *Ibid*, P. 787.

7. Dhatura. See Hurt by Poison—2.

1. *Symptoms of*.—The most distinctive external symptoms of *dhatura* poisoning are giddiness, followed by drowsiness and muttering delirium, picking at imaginary objects, sometimes wild and excited behaviour, but always wide dilation of the pupils of the eye, while internally the brain is congested, and so also frequently are the lining of the mucous membrane of the stomach and intestines. *Criminal Investigation* by Dr. Hans Gross, 1934, P. 413.
2. *Use of*.—*Dhatura*, the poison of the *thugs*, is still used mainly to facilitate robbery, and that chiefly in the Western districts of India, where traditions, even memories

Poison—(contd.)

4. *Use of.*—The phosphorus for poisoning is obtained from the ends of matches, and the phosphorus from sixteen matches has been found sufficient to poison an adult. *Criminal Investigation by Dr. Hans Gross, 1934, P. 412.*

15. Prussic acid

- Symptoms of.*—Prussic acid and all its combinations are recognised by the strong odour of bitter almonds. This odour can sometimes be distinctly felt in the room in which the corpse is found. *Criminal Investigation by Dr. Hans Gross, 1934, P. 414.*

16. Santonine.

1. *Symptoms of.*—In poisoning by santonine, the urine is yellowish green. *Criminal Investigation by Dr. Hans Gross, 1934, P. 415.*
2. *Use of.*—Santonine is commonly used for extirpating worms, and as infants are extremely sensitive to this medicament, its absorption is at times followed by sudden death. *Ibid.*

17. Strychnine.

1. *Fatal dose.*—The thirtieth of a grain is an average dose. This quantity has operated as a poison on a child. It caused the death of a child between two and three years of age in four hours. *Taylor's Med. Jur., 1928, Vol. II, P. 854.* (b) A fatal dose of strychnine for an adult may be assigned at from half a grain to two grains. *Ibid.*
2. *Duration.*—In fatal cases death generally takes place within two hours after the swallowing of the strychnine. *Ibid, P. 856*
3. *Symptoms.*—(a) The patient experiences a sense of uneasiness and restlessness, accompanied by a feeling of suffocation, and not infrequently by a sense of impending calamity or death. There is shuddering or a trembling of the whole frame, with twitchings and jerkings of the head and limbs. Tetanic convulsions then commence suddenly with great violence and nearly all the muscles of the body are simultaneously affected. The limbs are stretched out involuntarily, the hands are clenched, the head after some convulsive jerkings is bent backwards, and the whole of the body becomes as stiff as a board. *Ibid, P. 857.* (b) Strychnine causes death by convulsions and immediately renders the corpse rigid—a rigidity which sometimes remains for weeks. *Criminal Investigation by Dr. Hans Gross, 1934, P. 443.*

18. Sulphuric Acid.

1. *Fatal dose.*—The smallest fatal dose is one drachm, it was taken by mistake by a stout young man, and it killed him in seven days. *Taylor's Med. Jur., 1928, P. 368, Vol. II.*
2. *Duration.*—The average period at which death takes place in cases of acute poisoning by sulphuric acid is from eighteen to twenty-four hours. When the stomach is perforated by the acid, it commonly proves more speedily fatal. *Ibid.*
3. *Symptoms.*—There is violent burning pain, extending down the throat and gullet to the stomach, and the pain is often so severe that the body is bent. There is an escape of gaseous and frothy matter, followed by retching and vomiting. There is great difficulty in breathing, owing to the swelling and excoriation of the throat and larynx, and the countenance has, from this cause, a bluish or livid appearance; the least motion of the abdominal muscles is attended with increase of pain. Vomiting may cease from the collapse for many hours before death actually takes place; there is generally great thirst, with obstinate constipation, and should any evacuations take place they are commonly either of a dark brown or leaden colour, in some instances almost black, arising from an admixture of altered blood. *Ibid, P. 370*

19. Tobaeo.

1. *Fatal dose.*—While tobacco in the mass cannot be called very poisonous, the alkaloid nicotine is a deadly poison, and like prussic acid, it destroys life in small doses with great rapidity. *Taylor's Med. Jur. 1928, Vol. II, P. 810.*
2. *Duration.*—A rabbit was killed by a single drop in three minutes and a half, in fifteen seconds the animal lost all power of standing, was violently convulsed in its fore and hind legs, and its back was arched convulsively. *Ibid.*

Poison—(contd.)

altered blood of a dark brown colour, and shreds of yellowish-coloured mucus, having a strongly acid reaction. The mucous membrane of the mouth is commonly soft and white, after a time becoming yellow, and the enamel is partially destroyed by the chemical action of the acid. *Ibid*, P. 377.

13. Opium.

1. *Fatal dose*.—The medicinal dose of opium for a healthy adult is from half a grain to two grains. Five grains would be fatal dose in most persons. The medicinal dose of tincture is from five to fifteen minims. The smallest dose of solid opium which has been known to prove fatal to an adult was in the case of a man aged 32, who died very speedily in a convulsive fit, after having taken two pills each containing about one grain and a quarter of extract of opium. The fatal dose of morphine: several cases are known in which a dose of one grain of hydrochloride of morphine has proved fatal to adults. *Taylor's Med. Jur.*, 1928, Vol. II, pp. 818-819.
2. *Duration*.—(a) The symptoms usually commence in from half an hour to an hour after the poison has been swallowed. Sometimes they come on in a few minutes especially in children, and at other times their appearance is protracted for a long period. *Ibid*, P. 820. (b) There are several instances of death in fifteen or seventeen hours. *Ibid*, P. 821.
3. *Symptoms*.—(a) A condition of pleasurable mental excitement, usually of very short duration, is experienced. The period of excitement is followed by weariness, headache, incapacity for exertion, a sense of weight in the limbs, diminution of sensibility, giddiness, drowsiness, a strong tendency to sleep and stupor succeeded by perfect insensibility, the person lying motionless, with the eyes closed as if in sound sleep. *Ibid*, P. 821. (b) The pulse is at first small, quick and irregular, the respiration hurried, the skin warm and bathed in perspiration sometimes livid; but when the person becomes comatose, the breathing is slow and stertorous, and the pulse slow and full. *Ibid*, P. 822. (c) The contracted state of the pupils has been considered to furnish a valuable distinctive sign of poisoning by opium or the salts of morphine. *Ibid*. (d) There were no symptoms of poisoning by strychnine at any time, although three hours had elapsed before remedies could be applied. Vomiting is an occasional symptom which may come on soon after the poison has been taken; so also may itching of the skin with a rash. *Ibid*, P. 824.
4. *Symptoms in case of drug addiction*.—If the habit is not of long standing the withdrawal symptoms are mild and consist of uneasiness, depression, weakness and irritability. If the habit is of long standing they may be very severe symptoms if the drug is taken in large quantities. Yawning, sneezing and coryza, dilatation of the pupils, violent pains and cramps in the abdomen and legs. There may be irritability and excitability which may progress to a condition of mania. There may be severe collapse with weak and irregular pulse and death may occur from cardiac failure. Injection of morphine causes an immediate arrest of the symptoms. *Ibid*, pp. 833-834.

14. Phosphorus.

1. *Fatal dose*.—In one case death was caused by a grain and a half in twelve days; in the other, by two grains in about eight days. One to two grains is a fatal dose. *Taylor's Med. Jur.*, 1928, Vol. II, P. 589.
2. *Duration*.—Symptoms are commonly delayed from a quarter of an hour to some three or four hours, and the total duration varies greatly, from a few hours to two weeks or more. In a case related by Orfila death took place in four hours. In a case that ends fatally within a few hours the result is due in all probability to shock. *Ibid*, pp. 590-91.
3. *Symptoms of*.—(i) In poisoning by phosphorus there is pain in the stomach, vomiting, feeble pulse and collapse; in chronic cases there may be a yellowing of the skin, and slight bleeding from nose, mouth, and bowels. *Criminal Investigation by Dr. Hans Gross*, 1934, P. 442. (ii) In the first instance the patient experiences a disagreeable taste, resembling that of garlic, peculiar to this poison. An alliaceous or garlic-like odour may also be perceived in the breath. There is pain and oppression in the region of the stomach, malaise, crutation of phosphoric vapour, having a garlicky odour; and these may be luminous in the dark. Vomiting is sometimes frequent and violent. *Taylor's Med. Jur.*, 1928, Vol. II, P. 591.

After death, the arteries contract, and by their contraction empty the blood in them into the capillaries and veins, provided it has not co-agulated too soon; the heart having ceased to beat, the blood remains in the veins in a stagnant condition, and probably still uncoagulated. In these circumstances if a vein has been wounded before death or even if it be opened after death it may bleed freely and *post-mortem* give rise to suspicion that the wound was produced before death. *Taylor's Med. Jur.*, 1928, P. 222.

7. Coagulation.

- (a) When a body is examined eight or ten hours after death, it is not unusual to find the blood which may have flowed from it as a liquid forming a firm clot; and that which is effused into the chest during the examination often form after sometime a firm coagulum. *Taylor's Med. Jur.*, 1928, P. 221. (b) Blood effused into the tissues or cavities of the body clots fairly rapidly. *Ibid.* (c) Blood coagulates in most cases after death, but at a variable time after the cessation of the heart's action. *Ibid.* (d) When blood is removed from the living body, coagulation commences in from five to ten minutes or less. (e) In the dead body, it does not commence until the blood begins to die and cool. *Ibid.* (f) Certain diseases, such as Pneumonia, influence the rapidity of coagulation of the blood; and in rapid deaths from vegetable and animal poisons, and in asphyxia (drowning, suffocation, hanging, strangulation), the blood remains fluid and of darker colour than normal. *Ibid.*

PROCURATION OF MINOR GIRL. S. 366-A., I. P. C.

1. Essentials and Evidence.

1. The aim of S. 366-A. is to prevent immorality. Often it may happen that a girl under 18 years of age may desire to leave her husband to better her prospects elsewhere. Such a desire would not save her helper from a conviction under S. 366-A. 119 I. C. 14=1929 A. 709 (2)=30 Cr. L. J. 985.
2. Where the accused offers the girl to several persons a fresh offence is not committed on every fresh offer. 1929 A. 585=30 Cr. L. J. 904, 1932 L. 555.
3. Any reason given by accused to move the girl from one place to another is sufficient for inducement. The girl's subsequent willingness will neither prevent the offence nor reduce its gravity. 30 Cr. L. J. 904.
4. A girl under eighteen years was taken by accused from place to place with the intention of compelling her to marry or that she may be forced or seduced to illicit intercourse. There was no evidence that the girl was compelled to accompany the accused by force or deceitful means. It was held that accused was guilty under S. 366-A and not S. 366, I. P. C. 26 Cr. L. J. 1151.
5. Merely giving shelter to a girl or taking her from one place to another without any intention or knowledge that she is likely to be forced or seduced to illicit intercourse with another person is no offence under S. 366-A. 28 P. L. R. 260.
6. A person committing illicit intercourse with a girl will not be permitted to plead that he believed the girl to be over 18 years of age. 1932 L. 555.
7. It is not necessary that girl should be a married one. 1932 L. 555.
8. Accused inducing girl between 16 or 18 years without force or fraud to go from any place with intent to have illicit intercourse with her is not guilty of any offence. 1933 C. 362=34 Cr. L. J. 341.
9. Offence under S. 366-A is a continuing offence. 1936 L. 850, 53 A. 140=1931 A. 55 Rel. on. 50 C. 1004, 54 P. L. R. 1916, 1927 L. 370 Ref. 1932 L. 555=33 Cr. L. J. 673 Not foll.

2. Jurisdiction.

An offence under S. 366-A is a continuing offence. Where the offence and abetment is committed at different places, the accused may be jointly tried in the place where the offence was first committed. 53 A. 140.

PROMOTING ENMITY BETWEEN CLASSES. S. 153-A, I. P. C.**1. Classes.**

1. Classes include races such as Indians and Europeans. 10 P. R. 1907 Cr.
2. The first ingredient in the connotation of the term classes is that the words used must point to a well-defined and readily ascertained group of His Majesty's subjects. Secondly some element of permanence or stability in the group should be present. Thirdly, the group should be sufficiently numerous and widespread to be designated a "class." 1933 B. 65=57 B. 253.
3. Word "capitalist" does not denote definite class within the meaning of S. 153-A. 57 B. 253=1933 B. 65, 1936 A. 561, 1923 L. 61=3 L. 405, 1933 C. 139.

2. Essentials and Evidence.

1. Mere disseminating matter is not sufficient. Intention to promote feelings of enmity is necessary. 54 C. 59=27 Cr. L. J. 1154=1926 C. 1133.
2. Criticism of ill-defined group cannot lead to breach of tranquility. 57 B. 253.
3. Court must look at the whole speech. 57 B. 253.
4. Where every calamity and suffering of people is attributed to Government, Zamindar and Taluqdar who are accused of indifference to the welfare of the people, accused was held guilty under S. 153-A. 1935 O. 347=36 Cr. L. J. 511.
5. Criticism of British Imperialism but no promotion of class hatred, does not fall under S. 153-A. 1933 C. 139=34 Cr. L. J. 305.
6. The offending act consists not in spreading "opinion, ideas and education" but in endeavouring to put such opinions into practice. 1936 A. 561, 1933 A. 692=34 Cr. L. J. 967=1933 A. L. J. 799.
7. "At the time, the person for whom the words were written between two communities should be considered. 59=1926 C. 1133, 47 A. 298=1925 A. 195, 49 A. 856=1927 A. 649 and 1927 L. 594 Rel. on.
8. Article can be both seditious and provocative of class enmity. 1925 S. 59.

3. Intention.

1. There must be intention to promote enmity. 10 P. R. 1907 Cr., 1927 L. 594, 10 Bom. L. R. 848, 47 C. 190. 54 C. 59.
2. Hatred need not be reciprocal. 1927 L. 594.
3. Intention will be presumed from the language and conduct of accused, who must rebut presumption. 1925 L. 16.

PROOF OF DOCUMENT FILED BY ACCUSED.

Accused has right to file document to which he was a party and the Court must consider it although they have not been proved in the regular way. 1928 M. 1135=29 Cr. L. J. 1041.

PROOF OF FACT. S. 3, Evidence Act.**1. General.**

1. Proof of fact includes when a person thinks it so extremely probable that a prudent man would, under the circumstances, act on the assumption of its existence. 1933 O. 340=34 Cr. L. J. 538, 1924 N. 335=79 I. C. 609.
2. Absolute certainty in this work-a-day world is seldom to be had in the affairs of life and we are frequently obliged to act on degrees of probability which fall very short of it. 1933 O. 340=34 Cr. L. J. 538, 1922 C. 260=66 I. C. 782.
3. The standard of certainty required is that of a prudent man acting in grave and important concern of his own. *Will's Cir. Ev., 6th Ed., pp. 318-319.* 1933 O. 340, 56 M. 231, 4 Cr. L. J. 382.
4. Except where artificial probative value is assigned to a certain fact by presumption, and the Evidence Act affords no guidance, the Judge like a prudent man has to use his own judgment and experience and cannot be bound by any rule except his judicial discretion. 40 C. 898, 1924 N. 385=79 I. C. 609.

Proof of Fact—(conclid.)

5. What circumstances will constitute proof can never be the subject of general definition. 1924 N. 385=79 I. C. 609.

2. Evidence and—.

1. Proof is merely the *effect* of evidence. *Woodroffe Ev., 9th Ed., P. 116.*
2. When the result of evidence is assent to the proposition or event which is the subject matter of inquiry, such proposition or event is said to be proved. *Will's Circumstantial Ev., 6th Ed., P. 3.*
3. The Court is bound to base its decisions, not merely on evidence but on matters before it referred to in S. 3. 1924 N. 385=79 I. C. 609.
4. The definition of 'evidence' must be read with that of "proved" given in S. 3, Evidence Act. 1924 N. 385.

3. In criminal cases.

1. In civil cases what is required or considered sufficient is preponderance of probability, while in criminal cases the persuasion of guilt must amount to such a *moral certainty* as convinces the minds of tribunals as reasonable men, beyond all reasonable doubt. 1924 N. 385 (386)=79 I. C. 609. 4 Cr. L. J. 382.
2. Where there is no such *moral certainty*, the benefit of doubt must be given to the accused. 22 C. 313 (323).
3. It is better that ten guilty men should escape than that one innocent man should suffer. 2 Hab. P. C. 289.
4. However morally convinced a Judge may feel as to the truth of a particular fact, unless there is legal proof of its existence, he cannot take it as proved. 37 C. 467, 25 W. R. Cr. 43.
5. Conjectures cannot take the place of proof. 22 C. 313, 35 C. 1039.
6. Suspicion, however, grave is insufficient for conviction. 10 C. W. N. 219, 44 C. 662, 1931 L. 529=32 Cr. L. J. 1032.

PROOF OF INNOCENCE. *See alibi, Benefit of doubt, etc.*

1. Anything which tends to explain the accused's conduct and furnishes a motive other than guilty conscience is relevant under S. 9, Ev. Act. 62 I. C. 545=22 Cr. L. J. 52.
2. Omission to make protestation of innocence when accused of an offence or when subjected to severe treatment is relevant as conduct under S. 8 Ev. Act. 22 C. 391.
3. Accused can lead evidence that at the very time he was accused he gave an explanation of his innocence. 1935 S. 145 (165)=1935 Cr. C. 753.
4. If the accused goes to the spot after the occurrence and accompanies the dead body to the Morgue, his conduct is that of an innocent man, unless it is shown that he had no alternative but to accompany it. 1935 C. 391 (594)=36 Cr. L. J. 1254.

3. Private Vakil can be permitted to conduct prosecution. 12 M. L. J. 354.
4. It is highly irregular to allow an investigating Police Officer to conduct the case. If the accused is not prejudiced the trial will not be vitiated. 26 B. 533.

5. A person, whether a private complainant or not, when he is permitted to conduct prosecution, may instruct a counsel to appear. 11 B. H. C. R. 102.
 6. Prosecutor can choose his own counsel save where the Public Prosecutor takes up the case. 1925 S. 99=81 I. C. 59=25 Cr. L. J. 571, 1925 A. 301=86 I. C. 222.

 8. Where the Public Prosecutor desired a counsel privately engaged by the complainant to address the Court, no permission under S. 495 is necessary. 1930 M. W. N. 769.

 10. Conducting prosecution by Police Officer who investigated the case is highly improper. 26 B. 533.

 6. "Purporting to act in discharge of his official duties" implies something in the nature of an official character attached to the act itself. The act must have been done under the cloak of what purported to be an official act. Public Gambling Act (III of 1867)—(contd.)

7. The presumption raised by the Act is not as strong when the gambling takes place openly on the Dewali occasion as when it takes place at other times in a private house. 1922 O. 224=71 I. C. 62=24 Cr. L. J. 14.
 8. It must be established that the owner or occupier takes a fixed commission. Although the odds 50 to 1 are scarcely fair they are not such as to make the owner's loss impossible. Discount from winners is not commission. 1923 A. 192=76 I. C. 969=45 A. 258.
 9. The law does not contemplate the confiscation of money found on the person of the accused convicted under Ss. 3 and 4 of the Act. 41 A. 366.

 12. For keeping a common gambling house the prosecution must prove that the accused is the owner or occupier of the house and that instruments of gambling were kept or used in it for profit or gain. 57 I. C. 810.

 15. Where from the method of business the chance of loss to booth keeper is extremely rare and almost nil, the offence of keeping a common gaming house is complete. 47 A. 405, 46 A. 447.
 16. The mere fact that small sums are set aside for remunerating those who minister to the comfort of the persons assembled, does not show that such payments represent any advantage to the person occupying or keeping the house. 62 I. C. 322=22 Cr. L. J. 498.
 17. 'Cowries' are not instruments of gaming. Finding of cowries does not make the place a gaming house. 3 P. R. 1896 Cr.

 21. If the residents of the locality are addicted to gambling no presumption can be drawn against the accused. 1936 A. 109.
 22. A private room with a paraphernalia of a club and rented by members of only one caste is not *prima facie* a common gaming house. 1935 S. 52=35 Cr. L. J. 865.
 23. A person who is simply caught on one occasion gambling on a public road cannot be said to use the same as a common gaming house, unless he habitually uses that spot. 37 Cr. L. J. 588=1936 N. 78.

3. When at the time of search 'cowaries' were found in the house there is presumption that the house was used as a common gaming house and it can be rebutted if the object of the person was merely to indulge in a common friendly amusement with a view to have pastime, the idea of making any gain being entirely foreign to the mind of entire party. 1925 O. 674=90 I. C. 713=26 Cr. L. J. 1609.
 4. For a conviction under S. 4 it is not necessary that the accused should have been arrested in the gambling house, but prosecution must prove that he was actually seen in the house. The mere fact that the accused was seen going from the direction of gambling house to his own house is insufficient. 1930 L. 314=32 Cr. L. J. 65.

Putrefaction means the destruction of nitrogen-containing substances, brought about by the influence of microbes, with the production of foul-smelling gaseous products. *Taylor's Med. Jur.*, 1928, Vol. I, P. 243.

2. Circumstances influencing the progress of—

- A. *Temperature of the air.* (a) The process is found to go on most rapidly in a temperature varying from 70° to 100° F. (b) It will commence, other circumstances concurring, at any temperature above 50° F. but it appears to be wholly arrested at 32° F. (c) The dead body may thus be preserved for a considerable time in snow, ice, or in frozen soil; but if after removal it is exposed to a temperature between 70° and 100° F, the ordinary putrefactive changes are stated to take place with more than their usual rapidity. (d) At a high temperature, again i.e., about 212° F, putrefaction is arrested. (e) The effect of temperature is strikingly seen in the influence of season. A dead body exposed to air during summer when the thermometer is above 60° or 70° F., may show more putrefactive changes in twenty-

Putrefaction—(contd.)

four hours than a similar body exposed for a week or ten days in winter. *Taylor's Med. Jur.* 1928, Vol. I, P. 252. (f) Putrefaction in open air is generally accomplished in a month. *Ryan's Med. Jur.* 1836, P. 500.

- B Influence of moisture.** (a) Unless the animal substance is at least damp, putrefaction cannot take place. (b) The animal solids, however, commonly contain sufficient water for the establishment of the process. In human body weighing 150 lbs. there are about 100 lbs. of water. (c) The soft organs differ much from each other in regard to the quantity of liquid contained in them, and therefore in the degree in which they are prone to putrefaction. Thus the brain and the eye are in this respect contrasted with the teeth, bones, hair, and nails. The fluids of the eye are rapidly decomposed while the teeth and hair may remain for centuries unchanged. (d) If the organic substance is dried, putrefaction is arrested. *Taylor's Med. Jur.*, Vol. I, P. 253.
- C. Influence of Access of Air.** (a) Air, apart from its temperature, influences decomposition according to whether it is dry or moist, at rest or in motion. Dry air thus retards decomposition by desiccating the tissues exposed to it, and if the dry air be in motion the effect is still more marked. (b) When bodies are hermetically sealed in lead coffins, such anaerobic microbes either do not gain access to the corpse, or soon cease their action, for such corpses are often found very little decomposed even after long periods. *Taylor's Med. Jur.*, 1928, Vol. I, pp. 254-255.
- D. Influence of light.** As microbes work better in the dark, it is possible that light may have some influence by some of its constituent rays, or rather by some rays associated with ordinary sunlight. *Taylor's Med. Jur.*, 1928, Vol. I, P. 255.
- E. Influence of the state of the body.** (a) Fat and flabby bodies are observed to undergo putrefaction more readily than those which are thin and emaciated, probably because they retain heat better and the tissues are more moist. (b) Those parts which at the time of death are affected by wounds or bruising rapidly pass into a state of putrefaction, due to the more ready entry of organisms into the lacerated part. (c) Children are said to decompose more readily than adults, but the bodies of newly born infants who have not been fed resist putrefaction for long periods. (d) The bodies of chronic alcoholics undoubtedly have a tendency to rapid putrefaction, though alcohol, *in vitro*, has slight antiseptic power. *Taylor's Med. Jur.*, 1928, Vol. I, P. 255; *Ryan's Med. Jur.*, 1836, P. 503.
- F. Influence of the Cause of Death.** (a) The bodies of persons who have died from acute diseases have been observed to putrefy more readily than those of persons who have died from wasting and chronic disease. (b) It has been also remarked that the bodies of plethoric persons who have died suddenly while in good health have undergone rapid decomposition. (c) In persons who have died from asphyxia, as by drowning, suffocation, or strangulations, the bodies are observed to putrefy with great rapidity; and, as a general rule, all those parts of the body which at the time of death are irritated, congested, or inflamed, are rapidly attacked by the putrefactive process. (d) In death from prussic acid, morphine, and other vegetable poisons, putrefaction generally commences early, and progresses with rapidity, while strychnine has been supposed to exercise a retarding power. (e) Some poisons, by chemically combining with animal matter appear to confer on it the power of resisting putrefaction at least to a very great degree. This is now a well-known property of arsenic, and this poison is largely employed as an antiseptic. When a solution of it is injected into the arteries of a dead body, it tends to preserve it for a long time from putrefaction. (f) Chloride of zinc, a powerful irritant poison, is another well-known preservative. It retards putrefaction apparently by combining with the tissues. *Taylor's Med. Jur.* 1928, Vol. I, pp. 255-256-257.
- G. Influence of chemical substance.** (a) Unslaked lime, if placed on the body and freely slaked, will develop a considerable amount of heat. This heat is insufficient to cause destruction, but on the contrary, it has a tendency to delay putrefaction and to preserve the body. (b) Slaked lime and chlorinated lime have also been used in an attempt to destroy tissues, but they act as antiseptic substances and thus inhibit the growth of microorganisms and delay destruction of the body. *Taylor's Med. Jur.* 1928, Vol. I, pp. 255-256-257.

Putrefaction—(contd.)

H. Influence of burial in earth. (a) Unless the body has been buried in metal, or converted into adipocere, it is not probable that any of the soft parts will be found, in a soil favourable for decomposition, after ten or twelve years. *Taylor's Med. Jur.*, 1928, Vol. I, P. 260. (b) If the ground is elevated or on an acclivity, it will commonly be dry, and decomposition will be retarded, if a body is buried in a low situation, or in a valley, the soil being generally damp, decomposition will be hastened. (c) A dry and absorbent soil retards putrefaction; and thus bodies buried in the sands of Egypt become often perfectly desiccated, and resist the process for a long series of years. (d) In sand, gravel, or chalks putrefaction goes on more slowly than in other soils. (e) In marl or clay, if air has access, the process takes place more quickly. *Ibid*, P. 261. (f) The deeper the grave the longer putrefaction is retarded. *Ibid* P. 262. (g) Bodies buried in shallow graves are subject to the fluctuations of temperature which take place during the day and night, and throughout the seasons of the year; they are therefore most favourably placed for the rapid progress of putrefaction. (h) According to the most accurate observations, the diurnal changes of temperature extend to about two or less feet in depth below the surface, while the seasonal changes are perceptible to the depth of six feet. Bodies buried below this depth putrefy slowly, owing to the uniform and comparatively low temperature which is maintained there. *Ibid* (i) Putrefaction is more rapid in bodies buried naked than in those which have been hurried wrapped in clothes. *Ibid*, P. 262. (j) The process is less rapid when the body is interred in close coffin; and when the latter is formed of an imperishable material: such as lead closely sealed, putrefaction is speedily arrested; and the deceased may be recognised after the lapse of many years. *Ibid*, P. 262, *Ryan's Med. Jur.*, 1836, P. 506.

3. In water.

(a) The researches on drowning made by Casper and Kanzler show that, while the lower part of the body may be in a tolerably fresh condition, the face, beard, neck, and upper part of the chest may present a reddish colour passing into patches of a bluish green, first seen on the temples, ears, and naps of the neck, thence spreading to the face and afterwards to the throat and chest. These changes may be observed in summer when a body has remained in water from eight to twelve days, and in winter for a longer period. *Taylor's Med. Jur.*, 1928, Vol. I, P. 254. (b) The head of a drowned person is sometimes much discoloured from putrefaction when the rest of the body is in its ordinary condition. (c) Decomposition undoubtedly takes place more slowly than in the atmosphere, owing to the low temperature and to the fact that the free access of air is cut off. *Ibid*, P. 215. (d) Putrefaction in water is not, in general, completed sooner than six weeks. It is more rapid in running than in stagnant water. *Ryan's Med. Jur.*, 1836, P. 501.

4. In air.—See—2 (1).

Putrefaction in the open air is generally accomplished in a month. The conversion of the colouration of the skin into green, commences within first four or five days after death; the epiderm is detached in two days afterwards; the green tint now becomes brown. Air which is very dry and hot, desiccates and mummifies the body, whilst warm and humid air very much hastens its decomposition. Young infants resist putrefaction in the open air much longer than adults. *Ryan's Med. Jur.*, 1836, P. 500.

5. Effect of—on marks of wounds.

1. Putrefaction, unless advanced in the last stage, cannot entirely destroy marks of violence when attended by physical injury to parts such as abrasions or lacerations of the skin, laceration or crushing of the muscles with fracture of the trachea or larynx, protrusion of the tongue, accompanied by marks of indentation or laceration by the teeth. *Taylor's Med. Jur.*, 1928, Vol. I, P. 306.
2. In such cases, a safe medical opinion may be formed in spite of the decomposed state of parts, but it is otherwise with superficial marks unattended with mechanical injury. These are precisely the appearances which occasion mistakes, as they may be really due to post-mortem changes, and not to violence. It is true that life may be destroyed by a slight degree of mechanical pressure, and the injury thus occasioned may be masked or obliterated by putrefaction. If the body is not decomposed, we may act safely; if decomposition has advanced to a great degree,

Putrefaction—(concl'd.)

whether generally or locally, it would be unsafe to base on opinion or superficial discolorations. *Ibid.*

6. Changes of colour of body.

In about 24 hours, often earlier, a green patch appears on the abdominal wall in the right iliac region and spreads to the whole of abdominal wall and then to the face and considerably later to the limbs. At the same time decomposition of the blood causes staining of the walls of the vessels and show through the skin as dark brown steaks. *Lyon's Med. Jur. 1935, P. 123.*

RAILWAY WORKSHOP. See Factories Act.**RAFFLE.** See Lottery.**RAPE.** S. 376, I. P. C.**1. Abetment of—.**

1. If a husband invites and instigates others to ravish his wife, he is guilty of abetment. 2 St. Tr. 40; (418).
2. Where the act of abetment which might be imputed to alleged abettor prior to his presence at the time of rape by the actual perpetrator of the crime, the case does not fall under S. 114. 1932 L. 483=33 Cr. L. J. 564, 42 C. 422, 27 C. 566 Ref.
3. On a charge of rape, a conviction for abetment of rape is valid, without amendment of the charge. 1935 A. 935. 1925 A. 448 and 1926 A. 227 Dist.

2. Age of accused for—.

1. Under the English law a boy under the age of fourteen years is presumed to be incapable of committing rape. 1 Hnb. P. C. 631, 2 Q. B. 600 (1892), but he can be convicted as a principal in the second degree for aiding and abetting. Recorded cases show that boys of fourteen are not always impotent. *Taylor's Med. Jur.*, 1928 P. 102.
2. In India Chevers stated that a boy of thirteen or fourteen years of age was found guilty of rape. A lad of fourteen was convicted of rape on a girl of the same age and in another case a boy only ten years of age. See Chevers "*Med. Jur. for India*" P. 463; *Taylor's Med. Jur.* 1928 P. 102; *Lyon's Med. Jur.* 1935, P. 371.
3. A boy of 10 years of age who has attained sufficient maturity of understanding can be convicted of attempt to commit rape. 1935 R. 393. 42 I. C. 175=18 Cr. L. J. 943 and 37 A. 187 Rel. on. where a boy of 12 years was so convicted.

3. Attempt at—. See Assault on woman, S. 354, I. P. C.

1. Although a boy of 12 is physically incapable of committing rape, he can be guilty of attempt. 42 I. C. 175=18 Cr. L. J. 943, 37 A. 187, 1935 R. 393.
2. A lad of 18 made a naked girl of 5½ years sit on his thighs. There was no bleeding from the private parts, though there was redness at the entrance to the vagina and her hymen was intact. Held, he is guilty of attempt. 1927 L. 222=100 I. C. 116=28 Cr. L. J. 244.
3. Accused put his finger in the private part of the complainant. There was no mark of semen on her pyjama nor any marks on the male organ. Held, he is guilty of attempt only. 1923 L. 167=73 I. C. 513=24 Cr. L. J. 625.
4. A lady travelling alone in a train woke up and found the accused sitting on her berth. She tried to reach the communication chord but he caught hold of her and began to unbutton his trousers. After another struggle accused apologised for

Rape—(contd.)

molesting her. Held, he is guilty under S. 354 and not of attempt to commit rape. 1925 R. 247=96 I. C. 260=27 Cr. L. J. 916, 19 Cr. L. J. 155.

5. Accused went to the roof of his neighbour and catching hold of his daughter, undid the string of her *pyjama*. He was seen struggling when her mother came up in answer to her daughter's cries and he ran away. Held, he is guilty under Ss. 376—511. 1927 L. 580=103 I. C. 199=28 Cr. L. J. 663=28 P. L. R. 575.
 6. Accused stripped the girl nearly naked and laid upon her, when her cries attracted people to the spot, he is guilty of attempt. 42 P. W. R. 1910 Cr.
 7. Pulling of a woman by the arm with a request for sexual intercourse is not an offence under Ss. 376—511 but under S. 354. 1 Weir 347.
 8. An indecent assault upon a woman does not amount to an attempt to commit rape, unless the Court be satisfied that the conduct of the accused indicated a determination to gratify his passions at all events and in spite of all resistance. 5 B. 403, 96 I. C. 260, 19 Cr. L. J. 155.
 9. Accused took off the clothes of a woman, whom he threw on the ground and sat down beside her. Held, he is guilty under S. 354. 16 P. W. R. 1912 Cr.
 10. Accused threw the girl down, put sand in her mouth and getting on her chest was going to have intercourse but was prevented from doing so by arrival of other persons. Held, he was guilty of attempt to commit rape. 1933 L. 1002 (1)=147 I. C. 560, 8 I. C. 257.
4. By husband—S. 561, Cr. P. C.

Where the District Magistrate took cognizance of the offence of rape by husband, the fact that the investigation had been conducted by a subordinate Police Officer (not a Police Inspector) the irregularity did not vitiate the proceedings. 1895 A. W. N. 9.

5. Charge.

1. Joinder of charge under S. 376 against one of the accused with charges under Ss. 356—147 against others along with him is a misjoinder which is illegal. 1922 L. 410=77 I. C. 997=25 Cr. L. J. 533.
2. Accused charged under S. 356, I. P. C., can be convicted of rape. 1932 A. 580.

6. Charge for rape after acquittal for abduction.

A person acquitted of abduction should not be charged for rape of the female involved on the ground of public policy. 32 Cr. L. J. 205=1930 R. 360, 5 R. 366.

7. Complaint. To relatives, etc. S. 8, Ev. Act.

1. On a failure of charge of rape, Court cannot start prosecution for adultery without the complaint of the husband. 19 I. C. 716, 13 P. R. 1883 Cr.
2. If the girl did not complain to any one for some time or omitted to disclose it during Police investigation on a report made for another offence, there are sufficient grounds for discrediting her subsequent complaint for rape. 54 P. L. R. 1916=34 I. C. 1004, 17 P. W. R. 1916
3. If an aggrieved person does not make a complaint but only makes a statement, the statement is not relevant under S. 8, as it does not explain or accompany any conduct. III. (j) III. (k) S. 8, Ev. Act.
4. If a girl on whom rape has been committed goes to her relatives straight after the occurrence and complains on her own initiative, the statement will be complaint under S. 8, but if she only answered questions put to her, her statement will be hearsay. 1926 P. 58=26 Cr. L. J. 1475=69 I. C. 1043.
5. If a girl, immediately after the rape, is seen crying and on being asked by witnesses, says that she has been ravished, the statement is admissible as explaining her act of crying. 1925 N. 74=25 Cr. L. J. 1214=82 I. C. 142. See 1925 P. 58=26 Cr. L. J. 1475.
6. If the statement of the girl is excluded from the case the evidence of witnesses that she had charged the accused with rape is inadmissible under S. 157, Ev. Act. 1926 P. 58.
7. The mere fact that the statement is made in answer to a question is not of itself

Rape—(contd.)

sufficient to make it inadmissible as a complaint. 1921 L. 258=4 L. L. J. 491
See 1926 P. 58=26 Cr. L. J. 1475.

8. Communication of gonorrhoea or syphilis.

1. If one of the parties is suffering from venereal infection and the other is not, the probabilities are very high that disease will be communicated to the other party. This relationship of cause and effect is much easier to establish or refute in the case of gonorrhoea and syphilis than of any other venereal trouble. In such cases examination of the accused affords excellent evidence, either confirmatory of his guilt or strongly suggesting his innocence. The above should not be admitted as furnishing corroborative evidence of rape, except,—(a) when the accused party is labouring under gonorrhoeal discharge, (b) when the date of its appearance in a child is from the third to the eighth day after alleged intercourse, and, (c) when it has been satisfactorily established that the child had not suffered from any such discharge previously to the assault. It may be said, however, that all these conditions may exist, and yet the accused be innocent, for a child may, either through mistake or design, accuse an innocent person. *Taylor's Med. Jur.*, 1928, pp. 122-123. *Lyon's Med. Jur.*, 904, pp. 256-257.
2. Gonorrhoea or syphilis cannot manifest itself immediately after congress, and therefore, if found on the female within twenty-four hours, is a strong proof against her chastity and in favour of the accused. *Ryan's Med. Jur.*, 1836, P. 314.
3. The fact that accused was suffering from gonorrhoea and the other party was not infected with the disease is by no means conclusive of his innocence. 29 Cr. L. J. 12=106 I. C. 348.

9. Consent.

1. In a rape case the question of consent does not arise when the girl is under 10 years of age. 106 I. C. 348=27 Cr. L. J. 12.
2. If the girl was *virgo intacta* up to the date of occurrence it is very strong proof against the committing of rape with consent of the victim. 1925 L. 613=89 I. C. 1056=26 Cr. L. J. 1485.
3. Where the circumstances show that the accused was copulating with a woman of 20 with her consent and when found out in the act, she naturally concocted the story of rape to save her face. Held, that the accused is not guilty. 1927 L. 858=9 L. L. J. 337.
4. Accused was acquitted where he denied intercourse but Court found intercourse with consent. 12 I. C. 848.
5. Evidence of resistance is a good guide to determine consent. 1924 L. 609=75 I. C. 986=25 Cr. L. J. 74.
6. Consent must not be obtained by fraud or fear. 1 W. R. 21.
7. The mere presence of semen on the loin cloth of woman is not sufficient proof that she was a consenting party unless there was spermatozoa in the vagina. 1925 L. 94=6 L. L. J. 474.
8. Grown up girl of 18 submitted herself to be carried away and raped, the presumption is of consent. 1931 L. 401.

9-A. Corroboration of girl's testimony.

1. Only in exceptional cases should uncorroborated testimony of girl be accepted. 1934 C. 7=38 C. W. N. 108.
2. The corroboration should be independent evidence of some witness other than the woman herself. 1934 C. 7=38 C. W. N. 108, 12 Cr. App. Rep. 81, 21 Cr. A. C. 23.

10. Death by —. See Culpable Homicide—22.

1. The introduction of mature male organ into the vagina of an immature female, may produce local injury sufficient to cause death from *haemorrhage, shock, or subsequent inflammation, such as peritonitis or gangrene* by violent laceration of vagina or perineum. *Lyon's Med. Jur.*, 1935, P. 374.
2. Violent sexual intercourse in a young female at or near the age of puberty may

Rape—(contd.)

cause constitutional disturbance leading to fatal haemorrhage into the brain, peritoneal cavity etc. *Lyon's Med. Jur., 1904, P. 250.*

11. Essentials and Evidence.

1. Vulval penetration is sufficient for conviction under S. 376. 1923 L. 36=88 I. C. 705=26 Cr. L. J. 1185.
2. Partial penetration, though not sufficient to cause any rupture or injury to the hymen is sufficient penetration under S. 376. 1927 L. 735=28 Cr. L. J. 241.
3. Where there is no direct evidence nor blood or semen on the body of the prosecutrix and there had been great delay in making first information report and there was enmity between the parties, the accused should be given benefit of doubt. 17 P. W. R. 1916 Cr.=33 I. C. 630=17 Cr. L. J. 150, 1927 L. 836=28 P. L. R. 235.
3. It is hardly possible that any self-respecting woman would come forward in a Court of justice to make a humiliating statement against her honour, unless it was absolutely true. 1923 L. 391=75 I. C. 77=24 Cr. L. J. 877.
5. In a case of rape it is unsafe to convict merely on the accusation of a woman. 67 I. C. 827=23 Cr. L. J. 475, 75 I. C. 986=1924 L. 269, 1927 R. 67.
6. If the girl was not a virgin and no trace of semen is found on her clothes and there is no physical proof of the rape, the evidence is insufficient for conviction. 1923 L. 238=82 I. C. 64=25 Cr. L. J. 1200.
7. The charge of rape was brought against the accused immediately after the occurrence and was supported by medical evidence and the accused was arraigned before a Panchayat there and then shows that rape story is no fiction, though the friends of the girl being ignorant rustics did not look for the blood to preserve it in support of the charge. 1923 L. 332=76 I. C. 1037=25 Cr. L. J. 317.
8. When the victim of rape is an innocent girl of tender age, her evidence is highly valuable, specially when she disclosed it soon after. 1925 N. 74=25 Cr. L. J. 1214.
9. In no cases is it more difficult to arrive at a confident verdict whether evidence is false or true than in rape or indecent assault cases. There is a possibility of unintentional mis-statement produced by hysterical conditions. 45 A. 265=81 I. C. 629=1924 A. 411=25 Cr. L. J. 981.
10. Where semen was found on the *silwar* of a married woman, who passed the night before making the first information report with her husband, the evidence is insufficient for conviction. 1927 L. 867=9 L. L. J. 384.
11. The report of Chemical Examiner regarding the presence of semen on the complainant's clothing is not sufficient. 1930 L. 193=30 P. L. R. 662=11 L. L. J. 391.
12. If the Court is of opinion that the child who is raped cannot give relevant information on account of immaturity of judgment, it should not examine the child at all. 1930 L. 337=31 P. L. R. 612, 38 A. 49 *Contra* 41 C. 406.
13. If the girl did not complain for so investigation, these are sufficient of rape. 54 P. L. R. 1916=34 I.
14. No charge is easier to concoct and more difficult to refute than a charge of rape. 3 M. S. F. 152. See 1926 L. 375=94 I. C. 257=27 Cr. L. J. 593.
15. Some marks of struggle must be looked for in a rape case. 75 I. C. 986, 25 Cr. L. J. 74.
16. The fact that the accused was suffering from gonorrhoea and the other party was not infected with the disease is by no means conclusive of his innocence. 29 Cr. L. J. 12.
17. Where the prosecution evidence is not strong, conviction cannot be based on the complainant's evidence alone. 9 L. L. J. 337, 11 P. W. R. 1922 Cr.
18. Where the woman had intercourse with some persons but showed no signs of force having been used and had reported to several persons. Held, that was not sufficient corroboration. 5 B. L. J. 112.

Rape—(contd.)

19. Where there was the evidence of the woman only and there was no evidence of penetration, the accused was guilty under S. 351, 11 L. L. J. 391.
 20. In rape cases the general immoral character of the woman is relevant evidence. 1926 C. 320 = 27 Cr. L. J. 263.
 21. Volval penetration is sufficient. Rupture of hymen is not necessary. 1934 L. 797.
 22. The girl, her mother and eye-witnesses deposed in favour of prosecution. There was absence of hymen and absence of injuries. Blood stains were found on cloth of accused and cloth of girl. Held, that the conviction was proper. 1935 A. 590 = 157 L. C. 147.
 23. Only in exceptional cases conviction on uncorroborated testimony of the girl should be upheld. 1934 C. 7 = 35 C. W. N. 108.
 24. In a double rape case in broad daylight, the fact that husband of prosecutrix was at a distance of 70 yards when she was crying for help must be brought to the notice of jury. Conviction was upheld under S. 354. 1934 N. 94 = 35 Cr. L. J. 957.
 25. In arriving at a conclusion in charge of rape the following inquiries are necessary :—(a) The time, place, and all circumstances connected with the assault should be noted and carefully considered (b) The age, strength of body, state of health, of mind and the general character of the accused, are to be duly estimated. (c) The education, station in life and previous intimacy of the parties. (d) All marks of violence or disease are to be taken into consideration. (e) The organs of both parties are to be examined and their proportion compared. *Ryon's Med. Jur.*, 1836, P. 322.
12. Examination of the accused
1. The examination of the accused should be made to ascertain :—(1) His age and capacity for committing the offence. (2) Whether his clothes or person exhibit signs of recent sexual intercourse or struggle. (3) Whether he is suffering from venereal disease. . . . Scratches or bruises on his body should be noted with reference to struggle. *Lyon's Med. Jur.*, 1904, pp. 258-259. *Taylor's Med. Jur.*, 1928 P. 113. *Lyon's Med. Jur.*, 1935, P. 381.
 2. In cases of alleged rape and struggle on the part of the victim, small bruises corresponding to finger marks may be found about the arms. *Taylor's Med. Jur.*, 1928, P. 360.
13. False charge of—
1. False charge of rape may be easily set up by girls at the age of puberty. The medical evidence can rarely be more than merely negative; it is practically impossible from it alone to say that there may not have been such a degree of penetration as constitutes rape in law. When a girl over sixteen or a woman is in question juries are very prone to think that "there cannot be smoke without fire." Where the sexual organs were found uninjured and marks of blood on the clothes of the child were on the outside, and the whole fibre of the stuff had not been completely penetrated by the liquid, the charge was proved to be false. *Taylor's Med. Jur.*, 1928, P. 130.
 2. In few cases false charges are disproved by medical evidence—in others, medical men may be sometimes the dupes of designing persons. In majority of cases, the falsehood of the charge is proved by inconsistencies in the statement of the prosecutrix herself. Amos remarked, that for one genuine case of rape tried on the circuits in his time, there were on the average twelve pretended cases. *Taylor's Med. Jur.*, 1928, P. 111.
 3. Women intent on revenge or extortion will frequently bring a false charge against a man, producing a well-tutored child as the victim. Another class of false accusation is that brought by the woman who was a consenting party until caught in the act. In such a case no injury will be found unless the woman was virgin. *Lyon's Med. Jur.*, 1935, P. 375.
 4. Modern Magistrates look with great suspicion on all charges of rape, unless made in a day or two after its alleged occurrence. *Ryon's Med. Jur.*, 1836, P. 309. *Taylor's Med. Jur.*, 1928, pp. 128-129.

5. No charge is more easily made than rape, or rebutted with more difficulty. *Ryon's Med. Jur., 1836, P. 309.*
6. Rape is often set up to hide the downfall of a young girl who wishes to avoid her shame, by turning the pity and sympathy of every one towards her; girls often invent attacks by quite unknown persons or, graver still, they bring false accusations against person named. In such cases the real seducer is hardly ever accused of the rape. He is spared and no charge is made until the fact of pregnancy is certain. "*Criminal Investigation*" by *Hans Groe, 1906, P. 18.*

14. First information report

In a rape case the confession of the accused was recorded the day after the occurrence and the Chemical Examiner's report supported the girl's story. Held, that conviction was valid. It is not natural that the girl complained in the first instance only of robbery of jewels. 13 P. L. R. 1910=11 Cr. L. J. 665=8 L. C. 494.

15. Impotency or physical incapacity. See Impotency.

1. A person physically incapable of committing the offence of rape cannot be held guilty of attempt to commit rape. (1896) Unrep. Cr. C. 865.
2. A boy of twelve can be convicted of an attempt to commit rape. 42 L. C. 175.
3. In India the potency of a person charged with rape has to be proved by evidence in each case. (1891) Unrep. Cr. C. 86.

16. Marks of injury. See 12, 17, 18, 19, 20.

Where there are no marks of resistance on aggressor and no marks of injury are found on private part of woman it is not proper to convict on the bare testimony of the woman in the absence of corroboration. 1935 L. 8=36 Cr. L. J. 428=153 L. C. 594.

17. Medical evidence of—. See here—3

Medical evidence in cases of rape may be derived from four sources:—(1) Marks of violence about the genitals. (2) Marks of violence on the person of the prosecutrix or prisoner. (3) Presence of stains of spermatic fluid, or of blood, on the clothes of the prosecutrix or prisoner. (4) The existence of gonorrhoea or syphilis in one or both. *Taylor's Med. Jur., 1928, P. 111*

18. Medical Examination of woman

1. In a charge of rape the fact that the woman did not offer herself for medical examination cannot weigh against her. 17 N. L. J. 189=1935 N. 69.
2. The examination of a woman, several days after the occurrence is of no value, when she bore several children. 1935 N. 6.

19. On adult woman or girls over sixteen.

1. Girls who have passed the age of sixteen, and adult women, are considered to be capable of offering some resistance to the perpetration of the crime. Therefore in a true charge we should expect to find not only marks of violence about the pudendum, but also injuries of greater or less extent upon the body and limbs. Bruises upon the arms particularly may be considered reasonable evidence of attempts at struggling; impressions of finger nails, too, would be suggestive. Bruises or scratches about the inner side of the thighs and knees may be inflicted during attempts to forcibly abduct the legs. Strong corroborative evidence of a tale of struggle might be obtained from an examination of the accused for similar marks of bruises or scratches about the arms or face, and possibly even about his penis, though this is much less likely. *Taylor's Med. Jur., 1928, pp. 123-124.*
2. If a married woman is rendered powerless by many persons being combined against her, or if she is rendered insensible by intoxicating drinks or narcotic vapours, a rape may be perpetrated, without any injury to the genital organs. A separation of thighs in a married woman will cause a dilation of the parts, as to render it easy for the male organ to penetrate the vagina without any traces of violence. On the other hand vagina may be the seat of violence, and no marks to indicate a struggle or the application of force may be found on the body. *Taylor's Med. Jur., 1928, P. 125.*

Rape—(contd.)

3. The presence of spermatozoa in the vagina is conclusive proof of connection, but not of rape, but their absence is no proof that connection has not taken place, for they may have been removed by washing or discharges. *Taylor's Med. Jur.*, 1928, P. 126.
4. The mere presence of semen on the lion cloth of woman is no sufficient proof that she was consenting party, unless there was spermatozoa in the vagina. 1925 L. 94.
5. In married women, or in those accustomed to sexual intercourse, no inference can be drawn from a dilated state of the vagina. *Taylor's Med. Jur.*, 1928, P. 128.
6. When a girl over sixteen or a woman is in question, Juries are very prone to think that "there cannot be smoke without fire." *Taylor's Med. Jur.*, 1928, P. 130.
7. It has been alleged that it is impossible that a man unaided can commit a rape on an adult female of ordinary strength, in full possession of her senses. *Lyons's Med. Jur.*, 1904 P. 247.
8. In cases of alleged rape and struggle on the part of the victim small bruises corresponding to finger marks may be found about the arms. *Taylor's Med. Jur.*, 1928, P. 360.

20. On children up to 16 years old.

1. If the crime has been completed and there has been any resistance on the part of the child, there must be marks of injury on the sexual organs. Even without reference to manual violence on the part of the assailant, the size of the adult male organ must cause much local injury in the attempt to enter the vagina of a child. If the violation has taken place within two or three days, the appearances presented by the parts may be as follows:—(a) Inflammation with more or less abrasion of the lining-membrane of the vagina, or the entrance. (b) A mucopurulent discharge from the vagina, of a yellowish or greenish-yellow colour, staining or stiffening the linen worn by the girl; the mucus membrane of the urethra possibly shares in the inflammation rendering the discharge of urine painful. (c) In recent cases blood may be oozing from the abraded membrane, or clots of blood may be found deposited in the vulva. (d) The hymen may be entirely destroyed or it may present one or more lacerations. Owing to the inflamed state of parts, the child walks with difficulty and complains of pain in walking. (e) Lastly the vagina may be unnaturally dilated. *Taylor's Med. Jur.*, 1928, P. 114.
2. The absence of marks of violence on the genitals when an early examination has been made, furnishes a strong presumption that rape has been committed on the young person. *Taylor's Med. Jur.*, 1928, P. 119.
3. Hymen is not always present in young children, it may have been congenitally deficient, or, what is more probable, it may have been destroyed by ulceration or suppurative inflammation of the parts. The absence of this membrane, can afford no proof of the perpetration of the crime, unless we find traces of its having been recently torn by violence. *Taylor's Med. Jur.*, 1928, P. 119.
4. Care should be taken that the symptoms of a malignant form of disease (Noma, a form of destructive ulceration), to which female children are sometimes subject, are not mistaken for criminal violence. *Taylor's Med. Jur.*, 1928, P. 120.
5. If one of the parties is suffering from venereal infection, the probabilities are certainly very high that the disease will be communicated to the other party. But this relationship is much easier to establish or refute in the case of syphilis and of gonorrhoea than of other venereal troubles. Violence on the body of a young child is seldom met with, because no resistance is made. Bruises or contusions may however, be occasionally found on the legs. *Taylor's Med. Jur.*, 1928, pp. 122-123.
6. In unmarried women and in children, where there has been much violence, the signs of rape may persist and be apparent for a week or longer. Delay in having the examination of the girl made, unless satisfactorily explained, is always a suspicious circumstance. *Taylor's Med. Jur.*, 1928, P. 123.

21. On prostitutes

1. Law protects prostitutes against involuntary connection just as it protects children and chaste women. When a charge is made by a prostitute it is justly received

Rape—(contd.)

with suspicion. Something more than medical evidence would be required to establish the charge. There may be marks of violence about the pudendum, or on the person, and yet the conduct of woman may have been such as to imply consent on her part. *Taylor's Med. Jur., 1928, P. 110.*

2. "A common whore may be ravished against her will, and it is a felony to do it." *Howell's State Trials, Vol. II, Ryan's Med. Jur., 1836, P. 309.*

22. On woman asleep, drunk or unconscious.

1. If a woman be drunk or asleep from drink or other narcotic, it is possible for sexual intercourse to take place without her consent. If it is alleged that she was rendered unconscious by drink, an inquiry into her character would be necessary to find out why she consented to drink more and more. If no unfair means had been used, there can be little doubt that a constructive consent had been given. *Taylor's Med. Jur., 1928, P. 104, Lyon's Med. Jur., Ed. 1935, P. 373. Ryan's Med. Jur., P. 1836, P. 313.*
2. It is possible for rape to be committed during natural sleep. *Ibid.*
3. A rape is possible in a hypnotic sleep. *Taylor's Med. Jur., 1928, pp. 108-109. Lyon's Med. Jur., 1904, P. 219.*
4. In *R v. Baker* (1872) the prosecutrix alleged that she did not consent to the act and it was done at the time when there was a fit of *hysteria*. The accused was convicted. Cases in which *hysteria* is pleaded should be regarded with great suspicion. *Taylor's Med. Jur., 1928, P. 110.*

23. Presence or Test of Seminal Stains.

1. The following are the characteristics of seminal stains:—(a) Semen *stiffens* cloth like starch and is of a light greyish yellow colour; pus and several other discharges stiffen cloth in a somewhat similar manner. (b) The characteristic *odour* may be given out on moistening the stain, if the cloth is otherwise sufficiently clean. (c) *Warmth* applied to the stain by holding it near the fire *deepens the stain* to a yellow fawn colour, other discharges are not so affected. (d) Presence of *spermatozoa*. This is the only and positive test for semen, but it is essential that one or more should be seen in a complete form, with filament attached. The human spermatozoa have a flattened almost oval head and vary in length from 1/1000 to 1/500 of an inch, the head being about 1/9000 of an inch in diameter. While the discovery of spermatozoa in a stain is a positive evidence of its seminal origin their non-discovery does not enable you to swear that the stain is not semen. When a seminal stain is mixed with much blood or the clothes are very dirty, the detection of semen is especially difficult. *Lyon's Med. Jur., 1904, pp. 104-105.*
2. The detection of dead or motionless spermatozoa in stains may be made at long periods after emission, when the fluid has been allowed to dry. Spermatozoa are not found in the very young, the very old, or in those who are labouring under long standing disease of the testicles. Even in the case of healthy married men, who have had children, spermatozoa are not always found in the Spermatic secretion, on account of exhaustion from frequent intercourse etc. *Taylor's Med. Jur., 1928, pp. 136-137.*
3. The mere fact that slide containing a smear of discharge from the penis of deceased contained spermatozoa and there was whitish discharge from the vagina of the woman are not conclusive proof that two were caught in the very act of *coitus*. 1933 O. 148=34 Cr. L. 7. 498.

Receiving stolen Property.

RECEIVING STOLEN PROPERTY (S. 411, I. P. C.)

1. Applicability.

1. When receipt or detention of property not necessarily for disposal, is dishonest, S. 411, is the appropriate section: If on the other hand dishonest receipt or detention cannot be proved but for dishonest concealment or disposal S. 414 is more appropriate. 49 B. 878, 31 P. R. 1879 Cr.
2. S. 411 does not apply if the property is *res nullius*, e.g., bull let loose as a part of religious ceremony. 9 A. 348, 17 C. 852, 18 B. 212.

2. 'Believe' to be stolen.

The word 'believe' in S. 411 is much stronger than 'suspect'. The prosecution must show that circumstances were such that reasonable man must have felt convinced in his mind that the property was stolen. It is not sufficient to say that accused was careless or had reasons to suspect the property to be stolen or that he did not make sufficient inquiries. 1935 O. 327=154 I. C. 901=36 Cr. L. J. 602. 1929 O. 213=30 Cr. L. J. 969 Rel. on.

3. Burden of proof.

1. Where the stolen property is discovered 15 months after the theft the *onus* of proof should not be put on the accused. 1928 L. 687=108 I. C. 212=29 Cr. L. J. 464, 62 P. L. R. 1916.
2. The *onus* is on the prosecution to prove that the accused received property dishonestly. 109 I. C. 674=29 Cr. L. J. 594.
3. Burden of proof of facts from which knowledge of accused as to stolen property can be presumed lies on the prosecution. 27 Cr. L. J. 1144=1927 N. 40.
4. Because the distance of time between theft and recovery is short *onus* does not shift to accused to prove innocent possession. 1933 A. 893, 1933 P. C. 218, 1920 C. 3+2=21 Cr. L. J. 545.
5. If accused is unable to account for possession, burden of proof does not shift to accused. 1933 A. 893, 1931 C. 617.

4. Changing hands.

Where the nature of the articles is such that they may be constantly changing hands the recovery of such articles more than 5 months after the theft cannot in law give rise to a presumption against the possessor and it is not incumbent upon him to explain how he came by them. 1921 L. 89=62 I. C. 867.

5. Charge.

1. The charge that the accused received stolen property and had not been able to account as to how he obtained was held to be defective. 1 B. H. C. R. 95.
2. Dishonesty and knowledge or reasonable belief on the part of the accused that the property he received was stolen property must be set out in the charge. 4 W. R. 11.
3. The omission of the word "dishonestly" in a charge under S. 411, I. P. C., is not a ground of reversing conviction. 10 B. H. C. R. 373.
4. The charge should contain the name of the owner of property. 1 Bom. H. C. R. 95.
5. The omission of the word "dishonestly" in the charge is no ground for preferring appeal against acquittal. 10 B. H. C. R. (Cr. C.) 373.
6. Though the charge under S. 411 which does not specify the particular articles for the possession of which each of the accused is being prosecuted is no doubt defective, it is only curable irregularity when accused are not prejudiced. 1935 O. 473.
7. A joint-trial of three persons under S. 411 and one of them for two other offences for dishonestly possessing hullocks of some other persons is not illegal. 1534 A. 811=35 Cr. L. J. 1224. 1921 A. 403, 1921 A. 246, 1923 A. 417, 1927 A. 202 and 1933 A. 354 Dist.
8. Separate trials in respect of portions of stolen property cannot be held. 1934 P. 433 =13 P. 161.

Receiving stolen Property—(contd.)

6. Essentials and Evidence.

1. It is essential that the stolen property should have been found in possession of the accused and the accused retained it knowingly. 1929 A. 917=119 I. C. 863.
2. Prosecution must prove facts from which knowledge can be presumed. It is not sufficient to show that the accused person was careless or he had reason to suspect property or that he did not make sufficient enquiry to ascertain whether it had been honestly acquired. 1927 N. 40=97 I. C. 664=27 Cr. L. J. 1144, 6 B. 402, 49 B. 878, 35 I. C. 488.
3. For a conviction under S. 411 proof of theft is not necessary. 1926 L. 640.
4. To retain valuable property which does not belong to the accused is not in itself proof that a man's possession is dishonest. Mere possession of stolen property is no offence. 1923 L. 340=76 I. C. 963=25 Cr. L. J. 29.
5. It is necessary that the particular article stolen should be proved to have been stolen from a particular individual and if possible traced to its origin. 1926 S. 129=91 I. C. 64=27 Cr. L. J. 32, 1924 N. 48=75 I. C. 544.
6. Bullocks were stolen from one village and handed over to a person in another village to pasture them with his own. There can be no inference that the possession was dishonest. 1930 P. 353=122 I. C. 586=31 Cr. L. J. 437.
7. Accused found seated around the stolen property disputing as to its distribution are guilty. 1926 P. 316=94 I. C. 705=27 Cr. L. J. 657.
8. Mere discovery of stolen articles in a roofless room of accused's house is valueless. 1924 A. 192=81 I. C. 553=25 Cr. L. J. 942.
9. Where the fact of burglary was not reported for 4 months and goods of common pattern were found in the house of the accused which the accused and the complainant each claimed as his own, the accused must be acquitted. 1923 L. 36=81 I. C. 48=25 Cr. L. J. 560.
10. Where property of ordinary type was found 2½ years after the dacoity at the house of the accused who was goldsmith and when asked he explained that he himself made for his wife. Accused is not guilty. 1925 A. 220=26 Cr. L. J. 578, 29 A. 138.

Receiving stolen Property.

RECEIVING STOLEN PROPERTY (S. 411, I. P. C.)

1. Applicability.

1. When receipt or detention of property not necessarily for disposal, is dishonest, S. 411, is the appropriate section. If on the other hand dishonest receipt or detention cannot be proved but for dishonest concealment or disposal S. 414 is more appropriate. 49 B. 878, 31 P. R. 1879 Cr.
2. S. 411 does not apply if the property is *res-nullius*, e.g., bull let loose as a part of religious ceremony. 9 A. 348, 17 C. 852, 18 B. 212.

2. 'Believe' to be stolen.

The word 'believe' in S. 411 is much stronger than 'suspect'. The prosecution must show that circumstances were such that reasonable man must have felt convinced in his mind that the property was stolen. It is not sufficient to say that accused was careless or had reasons to suspect the property to be stolen or that he did not make sufficient inquiries. 1935 O. 327=154 I. C. 901=36 Cr. L. J. 602. 1929 O. 213=30 Cr. L. J. 969 Rel. on.

3. Burden of proof.

1. Where the stolen property is discovered 15 months after the theft the *onus* of proof should not be put on the accused. 1928 L. 687=108 I. C. 212=29 Cr. L. J. 464, 62 P. L. R. 1916.
2. The *onus* is on the prosecution to prove that the accused received property dishonestly. 109 I. C. 674=29 Cr. L. J. 594.
3. Burden of proof of facts from which knowledge of accused as to stolen property can be presumed lies on the prosecution. 27 Cr. L. J. 1144=1927 N. 40.
4. Because the distance of time between theft and recovery is short *onus* does not shift to accused to prove innocent possession. 1933 A. 893, 1933 P. C. 218. 1920 C. 342=21 Cr. L. J. 545.
5. If accused is unable to account for possession, burden of proof does not shift to accused. 1933 A. 893, 1931 C. 617.

4. Changing hands.

Where the nature of the articles is such that they may be constantly changing hands the recovery of such articles more than 5 months after the theft cannot in law give rise to a presumption against the possessor and it is not incumbent upon him to explain how he came by them. 1921 L. 89=62 I. C. 867.

5. Charge.

1. The charge that the accused received stolen property and had not been able to account as to how he obtained was held to be defective. 1 B. H. C. R. 95.
2. Dishonesty and knowledge or reasonable belief on the part of the accused that the property he received was stolen property must be set out in the charge. 4 W. R. 11.
3. The omission of the word "dishonestly" in a charge under S. 411, I. P. C., is not a ground of reversing conviction. 10 B. H. C. R. 373.
4. The charge should contain the name of the owner of property. 1 Bom. H. C. R. 95.
5. The omission of the word "dishonestly" in the charge is no ground for preferring appeal against acquittal. 10 B. H. C. R. (Cr. C.) 373.
6. Though the charge under S. 411 which does not specify the particular articles for the possession of which each of the accused is being prosecuted is no doubt defective, it is only curable irregularity when accused are not prejudiced. 1935 O. 475.
7. A joint-trial of three persons under S. 411 and one of them for two other offences for dishonestly possessing bullocks of same other persons is not illegal. 1534 A. 811=35 Cr. L. J. 1224. 1921 A. 408, 1921 A. 246, 1923 A. 417, 1929 A. 202 and 1933 A. 354 Dist.

RELEVANCY OF FACTS. S. 5, Evidence Act. See Facts.

1. Admissibility and—.

Every relevant fact is not necessarily admissible, though where the relevancy of a fact is established, there is a presumption of its admissibility, and it is for the person objecting to show that the fact is not admissible. 16 B. 661 (658).

2. Burden of proving—.

Except where S. 11 is applicable, no presumption of legal relevancy attaches to facts logically relevant, and the person tendering evidence of a fact has to show that it is relevant under some section of the Act. 5 C. 744 (754), 7 A. 385 (399).

3. Court can ask cross-examiner to show—. S. 136, Evidence Act.

2. If the Court is in doubt as to the relevancy of evidence the decision should be in favour of its relevancy rather than against it. 12 A. 126.
3. In cross-examination the power to require counsel to satisfy the Court as to the relevancy or object of the question asked should be sparingly exercised. *Wignmore, S. 1871.*
4. In cross-examination, the great art is to conceal from the witness the object with which the question is put, and this object is likely to be defeated if the cross-examiner were to explain the object. *Best, S. 659.*

4. Instances of relevant conduct. See Conduct.

5. Objections to—.

1. Objections to the admissibility of evidence should be decided as they arise. 25 C. 401, 17 C. 173.

3. Omission to object to irrelevant evidence cannot make it relevant. 25 C. 736.
4. An accused cannot give a valid consent to any material irregularity of procedure. 46 M. 117, 4 L. 376=1924 L. 104.
5. Neither the omission of party to object to the reception of irrelevant evidence, nor consent of parties to the reception of such evidence, can make it relevant. 19 A. 76 (P. C.), 52 C. 67, 1924 C. 1042, 49 C. 93, 1925 C. 887=25 Cr. L. J. 606, 23 C. 736.

 13. That accused promised to tell the truth is no ground. 1932 O. 11.
 14. Mere omission to record reason by Magistrate who considered the circumstances will not make detention illegal. 1932 L. 13, 1930 L. 945.
6. Object of—

C. 628=28 C. W. N. 490.

RIGOR MORTIS. See Time of death.**1. Definition of—.**

After the period of irritability has passed there is a gradual stiffening of the muscles together with a certain amount of shortening of the fibres, this condition is known as *rigor mortis*. Every muscle in the body, voluntarily and involuntarily takes part in the process. If abundant oxygen is supplied and the muscle is kept 0°C there is no accumulation of acid, no shortening and no rigidity. *Taylor's Med. Jur.*, 1928, P. 230.

2. Difference between living contraction of muscles and—.

In the case of living contraction of muscle, it is more or less transparent or rather translucent, elastic and in reaction to litmus it is either neutral or slightly alkaline, but it is not so in the case of *rigor mortis*. If the contraction be overcome by mechanical force, the muscles still possess their power of contraction, but if *rigor mortis* be overcome by mechanical force, absolute flaccidity at once ensues and there is no power to resume old position nor any new one. *Taylor's Med. Jur.*, 1928, P. 231.

3. In involuntary muscles.

1. The ventricles of the heart commonly lose their irritability within an hour after death. *Taylor's Med. Jur.*, 1928, P. 238.
2. Instantaneous stiffening is more likely to exhibit itself when great muscular exertion has been made previous to death. It is more likely to appear in strong and muscular subjects; or when death is sudden or is due to violent disturbance of nervous system (shot through the head etc.,) drowning. That the condition of affairs produced by it is easily distinguishable from that produced by simple *rigor mortis* in that an object grasped by the fingers is firmly gripped just as it would be during life, only that more force is required to extract it from the grip, than would be necessary during life, whereas if held by *rigor mortis* alone the object can be easily lifted off the fingers. That is the strongest or conclusive proof that the object so gripped was thus gripped at the moment of death. *Taylor's Med. Jur.*, 1928, P. 241.

4. Order in which—appears in muscles.

Rigidity first appears as a rule in the muscles of the face, neck and trunk; it then takes

Rigor Mortis—(concl'd.)

place in the muscles of the upper extremities and lastly in those of the lower. regard to its disappearance, the muscles of lower extremities will often be found rigid, while those of the trunk and upper extremities are again in a state of relaxation. It appears later and lasts longer in the lower extremities than in the other parts of the body. It begins almost always in the neck and the lower jaw. From the neck it passes in two directions: upwards to the muscles of the face and downwards to the muscles of the upper extremities and trunk, then attacking those of lower extremities. *Taylor's Med. Jur.*, 1928, pp. 237-238.

5. Time of death from—. See Time of death—4.

6. When begins.

Rigor mortis generally commences within three to six hours of death, while the body is cooling, but long before it has reached the temperature of the surrounding. It comes on slowly in healthy, muscular subjects who have died without convulsions e.g., by hæmorrhage, hanging, etc. It sets in rapidly in new born infants. All circumstances which cause an exhaustion of muscles, during life induce an early occurrence of rigidity, as is seen in hunted animals, overdriven cattle and in cases of poisoning by strychnia and other convulsant poisons. *Taylor's Med. Jur.*, pp. 232-233.

7. When disappears.

1. The sooner the rigidity sets in the more quickly it disappears and gives way to putrefactive processes. Generally, *rigor mortis* lasts for from sixteen to twenty-four hours in sound, muscular subjects. It may last much longer, from 24 to 36 hours and exceptionally it may continue for fourteen days or even longer. *Taylor's Med. Jur.*, 1928, P. 234.
2. Atmospheric changes have influence over it. Dry cold air will cause it to persist for a long time; and thus in winter season, especially in frost, it is slow in disappearing—its mean duration being from twenty-four to thirty-six hours. If the air is warm and saturated with humidity, it soon ceases. In the tropics where the temperature ranges between 80° and 100°F., *rigor* usually begins to disappear in twenty to twenty-four hours. *Ibid*, P. 235.
3. Bodies sunk in cold water soon pass into this state and retain the rigidity for a long time. *Ibid*. Bodies of those who are emaciated or die of Phthisis, Typhus or typhoid fever, and epidemic cholera, pass rapidly into a state of rigidity, which is commonly of short duration. *Rigor mortis* is frequently absent in the bodies of those who have died from generalized septicæmia. The old opinion of the non-occurrence of rigidity in the bodies of persons killed by lightning is unfounded. *Ibid*, P. 236.
4. Rigidity produced as a result of poisoning by strychnine may continue for a very long period. As to other poisons, such as arsenic, mercury perchloride, etc., are likely to cause delay in putrefaction and hence a prolonged state of stiffness in muscles. *Ibid*, P. 237.

 3. The fact that a man was bound over three times sixteen years ago is not sufficient to consider him a bad character still. 23 Cr. L. J. 507.

The accused was never criminally prosecuted nor any written complaint was ever made to Police against him. He produced 17 witnesses of respectable position to testify to his good character. Held, that evidence is insufficient on the record to justify an order under S. 110. 1923 L. 419=76 I. C. 1034=25 Cr. L. J. 314.

8. That the accused was of bad character and was suspected on many occasions by the Police is insufficient under S. 110. 1905 A. W. N. 34, 11 C. W. N. 129, 40 I. C. 710, 11 C. W. N. 413.

3. The period of imprisonment does not begin from the date of the order of Sessions Judge under S. 123 (2), but from the date of Magistrate's order. 1924 S. 120=83 I. C. 883=26 Cr. L. J. 179.
4. The imprisonment in default is provided as a protection to society against the perpetration of crimes and not as punishment for crimes committed. 2 C. 384, 17 P. R. 1900 Cr.

- 32. Inquiries privately made by Magistrate.**
1. Private knowledge of a Magistrate is not in itself substantive evidence, but it is a form of check which the Court may use in order to test the nature of evidence or investigation. A finding that "inquiries about the accused satisfy me that he is badmash" is objectionable but "the result of my enquiries in the neighbourhood, so far as they appear in the case of this accused tend to show that the case against him is not got up without reason" would be quite legitimate. 45 A. 749=1924 A. 451=81 I. C. 269=25 Cr. L. J. 781.
 2. If the Magistrate allows his private knowledge to influence his judgment in a judicial decision, his order should be quashed. 1923 A. 596=73 I. C. 337=24 Cr. L. J. 593, 21 A. L. J. 513.

- 33. Interim security. S. 117 (3), Cr. P. C.**
1. It is incumbent on a Court to state reasons in writing for an order under S. 117 (3) of interim security. Merely stating that it is passed "on account of emergency" is not sufficient. 1927 S. 148=99 I. C. 605=28 Cr. L. J. 173.
 2. It is not necessary for the Magistrate for passing an order under S. 117 (3) to take further evidence. 1926 S. 276=96 I. C. 982=27 Cr. L. J. 1030.
 3. The order of the High Court reducing interim security does not fetter the discretion of the Magistrate as to the amount of the security which may ultimately be demanded. 1930 L. 529=25 I. C. 322=31 Cr. L. J. 812.
 4. The interim order of security should not be more onerous than the one issued under S. 112. 1926 S. 276=96 I. C. 982=27 Cr. L. J. 1030.

 2. The legality of the joint trial must depend on what is alleged by the Prosecution and not on the facts subsequently found to be true. 1921 C. 625=22 Cr. L. J. 377.
 3. In order to have a joint trial, it is not necessary that accused shall be shown to be associated together in the order itself. 1926 S. 69=26 Cr. L. J. 1398.
 4. Joint trial is not illegal when part of the enquiry is under Cl. (f), S. 110. The evidence

6. If a gang of disorderly persons join together in committing acts of violence and criminal intimidation, they can be jointly tried. 23 Cr. L. J. 741.
7. If association is not proved the joint trial is bad. But it need not be set aside unless accused is prejudiced. 9 A. 452.
8. If the servants of common master jointly commit extortion, they may be jointly tried. 9 C. W. N. 895.
9. The mere fact that accused belonged to the same tribe or village is no evidence of association. 1 P. R. 1895 Cr.
10. The fact that accused are close neighbours and had been previously implicated in good many cases together, is no evidence of association to justify a joint trial. 21 Cr. L. J. 700.
11. When the question is that accused are of desperate and dangerous character, they should not be tried together. 27 C. 781.

3. Apart from the offence, there need not ensue breach of the peace, when it is an ingredient of the offence. 47 M. 846.

SPLEEN.

1. Enlargement—.

1. A normal spleen measures 5" x 2" x 1". Dr. Modi's "Medical Jurisprudence and Toxicology" at page 85. 1935 O. 381=36 Cr. L. J. 573=154 I. C. 808.
2. In fever-saturated districts the spleen is often much enlarged by disease. Lyon's Medical Jurisprudence, 1901, P. 141.
3. The spleen has two surfaces one external and convex, the other internal and concave; two ends the upper thick and rounded, the lower thin and pointed; and two margins, anterior and posterior, the former often being notched. Among Europeans the spleen measures according to Gray as follows—Europeans—Length 5 inches. Breadth 3—4 inches; thickness 1—1½ inches. Among Indians whose size and weight is usually much less than those of Europeans, the weight

Spleen—(concl'd.)

and dimension should be somewhat less than the above. But in Bengal normal spleens are less common than are enlarged and the average size and weight is greater than those quoted above. "*Lyon's Medical Jurisprudence*", 1904, Page 141, (footnote).

2. Noting size, etc., at Post Mortem Examination.

At the time of post-mortem examination, the doctor should note the size, colour and consistency of the spleen as well as the condition of its capsule. Dr. Modi on "*Medical Jurisprudence and Toxicology*", 1932, Ed. page 85. 1935 O. 381 (383)=154 I. C. 803=36 Cr. L. J. 573.

3. Period of survival after rupture of—

Death may occur in a few minutes from shock or not for several days. Chevers mentions one case of survival for five days and another of death on the eighteenth day. Considerable power of locomotion may remain after receipt of the injury. Recovery often follows the removal of a ruptured spleen. *Lyon's Med. Jur.* 1935, P. 214.

4. Rupture of— See Grievous Hurt—15. Hurt—22. Culpable homicide—25.

1. Spleen which is enlarged by disease is rendered liable to rupture from very slight violence. Indeed the enlarged spleen sometimes undergoes spontaneous rupture with fatal results without the application of any external violence. McLeod quoted by Chevers, *Med. Jur.* (P. 162) points out that rupture of spleen is liable to occur in cases of (1) simple engorged spleen, (2) hypertrophied spleen, (3) small hard spleen, (4) large hard spleen. *Lyon's Med. Jur.*, 1904 Ed., P. 141, *Lyon's Med. Jur.*, 1935 Ed., P. 211, *Taylor's Med. Jur.*, 1928, P. 460.

2. Rupture of the spleen may be caused by accidental violence, e.g., a fall or from the sufferer having been run over by a wheeled vehicle. In non-accidental cases it is often the result of a blow or a kick or push against the wall or other hard body, without a weapon. Rupture of spleen may occur without any external marks of violence being present. Rupture even of an apparently healthy spleen, may be unaccompanied by external marks of violence, but in such cases the subcutaneous tissue will probably (but not certainly) show sign of bruising. *Lyon's Med. Jur.*, P. 143.

3. Death may occur in a few minutes or not for several days. Considerable power of locomotion may remain after receipt of injury. In two cases recovery took place after rupture or bruise of the spleen, the diagnosis in one case being confirmed by dissection of the victim, who died several years afterwards *Ibid*, pp. 143-144.

5. Weight of—

1. The average weight of spleen in an Indian male of U. P. is 6.03 oz., the minimum being 2.5 oz. and maximum being 11 oz. For other provinces also see *Modi's Med. Jur.*, 1932, P. 87. 1935 O. 381 (383)=36 Cr. L. J. 573=154 I. C. 803.

2. Spleen weighing 7 oz. was held to be normal one. 1935 O. 381 (383)=36 Cr. L. J. 573.

3. The average weight of spleen in Indian males is 10½ oz., Indian females 6½ oz., and Europeans is 5-7 oz. *Lyon's Med. Jur.*, 1904, P. 88.

STATE OF MIND OF THE ACCUSED. S. 14, Evidence Act. See Similar Act, Conduct.

State of Mind of the Accused—(concl'd.)

1. Agitated—

The fact that accused was in agitated state of mind soon after the crime and pointed out places where weapons were concealed, makes the crime highly probable. 1925 M. 574 (2)=26 Cr. L. J. 840.

2. Evidence of—

To judge what the real state of mind of a person on a previous occasion was, the surrounding circumstances and subsequent events can be referred to. 1931 P. 52=32 Cr. L. J. 478=130 I. C. 269.

3. Previous conviction.

1. Evidence of previous conviction is not admissible to prove state of mind but amounts to evidence of bad character and therefore inadmissible. 60 I. C. 331, 27 C. 139, 5 P. L. J. 706, 1 C. W. N. 146.
2. Conviction for dacoity 25 years old is admissible to prove that accused is a man of criminal tendencies to commit theft and who may be a member of gang of thieves. 1925 B. 195=89 I. C. 527, 38 C. 403, 14 Bom. L. R. 373

5. Statement of co-accused.

STARVATION See Murder—32 A

1. Accidental.—The most common causes of accidental starvation are shipwreck, mining accidents, disease, famine and want as in the case of labourer thrown out of employment. *Lyon's Med. Jur.*, 1955, P. 319
2. In homicidal cases.—The victim is usually an infant or a child. In fatal cases the

Starvation—(concl'd.)

body should be carefully examined for signs of disease, specially chronic wasting disease. In non-fatal cases unusually low body-weight, coupled with a rapid gain in weight when proper nourishment is administered, is very strong evidence in favour of starvation. *Ibid*, P. 340.

3. *Post-mortem appearances.*—The post-mortem appearances are chiefly great emaciation and shrunken and contracted condition of the stomach and intestines with pale, pearly and translucent coats, etc. In some cases it will be difficult to form a definite opinion as to whether death was due to disease or starvation. *Ibid*, P. 339.
4. *Time and rapidity of death.*—Total deprivation of food and water will kill in 10 to 15 days. Chronic starvation, though not totally deprived of food may be spread over months. Death in these cases is brought about by some inter-current disease. Old persons bear deprivation of food better than adults and adults bear it better than children. Fat people bear deprivation of food best. Complete abstinence from both food and water kills more rapidly than abstinence from food alone. *Ibid*, pp. 338-339

3. The person making a statement is a witness and oath must be administered to him. A charge of perjury under S. 193 can be framed against the person making false statement. 16 M 421, 1908 A. W. N. 73, 29 M. 89. 1933 M. 125=34 Cr. L. J. 92, 45 B. 834 Not foll.

Statement to Police—(contd.)

20. Where the accused prays that all the statements made by accused, other than those exhibited in Court, be produced, they ought to be produced. The counsel is entitled to benefits of points he can make out of comparison of the statements with oral evidence of witnesses 1936 P. C. 242.

21. Placing before jury statements by accused to Police amounts to misdirection. 1934 C. 151.

4. By Approver.

A statement by approver to Police is inadmissible except as provided by S. 27, Ev. Act. 1924 A. 207, 9 L. 389, 1930 P. 510. The discrepancies between the statement of witness and approver cannot be explained by referring to the evidence of approver before Police. 1934 L. 102

5. By Criminal Investigation Department.

When in a case the sanction of Government is necessary under S. 197, Cr. P. C., a confidential enquiry was made by an officer of Criminal Investigation Department before such sanction was granted or before enquiry was directed by the Magistrate. The statements of witnesses were recorded by him and by a Magistrate. Held, that statements recorded by Criminal Investigation Department are not statements under S. 162, nor were the statements recorded by Magistrate under S. 164, Cr. P. C. 1927 B 501=106 I. C. 100=28 Cr. L. J. 1012.

6. By inducement, threat, etc. S. 163, Cr. P. C.

2. Police Officer should not extract information by using force. Such evidence is useless. 17 Cr. L. J. 351.

7. Consent to the use of—

Consent or desire of the accused cannot legalize the procedure of using Police diaries as evidence in the case either for or against the accused 1925 O. 1=25 Cr. L. J. 49

8. Contradiction—omission.

A. Mode of proving—

1. It is only what is written in the Police diaries that can be used under S. 145, Ev. Act, to contradict the witness. The way to prove those portions, specifically put to the witness, is for the accused to mark the passage or passages in the copy from the Police diary supplied to him and then ask the writer of the statement to say that it is true copy. 1928 L. 507=108 I. C. 162=29 Cr. L. J. 343.

2. The only way to contradict a witness is to prove his statement and put it to him under S. 145, Evidence Act, to permit him to explain the contradiction, if any. Statements made to Police cannot be used in any other way. 8 L. 605=1928 L. 17=105 I. C. 807=28 Cr. L. J. 983=28 P. L. R. 649.

3. If a witness admits to have made the statement, the previous statement in writing need not be proved. If he denies and it is intended to contradict him, the relevant portions of the record contrary to his statement in Court must be read to him and witness should be given the opportunity to reconcile the same. It is only after this is done that the record of previous statement becomes admissible in evidence and then be proved according to law. 11 L. 460=1930 L. 491=31 Cr. L. J. 1071=31 P. L. R. 797

B. Omission if— *See*—C. (below)

C. What can be contradicted— Omission

1. Where accused is not allowed to cross-examine a witness with reference to certain omissions in his statement to Police and statement in Court, it must be left to the Court to decide, whether in a particular case omission amounts to contradiction, 9 L. 389=1928 L. 257=108 I. C. 167=29 Cr. L. J. 348. *See* 53 C. 980, 1932 L. 103=135 I. C. 209.

2. If the contradiction consists in this that a statement made at the trial was not made in any part of the statement to the Police, it can be proved. 5 P. 346=1925 P. 362=95 I. C. 396=27 Cr. L. J. 795.

Statement to Police—(contd.)

3. Statements attested by the Sub-Inspector concerned, although recorded in his diary are recorded under S. 162 and can be used for the purpose of contradicting witnesses in cross-examination. 1927 O. 321=104 I. C. 242=28 Cr. L. J. 802.
4. A statement which has been admitted in evidence under S. 32, Evidence Act, may be contradicted by another statement of the same person made to Police during investigation. 1926 L. 122=89 I. C. 897=26 Cr. L. J. 1425.
5. A written statement which has been admitted in evidence under S. 32, Evidence Act, may be contradicted by another statement of the same person made to Police during investigation. 1926 L. 122=26 Cr. L. J. 1425=89 I. C. 877.
6. It is not permissible to ask investigating officer whether witness stated or did not state to him a particular matter for a witness can be discredited only by proving what is or what is not contained in the duly proved record of his statement. 1931 C. 622, 56 M. 475, 1928 R. 150, 1928 A. 230, 1923 L. 507, 8 L. 605, 7 L. 264, 6 L. 24 *Contra* 1931 P. 152=10 P. 107. But see 1933 P. 580 and 1924 B. 510.
7. A statement under S. 162 cannot be used during an inquiry or trial in order to show that a witness is making statements in the witness box which he did not make to the Police. 1933 M. 372 (2=56 M. 475. 1932 L. 103 and 1926 P. 20 Rel. on. 1926 P. 362 Expl. 16 A. 207 Ref.
8. A witness cannot be confronted with the unwritten record of an unmade statement. All omissions are not necessarily contradictions. 1932 L. 103 (110). 1928 L. 257=9 L. 389 Ref.
9. Silence may be full of significance but it is not 'diction' and therefore it cannot be 'contradiction'. 1933 M. 372 (2) at page 373=56 M. 475.
10. Disallowing cross-examination as to the statements which witnesses never made to Police, was to draw the attention of the witness to the omission and seek their explanation, is erroneous 1933 N. 136 (144)=34 Cr. L. J. 505, 1931 P. 152=32 Cr. L. J. 797, 10 P. 107.
11. Omission of some detail does not mean that it was not stated, because the diaries are notoriously condensed 1933 P. 440, 1933 P. 589=147 I. C. 142.

D. What portions to form part of Judicial Record.

1. Only those portions of statement to Police are parts of judicial record, as have been actually used under S. 162 for contradicting the witnesses in the manner provided by S. 145, Evidence Act. The other parts cannot be relied upon by prosecution or defence. 1930 L. 449=121 I. C. 66=31 Cr. L. J. 199.
2. Entries in Police diaries can be used for a limited purpose of contradicting the prosecution witnesses. Reference by a Magistrate to Police proceedings cannot be justified even under S. 172. 1928 L. 820=109 I. C. 821=29 Cr. L. J. 493.

E. Who can be contradicted. See—15

1. Only a witness called by the prosecution can be contradicted by a Police statement. 8 L. 605=1928 L. 17=28 Cr. L. J. 983=105 I. C. 807.
2. A statement to Police cannot be used to contradict a defence witness. 1924 B. 510=21 Cr. L. J. 223, 4 R. 72, 31 Cr. L. J. 689=1930 O. 60, 124 I. C. 444.

9. Copies of— See—20-21.

1. The effect of amendment of S. 162 is to make it obligatory on the Court to give the accused copies of the statements subject only to the exclusion of irrelevant matters which in the public interest should not be disclosed. 54 C. 307, 6 R. 672=115 I. C. 899=1929 R. 87, 7 P. 205=1928 P. 215=107 I. C. 817.
2. The application for copies should not be refused on the mere ground that it might not help the defence or that possibly there was no contradiction. 1927 P. 325=102 I. C. 773=28 Cr. L. J. 597
3. There is nothing in S. 162 to authorise the Court to look into the statement in the Police diary for the purpose of finding out whether it is contradictory to the

Statement to Policy—(contd.)

statement made in Court or not before granting the application for copy. That is the function of the lawyer for the accused. 8 P. 279=1929 P. 268=118 I. C. 130=30 Cr. L. J. 858, 56 C. 840, 1928 P. 215, 1930 S. 153=123 I. C. 689.

4. A copy of J's statement was applied for. The Court referred to the diary and found that his statement was recorded jointly with another prosecution witness who was tendered for cross examination but was not cross-examined. Held, that Court could refuse to supply the copy under these circumstances. 1930 L. 457=122 I. C. 491=31 Cr. L. J. 444.
5. Accused is entitled to get a copy of the statement of an approver made to the Police before he was tendered pardon. The statement can be used to contradict or corroborate him 9 L. 389=1928 L. 257=108 I. C. 167=29 Cr. L. J. 348.
6. Where a witness was tendered by the prosecution but was discharged without being examined or cross examined, the accused is not entitled to a copy of his statement. 7 P. 153=1929 P. 34=114 I. C. 220=30 Cr. L. J. 273.
7. Where the Lower Court wrongly refuses to furnish a copy of prior statement of a witness, the proper course in appeal is to furnish the counsel with a copy and any contradiction between that statement and those made by the witness should be taken as left unexplained by him. Each case must be decided on its own facts whether the trial is vitiated or can be remedied as indicated above. 9 L. 389=1928 L. 257=108 I. C. 167=29 Cr. L. J. 348.
8. Accused must be supplied with copies of statements when he applies after charge for the purpose of further cross examination. If the copies are not supplied, the appellate Court will remand the case and allow the copies to the accused. 1929 N. 240=119 I. C. 675=30 Cr. L. J. 1097, 1935 N. 23.
9. 12. The trial was vitiated when accused was not given copies. 53 A. 458.
13. There is no justification for imposing on the defence a condition for obtaining copies under S. 162 that he should by cross-examination lay foundation for the suggestion that the evidence given in Court is contradicted by his statement made to the Police. 53 A. 94.
14. S. 162 is imperative and Magistrate has no discretion to decide whether there is any contradiction or not and then to grant a copy if contradiction exists. 120 I. C. 267=1931 A. 273=32 Cr. L. J. 370.
15. A copy of joint statement of witness can be refused. 1932 C. 375.

12. A Sub-Inspector entered in a Police diary a statement of person who was afterwards murdered. The Sub-Inspector also died. Held, that statement is admissible under S. 32 (2), Evidence Act. 1932 A. 442.
13. Accused in appeal cannot complain that trial Court refused to refer to statement and at the same time to say that appellate Court is not entitled to refer to them because he has not requested it so to refer. 1935 R. 98=13 R. 1=155 I. C. 66.
14. Purpose for which Judge refers to the statement to Police is not to see whether there is material for cross-examination but whether there is any portion to be excluded under the second proviso. 1935 R. 98=13 R. 1=155 I. C. 66.
15. Statements recorded in a special diary under S. 172 cannot be used except as provided in S. 162, Cr. P. C. 1935 R. 370. (*Case law discussed*).

27. Stage for applying for copies of—.

1. An accused person is not entitled to a copy of a statement made by a prosecution witness under S. 162 until the witness is sought to be cross-examined. But as a matter of practice there is no harm if a copy is given at an earlier stage. 1929 L. 429=117 I. C. 377=30 Cr. L. J. 7, 760, 1928 P. 593=110 I. C. 459.
2. Accused has a right to apply for copies as soon as a witness is called for prosecution either in an enquiry or a trial. 1929 N. 172=117 I. C. 213=30 Cr. L. J. 728.
3. When the witness enters the witness box the accused is entitled to apply for a copy. 52 B. 195=1928 B. 23, 1935 R. 98=13 R. 1, 54 C. 307, 53 A. 458, 7 P. 205, 8 P. 279, 1927 P. 325, 1931 A. 273, 1927 P. 243, 1928 R. 150, 56 C. 840=19 9 C. 182 and 53 A. 94=1931 A. 34 (Ref.)
4. Copies of statements to the Police should not be granted until the stage of cross-examination is reached. If that stage is allowed to go by without application being made the accused must wait until the witness is again to be cross-examined. 1930 M. 185=122 I. C. 463=31 Cr. L. J. 414.
5. If the accused did not apply for copies in the Court of Committing Magistrate, he can do so at the time of trial before the Sessions Judge. 56 C. 840=1929 C. 182=116 I. C. 167=30 Cr. L. J. 580.
6. That the copies can be demanded only after cross-examination of a witness is begun would lead to inconvenience and delay in the trial. 1927 N. 21=99 I. C. 46=23 Cr. L. J. 14.
7. Accused can apply even at a late stage to be furnished with copies. 33 C. 1023.
8. Accused is entitled to a copy before witness is called. 1934 N. 138.

28. Statement—what is.

1. Statement may be oral or by signs. 1935 S. 145, 1928 M. 1028, 1926 B. 112, 5 L. 305.
2. Statements attested by the Sub-Inspector concerned, although recorded in his diary, are recorded under S. 162 and can be used for contradicting the witnesses in cross-examination. 1927 O. 321=104 I. C. 242=28 Cr. L. J. 802.
3. For the application of S. 162, there must be statement which is capable of being recorded, and therefore, if a witness says, "I did not make any statement to the Police," it cannot be a statement under S. 162. 1927 C. 257=53 C. 980.
4. First information report is not a statement to Police under S. 162, as it is not made during the investigation. 54 C. 237=1927 C. 17=28 Cr. L. J. 99.
5. Statement recorded in a special diary in any form is a statement recorded under S. 161, Cr. P. C., and the defence is entitled to a copy. 1928 C. 260=29 Cr. L. J. 531.
6. Statement though not full and only a memorandum is a statement recorded. 53 A. 458, 1935 R. 98, 1935 S. 145, 1933 L. 498, 1932 L. 103, 1933 P. 589, 1933 N. 4, 1929 R. 87, 1932 C. 375.
7. Statement does not include the record of search made by Police. 1925 M. 574, or signature on blank paper for purposes of comparison. 56 B. 304.
8. Identification of a person amounts to statement and is inadmissible in the usual course. 1921 A. 215, 1935 C. 311 *Contra* 1929 N. 36, 1920 P. 334.
9. Noting of gist of statement amounts to "reduced into writing." 1933 P. 589.

Strangulation—(contd.)

Too much importance must not be attached to this supposed correspondence when the ligature is not forthcoming. In manual strangulation the marks of bruising and ecchymosis will be in the front of the neck, chiefly about the larynx and below it. Greater importance is to be attached to the lividity, ecchymosis, and abrasion of the skin in the course of the ligature than to the circularity of the depression produced by it. *Taylor's Med. Jur.*, 1928, P. 657.

2. In the strangling of a living person by a cord, it is scarcely possible that a murderer can avoid producing on the neck marks of severe injury, and in the existence of those we have evidence of the violent manner in which death has taken place. Fracture of the hyoid bone is extremely rare except in cases of manual strangulation, in which it is relatively common. *Ibid.*, P. 658.

4. Was death due to—

1. In the absence of ecchymosis from the neck, it will be difficult to form an opinion, unless from circumstantial evidence. There may not always be an accchymosed circle for a person may be strangled by the application of pressure to the neck through the medium of the finger-nails or of any hard or resisting substance. *Taylor's Med. Jur.*, 1928, P. 659. *Lyon's Med. Jur.*, 1935, P. 305.
2. In the absence of all marks of violence round the neck, we should be cautious in giving an opinion which may affect the life of an accused party, for it is not probable that homicidal strangulation could be accomplished without the production of some appearances of violence on the skin over the larynx or windpipe. It is doubtful whether strangulation can ever take place without some mark being found on the neck indicative of the means used. There is nothing to justify a witness in stating that death has proceeded from strangulation if there should be no appearance of lividity, ecchymosis, or other violence about the neck or face of the deceased. When there are signs of mechanical violence to the neck, such as fracture of the larynx or windpipe or hyoid bone, with laceration of the muscles, and a visible depression, such as a cord, a ligature, or manual pressure would produce, a medical opinion may be fairly given in spite of putrefaction. *Taylor's Med. Jur.*, 1928 Ed., P. 660.

5. Was it accident, suicide or homicide.

1. Before a charge of murder by strangulation is raised against any person from marks or appearances found on a dead body care should be taken that they admit of no other probable explanation than the direct application of violence. *Taylor's Med. Jur.*, 1928, Vol. I, P. 665.
2. Even if marks indicative of strangulation are discovered, the question arises whether they may not have been produced by the deceased upon himself in an attempt at suicide which may have failed. If the body of a person is allowed to cool with a handkerchief, band, or tightly fitting collar round the neck, a mark resembling that of strangulation may be produced. Supposing the marks of fingers or finger-nails exist, the presumption is in favour of homicide. In cases in which strangulation has resulted from a compression of the windpipe by the fingers (throttling), and where there are ecchymosed marks indicative of direct violence, we have the strongest presumptive evidence of murder for neither accident nor suicide could be urged as affording a satisfactory explanation of their presence. If, besides these marks of fingers, we find a circular mark with a ligature still around the neck, the presumption of murder becomes very strong. In homicidal strangulation, from the unnecessary violence used, we may expect to find the skin much ecchymosed, lacerated, or excoriated, and the deep seated parts, such as the muscles and vessels, more or less bruised or lacerated. The hyoid bone, larynx or trachea may show signs of pressure. Such a degree of violence is not to be expected in suicidal strangulation. *Ibid.* pp 666 667. *Lyon's Med Jur.*, 1935, pp. 305 306.

6. Nature of ligature—marks on the neck.

1. The condition of the mark on the neck, the course and direction of the cord, the mode in which it was secured or fixed in order to produce effective pressure on the windpipe, the amount of injury to the muscles and parts beneath, are circumstances from which, if observed at the time, a correct medical opinion may generally be formed. If the means of constriction are removed, or the cord or ligature is loosely applied, these facts unless explained, are presumptive of homicide. *Taylor's*

STRANGULATION. *See* Murder—43, Culpable homicide—30, Suicide, hanging—14.

1. Definition.

Strangulation may be defined as an act of violence whereby constriction is applied to the neck (air-passages and blood vessels) by some means other than the weight of the victim's body. *Taylor's Med. Jur*, 1928, Vol. I, P. 655.

2. Distinction between hanging and—.

1. In hanging the phenomenon of asphyxia takes place in consequence of the suspension of the body, while in strangulation asphyxia may be induced not only by the constriction produced by ligature round the neck independently of suspension, but by the simple application of pressure (throttling), through the fingers or otherwise on the windpipe. While the proof of death from hanging leads to a strong presumption of suicide, the proof of death from strangulation is *prima facie* evidence of murder. *Taylor's Med Jur*, 1928, P. 654. It differs from strangulation in that in the latter some external force other than the weight of the body is the means by which the neck is constricted. *Ibid*, P. 682.
2. Marks on the neck from strangulation differ from hanging marks in being truly transverse in direction, low on the neck and continuous. Saliva running in straight lines down the chin and chest, a common appearance in death from hanging, is not present in strangulation. In strangulation, less often than in hanging, rapid death may take place from inhibition of the heart. *Lyon's Med. Jur.*, 1935 pp. 302—304.

3. Post mortem appearance in—.

1. The face may be livid and swollen, the eyes wide open, prominent, and congested, the pupils are dilated, the tongue swollen, dark coloured and protruded; it is sometimes bitten by the teeth and a bloody froth escapes from the mouth and nostrils. If much force has been used in producing the constriction, the windpipe, with the muscles and vessels in the forepart of the neck, may be found cut or lacerated, the hyoid bone is sometimes fractured, and even the vertebrae of the neck may be damaged. The mark on the neck when a ligature has been used is commonly described as a depression, wide but not deep, and corresponding in its characters to the form and thickness of the ligature and the mode in which it has been secured.

Strangulation—(contd.)

Too much importance must not be attached to this supposed correspondence when the ligature is not forthcoming. In manual strangulation the marks of bruising and ecchymosis will be in the front of the neck, chiefly about the larynx and below it. Greater importance is to be attached to the lividity, ecchymosis, and abrasion of the skin in the course of the ligature than to the circularity of the depression produced by it. *Taylor's Med. 2. In the strangling of a living person by a cord, it is scarcely possible that a murderer can avoid producing on the neck marks of severe injury, and in the existence of those we have evidence of the violent manner in which death has taken place. Fracture of the hyoid bone is extremely rare except in cases of manual strangulation, in which it is relatively common. *Ibid, P. 658.*

4. Was death due to—

1. In the absence of ecchymosis from the neck, it will be difficult to form an opinion, unless from circumstantial evidence. There may not always be an ecchymosed circle for a person may be strangled by the application of pressure to the neck through the medium of the finger-nails or of any hard or resisting substance. *Taylor's Med. Jur., 1928, P. 659. Lyon's Med. Jur., 1935, P. 305.*
2. In the absence of all marks of violence round the neck, we should be cautious in giving an opinion which may affect the life of an accused party, for it is not probable that homicidal strangulation could be accomplished without the production of some appearances of violence on the skin over the larynx or windpipe. It is doubtful whether strangulation can ever take place without some mark being found on the neck indicative of the means used. 5. Was it accident, suicide or homicide.

1. Before a charge of murder by strangulation is raised against any person from marks or appearances found on a dead body care should be taken that they admit of no other probable explanation than the direct application of violence. *Taylor's Med. Jur., 1928, Vol. I, P. 665.*

6. Nature of ligature—marks on the neck.

1. The condition of the mark on the neck, the course and direction of the cord, the mode in which it was secured or fixed in order to produce effective pressure on the windpipe, the amount of injury to the muscles and parts beneath, are circumstances from which, if observed at the time, a correct medical opinion may generally be formed. Strangulation—(concl'd.)*Med. Jur.*, 1928, Vol. 1, P. 671.

2. Thus, if the cord or ligature should be found loose or detached, if the ecchymosis or mark in the neck should not accurately correspond to the points of greatest pressure if, moreover, the means of constriction were not evident when the body was first discovered and before it had been removed from its situation, there would be fair grounds for presuming that the act was homicidal. If the ligature be still around the neck, the position of the knot may throw some light upon the case, if tied in two or three knots at the back of the neck, the presumption is in favour of homicide. In all cases the cord or ligature, if forthcoming, should be examined in order to determine whether it bears upon it marks of blood, or whether hair or other substances are adhering to it. Sometimes strangulation had been suicidally effected by a rough cord passed repeatedly round the neck, and tightened by being pulled with each hand. No hard and fast rule can be laid down on the subject it is necessary to judge each case on its own merits. *Ibid.* pp. 672—674.
3. If a ligature has been used, a mark, save in exceptional case, would be found on the neck. This differs from banging mark, in being transverse in direction, low on the neck and continuous, i. e., completely encircling the neck. The marks left on the throat in throttling are dark in colour and correspond to the shape of fingers. If one hand has been used, severe bruises may be found on one side of the neck. Frequently nails may cause cuscate abrasions on the throat. *Lyon's Med. Jur.*, 1935, pp. 302-303.
4. Strangulation by compression of the neck with a stick or other hard substance is often met with in India. This causes abrasions and bruises on the front of the neck, and usually severe local injury such as fracture of the cartilages on hyoid. *Lyon's Med. Jur.*, 1935, Ed., P. 304.

7. Circumstantial evidence—

1. Without circumstantial evidence, the best medical opinion in these cases will often amount to nothing. It is a mistake to suppose that we must in all cases look to medical circumstances alone for clearing up intricate questions. It is scarcely to be imagined that any person who did not contemplate suicide would retire to rest with a handkerchief tied in a double knot so tightly around the neck as to render it very difficult to remove. It requires but little ingenuity to see that circumstantial evidence may be almost the only support of a theory either of suicide or homicide; time, place, locked doors, fastened windows, motives, etc., etc., may all play their part. *Taylor's Med. Jur.*, 1928, pp. 674—676.
2. Blue nails will confirm the suspicion of asphyxia aroused by other appearances. *Lyon's Med. Jur.*, 1935, P. 715.

SUFFOCATION. See Hanging.

1. Death caused in.—See Culpable homicide—31. Attempt to murder—6.

Death by suffocation is caused by means other than direct pressure on the windpipe, as for example:—(1) by the closing of the mouth and nostrils; (2) by pressure on the chest; (3) by the blocking of the lumen of the glottis or air tubes; and (4) by an atmosphere deficient in oxygen. *Lyon's Med. Jur.*, 1935, P. 306.

2. Definition.

By "suffocation" we are to understand that condition in which air is prevented from penetrating into the lungs, not by constriction of the windpipe, but by some mechanical cause operating (a) externally by pressure on the chest, or by blocking the mouth and nostrils; or (b) internally by closing the lumen of the throat, windpipe.

Suffocation—(concl'd.)

and air-passages. The term "suffocation" is applied to various conditions in which the symptoms and effects differ. Smothering is a variety of suffocation, and is caused by covering the mouth and nostrils in any way so as to prevent the free ingress and egress of air. *Taylor's Med. Jur.*, 1928, Vol. I, P. 610.

Symptoms. Same as in hanging.

Post-mortem appearance.

There are rarely any considerable marks of violence externally. When the body has become perfectly cold, there may be patches of lividity diffused over the skin; but these are not always present. The lips are livid; the skin of the face and neck may be pale, or present a dusky-violet tint; the eyes are congested; and there is a mucous froth about the lips and mouth. None of these signs are at all characteristic, and the absence of all of them is no proof that death did not occur from suffocation; if they are present they certainly offer grounds for preliminary suspicion. The stomach and intestines have been observed to present patches of lividity. The kidneys may be more strongly congested with blood than the liver, spleen and other organs. The vessels of the brain are sometimes congested, but at other times they do not appear to be more than ordinarily full. *Taylor's Med. Jur.*, 1928, Vol. I, pp. 611-612.

Was it accident, suicide or homicide.

1. Homicide by suffocation is not likely to be attempted on a healthy adult person, unless he is rendered defenceless by intoxication. As an accident, smothering may conceivably take place when a person falls, in a state of intoxication and debility, so that his mouth is in any way covered, or the access of air to the mouth or nostrils is interrupted. *Taylor's Med. Jur.*, 1928, P. 618.
2. If the person has been able to struggle, it is probable that marks of violence, in the shape of scratches or bruises, may be found about the mouth and nostrils, with bruises or marks of pressure on the chest, legs or arms, and a bloody mucous froth in the air-passages. It is certain that most individuals would have it in their power, unless greatly incapacitated by disease or intoxication, to offer such a degree of resistance as would leave upon their bodies indubitable evidence of murderous violence. Death by suffocation may be considered as presumptive of homicide, unless the facts are clearly referable to accident. *Ibid*, P. 619.
3. Accidental suffocation is, however, so palpable from the position of the body and other circumstances, that when death is clearly traced to this cause it is not easy to conceive a case in which it would be difficult to distinguish it from one of murder. Infants often lose their lives by accidental suffocation in consequence of the reprehensible habit followed by nurses of stuffing into the mouth a little bag filled with sugar or other sweet material, in order to quiet the child. *Ibid*, pp. 619-622.
4. If the deceased is an adult the presumption is always in favour of accidental suffocation. *Lyon's Med. Jur.*, 1935 Ed., P. 309.

Held, they were guilty under S 306. 36 A 25.
2. In a case of suttee, A ordered the pile to be lighted. B did not then assist but afterwards when woman fled from the pile induced her to return. A was guilty of abetment of culpable homicide but B, of abetment of suicide only. 1 R. J. P. J. 174.

8. Statements made by a person about his own ill-treatment, before he committed suicide, are admissible under S. 32 (1), Ev. Act. 20 P. R. 1916 Cr.

3. Causes of—

- (a) *Grief or shame.* Numerous instances are recorded by wives after quarrel with their husbands or with their husband's relatives. *Pregnancy* following illicit intercourse has also led to suicide. In the case of males it is due to mental distress on account of domestic quarrels or pecuniary losses. Instances are also met with of suicide from distress of mind arising from arrest on criminal charges. (b) *Physical suffering.* Severe physical pain is a frequent more or less direct cause of suicide, particularly among females. (c) *Revenge.* One form of suicide is the practice known as sitting "Dharna" or starving himself at the door of an enemy or debtor. Chevers mentions a case of a man at Singapur who cut his throat at his neighbour's door in order to get him hanged. (d) *Domestic troubles and worries.* The mental distress arising out of quarrel with husband or husband's relations is a common cause of suicide. (e) *Venereal Disease* is sometimes the cause. *Ibid.* (f) *Fanatic, religious and imitative* e.g. Satti. Lyon's *Med. Jur.* 1836, P 341.

4. Disappearance of evidence of.

Since suicide is no offence, the removal or concealment of body is no offence under S. 201. 17 P. W. R. 1911 Cr., 1934 S. 139.

5. Threat to commit— See Criminal intimidation—13.

6. Whether wound is homicidal or suicidal ?

The question whether a wound is due to homicide or suicide can be answered by:—
(a) *The nature or appearance of the wound* (b) *The Position of the wound.* (c) *Detection of wound.* (d) *Number of wounds* —

1. *Extensive anti mortem abrasions* on a body are always suggestive of accidental death. Abrasions are not usually found on the bodies of suicides, nor on those of murdered. *Lyon's Med. Jur.*, 1935, P. 227.

Suicide—(contd.)

2. Severe contusions tell against suicide, except in the rare cases of persons falling from heights. An individual contemplating suicide will not choose a blunt weapon *Ibid*, P. 228.
3. *Incised wounds* inflicted with a sword, axe or other heavy weapon, point to homicide. The position on the throat, the severity and the direction will determine whether a wound is homicidal or suicidal. *Ibid*, P. 228.
4. The typical homicidal throat wound is situated below the Pomum Adami, that of suicide above it. The plane of the homicidal wound is generally horizontal, that of suicidal one is upwards. If more than one severe wound is present the case is one of murder. The homicidal wound is generally more severe than the suicidal one. It is scarcely possible that one of two persons equally matched as regards strength could cut the throat of the other if he was awake. He might stab him on the throat, but could not inflict the typical throat wound unless assisted by another. *Ibid*, pp 228-229.
5. *Blood stains* on the back of the hand, thumb, and first finger point to self-destruction. *Ibid*, P. 232.
6. A cut in the clothing corresponding in position to that on the body is almost proof of murder. The suicidal wound is generally high on the throat. *Ibid*.
7. The presence of the weapon used near the body points to suicide, though sometimes it is put aside. *Ibid*.
8. The weapon tightly grasped in the hand forms an absolute proof of suicide. *Ibid*.
9. Incised wound over the wrist or bend of the elbow are sometimes suicidal. *Punctured wounds* are seldom suicidal. Occasionally a person stabs himself on the abdomen or throat. A number of stabs scattered over various parts of the body mean murder. P. 233.
10. *Blood stains* on the inner side of the hand and little finger suggest suicide. A person who is murderously assaulted will naturally attempt to ward off the blows or to seize the weapon and in so doing is liable to receive very characteristic injuries. *Ibid*.
11. *Lacerated wounds* are seldom suicidal. *Ibid*.
12. The most convenient site for a self-inflicted gunshot wound is temple or the heart. In case of suicidal wounds the weapon must of necessity be discharged close to the body. The firearm firmly grasped in the hand proves suicide. *Ibid*, P. 234.
13. If a fatal, an incised or punctured wound, exists on the back of the head or chest, if the hand or hands of the deceased are also wounded, it is evident that resistance had been made, and murder generally proved. A suicide inflicts wound on the anterior surfaces of the face, chest, and abdomen, and almost always in an oblique direction from right to left, those made by an assassin are from left to right. *Ryan's Med Jur.* 1836, P. 340.
14. *Position and surrounding of the wounded person* Position of the body indicates self destruction or accident, as, for example, when the body is found at the foot of some high object, from the top of which it may have fallen. Sometimes to conceal the murder the body is put in such a condition, as at the foot of a high tree or on a Railway line. Peculiarities of the clothes are likely to have modified the injuries received or to affect the condition of the weapon used, e.g., a thick turban may cause a severe blow to produce simple instead of compound fracture of skull, or the fibre of cloth may stick to weapon to be identified later on. Marks of bloody hands on the body of an injured person or stains of seminal fluid on clothes or body of a female corpse may indicate homicidal violence. Want of correspondence in situation between cut on the clothes and wounds points to self infliction to support a false charge or avert suspicion. Nature, position and condition of objects on or near the spot are important, e.g., weapon, clothes, blood-stained clothes, bullet marks, foot prints of persons other than the deceased or marks indicating struggle. Bullet marks or shot holes by their situation may indicate the position of the assailant at the time the weapon was discharged. *Lyon's Med. Jur.*, 1935 pp. 234, 235.

3. The table must not be taken as of mathematical certainty, but may represent fair averages. The rate of digestion varies with different individuals and with the state of the gastric mucosa. Death does not at once cause the process of digestion to stop, as we know that the stomach can even digest itself after death. With all

this uncertainty, too much stress must not be placed on weighed along with all other items. *Ibid*, P. 295.

4. Periods given above do not refer to the digestion of India on which but few observations or experiments have been. India use either rice, wheat, or other grains as their staple many use some of the pulses, and comparatively few eat experiments and observations seem to show that some pulses, etc., may be found undigested even six or seven food. *Taylor's Med Jur.*, 1928, pp. 917-918.

2. From warmth and condition of Muscles.

1. The changes which take place in dead body before commence may sometimes enable a medical witness to form an opinion the deceased died. The crime may have been so recently body still retains the warmth and pliancy observed in the recent found in a cold and rigid state. A person charged with a crime prove that he had not been in the house for many hours or days be adduced to show that he was there at a time which would condition of the body when found. *Taylor's Med. The upper limbs were cold face, shoulders and chest were cold, the neck was rigidly fixed with thighs and legs were quite cold, but there was no rigidity in these warmth found in the body was in the lower part of abdomen. The was that the deceased had been dead above four hours, certainly and not less. *Ibid*, P. 291.
3. Unless we have due regard to all the circumstances of a case, grave committed. The circumstances are cold atmosphere, thinness of body covering, age of the deceased, loss of blood, etc. The retention of abdominal viscera may be met with after fifteen to twenty hours. If temperature of the viscera of the abdomen, more than seventeen hours was found to be 76°F., although no care had been taken to preserve the body. *Taylor's Med. Jur.*, 1928, pp. 293-294.

3. From Putrefaction. See Putrefaction.

It is beyond the reach of science to determine with accuracy the period of the progress of putrefaction. When a body is inspected within twenty-four as a rule, the body is rigid, and no decomposition has taken place. If a three days much change should be present, it is generally to be attributed peculiarity in the cause of death. It is a common observation that moist atmosphere appears to favour decomposition much more than heat; thus is much more rapid on a moist winter's day than on a hot dry day in *Taylor's Med. Jur.*, 1928, pp. 295-296-306.

3. Burden of proof

The *onus* is on the complainant to prove that the accused acted dishonestly but on the accused to bring himself within the exception. 8 C. W. N. 421.

2. A general resemblance constitutes infringement. 16 Bom. L. R. 78.

3. If the resemblance to a genuine one is intended to deceive and to lead a purchaser to imagine that the counterfeit is in reality genuine article, the accused is guilty. 35 P. R. 1902 Cr.

C. 477, 1934 L. 687, 15 Cr. L. J. 522, 1928 B. 227.

TRADE MARK (USING FALSE). S. 482, I. P. C.**1. Burden of proof.**

1. When it has been proved that a trade mark is a false trade mark, then it is to be presumed that the accused had the intent to defraud unless or until he rebuts the presumption. The burden of proving the absence of such intention is on the accused. 1929 R. 345=118 I. C. 113=7 R. 169. 1929 R. 322 Diss. from.

2. Even though there are no cases of purchasers having been deceived by the use of a false trade mark, this fact alone is insufficient to justify the contention that accused acted without intent to defraud. 1929 R. 322.

2. Civil and Criminal remedies.

1. Where a *bona fide* dispute exists between the parties as to the right to use a trade mark, action should be taken before a Civil and not a Criminal Court. 11 C. W. N. 887.

 3. If the purchaser looking at the article offered to him would naturally be led from the mark on it, to suppose it to be production of the rival manufacture and would purchase it in that belief the Court considers the use of such mark to be fraudulent. 1929 R. 322, 9 Bom. L. R. 732.

1. The insufficiency of grounds for transfer would not lead to a necessary inference that there was misconduct on the part of the Legal Practitioners, who were responsible for such an application. 1928 A. 396=29 Cr. L. J. 750, 1924 A. 253 Dist.
2. In applications for transfer, statements imputing prejudice or unfairness or corruption to the Magistrate should not be made unless statements of clients as tested by legal aiders are guilty of professional misconduct. 2

12. Effect on Magistrate (Slur).

1. No slur is cast on a Magistrate from whose file a case is transferred. 1924 C. 981=23 Cr. L. J. 944=81 I. C. 560=39 C. L. J. 330, *Contra* 6 Bom. H. C. R. 69.

14. From Jury District to non-Jury District.

15. Grounds for— See Transfer (grounds of).

15-A. Notice. See—8-D.

21. Stay of Proceedings. See—2—3. S. 526 (8).

22-A. Who can apply.

TRANSFER—(GROUNDS OF). S. 526, Cr. P. C. *See* Disqualification of Magistrate.**1. Absence of Legal Advice.**

1. Where no legal practitioner in a District ordinarily employed in criminal case is willing to act for the accused, it is good ground for transfer of the case to another District. 1925 O. 67=88 I. C. 1048=26 Cr. L. J. 1272, 1927 L. 709=104 I. C. 227=28 Cr. L. J. 787.
2. Where proceedings under S. 107, Cr. P. C. assumed an importance of their own in the locality and it appeared that the accused could not get legal assistance because their lawyers were systematically worried by the authorities, the case should be transferred where a quiet atmosphere prevailed. 1930 L. 954=31 P. L. R. 694=129 I. C. 684.
3. Where the accused by reason of the order of his superior officers was practically detained in the Police lines and was not allowed to go out to see legal practitioners, the High Court condemned the action of the authorities. 49 I. C. 854=23 C. W. N. 479=20 Cr. L. J. 230.

2. Accused appointed special constable.

Where persons proceeded against under S. 107, Cr. P. C., were appointed special constables, a good ground for transfer is made out. 11 C. W. N. 121, 10 C. W. N. 82.

3. Acquaintance with the Magistrate

1. The fact that the complainant and the accused are both acquainted with the Magistrate who sometimes gets medical help from each is no ground for transfer. 13 P. W. R. 1917 Cr
2. The fact that the accused is an acquaintance of the Magistrate is no ground for transfer. 16 A. L. J. 490

4. Accused's movement restricted by Police Superintendent

Where the Superintendent of Police ordered that the petitioner should be allowed facilities for instructing legal adviser only on application to him, and it causes a reasonable apprehension in the mind of the petitioner that his movements were unduly restricted, it is good ground. 52 I. C. 595=29 Cr. L. J. 383, 20 Cr. L. J. 230=675.

5. Adjournment. *See* Transfer—2—3.

1. Where adjournments are repeatedly made by a trying Court to bring pressure on the accused to produce his absconding co accused persons, the accused must have had reasonable apprehension that he would not have a fair and impartial trial. 1930 L. 953=129 I. C. 485=32 Cr. L. J. 344.
2. That the case has been unnecessarily adjourned on several occasions in order to enable the complainant to appear is not sufficient ground for transfer. 1926 L. 628=27 Cr. L. J. 1022=96 I. C. 878
3. Refusal to adjourn a case, when a party has noticed his intention to the Magistrate, to move the High Court for transfer, is a good ground for transfer. 1925 S. 248=96 I. C. 391=27 Cr. L. J. 935, 1933 L. 914=34 Cr. L. J. 400.
4. The fact that Court awards costs of adjournment and makes local inspection is no ground. 19 Cr. L. J. 6, 19 A. 302

6. Altercation between Judge and Counsel.

A quarrel or unpleasantness between the Judge and the counsel is no ground for transfer. 40 I. C. 318=18 Cr. L. J. 670

7. Apprehension of impartiality in the mind of the accused. *See* Transfer—6.**7-A. Apprehension of not having a fair trial.**

1. If the Magistrate though not actually biased still conducts his self in such a manner

- and utters such words as to impair the confidence of any of the parties, then there is good ground for transfer of the case. 25 C. 727, 28 C. 709, 3 L. 443.
 2. If Magistrates allow their executive zeal to appear to outrun their judicial discretion their action is certain to induce the party to make an application for transfer. 9 Cr. L. J. 251, 1928 L. 125=29 Cr. L. J. 212.
 3. In transferring a case High Court ought not to be guided by the impressions produced in its own mind as to the impartiality of the Magistrate but must look to the effect likely to be produced in the minds of the parties and their witnesses by the selection of a Magistrate whose personal antecedents or circumstances have however unavoidably connected him with either one party or the other. 25 B. 179.
 4. When there are circumstances existing to create a reasonable apprehension in the mind of the accused, that he will not receive a fair trial, a transfer should be directed though there is really no bias in the mind of the Court and though the circumstances are capable of explanation. 3 L. 443, 28 C. 297, 23 C. 495, 33 C. 1183, 25 B. 179, 18 C. 247, 19 A. 64, 20 Cr. L. J. 556, 25 Cr. L. J. 638, 81 I. C. 78, 1933 R. 89, 1922 A. 528, 36 A. 239, 1924 C. 981, 28 C. 709, 1933 P. 597.
 5. When sufficient grounds are made out for a transfer, the High Court is precluded from considering the possible effect which the transfer may have on the reputation or authority of the Magistrate concerned. 10 C. W. N. 441.
 6. Magistrates should not fail to remember that it is their duty no less to preserve an outward appearance of impartiality than to maintain the internal freedom from bias. 1 S. L. R. 8=9 Cr. L. J. 251.
 7. What is reasonable apprehension must be decided according to the special circumstances of a particular case. 33 C. 1183, 36 C. 924.
 8. Mere allegations that accused will not have fair and impartial trial is not sufficient. He should place before Court facts and circumstances from which he is led to entertain such a belief. 13 P. W. R. 1917, 10 O. C. 195, 6 L. 396, 1935 S. 237, 18 Cr. L. J. 670, 1933 S. 17, 18 Cr. L. J. 644, 1928 L. 276, 6 C. 491.
 9. What is reasonable apprehension must of course depend upon the degree of intelligence of the accused. 81 I. C. 126=1925 C. 101, 104 I. C. 227=1927 L. 709, 1925 L. 361, 3 L. 443=1923 L. 264.
 10. The law of transfer of cases is based not so much upon the motives which might be supposed to bias the Judge as upon the susceptibilities of the litigant parties. The object is to clear away everything which might engender suspicion and distrust of the tribunal and so to promote the feeling of confidence in the administration of justice. 2 P. L. T. 193, 7 N. L. J. 155, 6 L. 396, 1929 C. 809, 1932 R. 90, 1933 S. 361, 1924 N. 243.
 11. It is not necessary for a petitioner to establish that the Magistrate is actually prejudiced against him but to prove that the conduct of the trial had been such as to cause a reasonable apprehension in the mind of the accused that he will not receive a fair trial. 109 I. C. 812=29 Cr. L. J. 620, 1930 A. 737=31 Cr. L. J. 535, 1928 A. 396, 10 L. 223=1929 L. 382, 1930 L. 877, 35 Cr. L. J. 1380, 1933 N. 269, 1934 O. 452=25 Cr. L. J. 1483, 23 C. 297, 6 L. 396, 1929 L. 429, 1927 L. 709, 9 L. 537=1923 L. 1, 23 C. 495, 19 A. 64, 1921 P. 413, 35 A. 5.
 12. In transferring a case the question is not whether the belief that the applicant would not get justice is reasonable or not, though the only way deciding whether it exists or not, is to see whether it might reasonably be expected to exist in a person of the standard intelligence and honesty common in the class to which the accused belongs. 1927 N. 384=99 I. C. 860=23 Cr. L. J. 188, 1926 N. 448, 1927 N. 48.
 13. If there are grounds, which a reasonable person placed in the position of an accused person considers it sufficient for entertaining apprehension that accused will not have a fair trial, the case should be transferred. 1923 L. 460=29 Cr. L. J. 295.
 14. It is fundamental principle of justice that Magistrate should not only be fair and impartial but should appear to be so. 10 R. 180, 23 C. 709, 3 L. 443, 1925 L. 101, 1933 S. 361, 1923 L. 757, 1934 L. 541.

2. Where accused suspected that the whole atmosphere in the place of trial was against him and was afraid that local authorities would influence the Magistrate in prejudicing his mind against him, the case should be transferred. 1924 N. 243=83 I. C. 723=26 Cr. L. J. 163, 1931 L. 540=134 I. C. 519=32 Cr. L. J. 118.

9. Attempt to compromise the case by Magistrate.

1. If the Magistrate makes an attempt to compromise the case, it is a good ground for transfer 1925 O. 179=81 I. C. 58=25 Cr. L. J. 570, 105 I. C. 812, 35 A. 5, 1931 L. 32=130 I. C. 430, 1925 A. 289=26 Cr. L. J. 869, 1922 O. 124, 1934 L. 541, 14 Cr. L. J. 602, 1930 L. 877, 1927 N. 384.
2. It is highly improper for a Magistrate to send for a party in a case to his house and press him to compromise. 1931 L. 32=130 I. C. 430=32 Cr. L. J. 537.

10. Attitude of Magistrate.

1. When the supposed displeasure for a Magistrate is inferred from his attitude, it is not a good ground for transfer. 58 I. C. 681.
2. If the Magistrate became angry with the accused in another case, if he is an ignorant villager, he would believe that for that reason the Magistrate would be prejudiced against him. 125 f. C. 32=1930 A. 495=31 Cr. L. J. 764.

11. Awarding costs for adjournment.

Awarding costs for adjournment is no valid ground. 19 Cr. L. J. 6, 19 A. 302.

12. Bad opinion of accused.

Where Magistrate disallowed certain relevant questions in the cross-examination and recorded an opinion unfavourable to the accused, the High Court transferred the case. 52 I. C. 54=20 Cr. L. J. 556.

12-A. Bail—Refusal of. See 47—15, 56.

1. In a case under S. 110 sureties were offered and the Magistrate ignored provisions of S. 122, Cr. P. C., transfer was ordered. 1935 A. 517=36 Cr. L. J. 1285.
2. Accused had been ordered to be released on bail, but the Magistrate erroneously refused to accept bail for 3 weeks, the case was transferred. 1932 L. 440=34 Cr. L. J. 89

13. Bias on the part of the Magistrate.

2. The exercise by the Magistrate of the discretion vested in him by law in granting bail is no proof of bias on his part. 1925 S. 257=95 I. C. 939=27 Cr. L. J. 859.
3. Where the District Magistrate refuses to produce the papers called for by the defence on the ground that some are missing and others are confidential, it cannot be said that the trial Court entertains any bias against the accused. 20 Cr. L. J. 609.
4. It is rarely possible for the accused to prove actual bias. It is sufficient to show circumstances which may raise a reasonable apprehension in the mind of the accused that he will not have fair and impartial trial, although the circumstances may have happened without any real bias in the mind of the Magistrate 35 A. 5, 2 Weir 678, 18 C. 247, 23 C. 495, 25 C. 727, 28 C. 700, 33 C. 1183, 19 A. 64, 25 B. 179, 1928 A. 396=110 I. C. 686.
5. For a transfer of a case on the ground of bias, the applicant must show the very clearest grounds for believing that the Magistrate is likely to be prejudiced or influenced by an improper motive in the decision of a case. 6 B. H. C. R. 69, 1817 A. W. N. 139.
6. Magistrate acting as the mouthpiece of prosecution is a good ground. 1930 L. 173=31 Cr. L. J. 736, 1930 L. 166=31 Cr. L. J. 560.

A District Magistrate cancelled a license for arms and refused to grant interview to the licensee. These are sufficient grounds for transfer. 35 A. 5.

15. Cancellation of bail bond after application under S. 526.

1. Cancellation of bail bond after the Magistrate came to know that the party has moved the High Court for transfer is a drastic step and causes a reasonable apprehension in the mind of the accused about impartial trial. 1930 L. 958=130 I. C. 501, 1933 L. 914=34 Cr. L. J. 900, 1933 O. 480, 1920 P. 492, 5 C. W. N. 110.
2. Where after the application for adjournment of the case to enable the accused to apply to High Court for transfer, the Magistrate raised the amount of bail of some and cancelled the bail of the other accused. Held, it was a sufficient ground for transfer. 1 P. L. T. 652, 57 I. C. 454.

16. Co-accused found guilty.

The fact that certain persons jointly tried with the accused were subsequently separately tried and found guilty, is no ground for a transfer. 23 I. C. 205=15 Cr. L. J. 253.

16.A. Compromise by Magistrate. See—9.**17. Convenience of parties.**

1. Convenience of accused has to be considered rather than that of the complainant for transferring a case. 1926 L. 493=94 I. C. 131=27 Cr. L. J. 563, 1924 P. 708=25 Cr. L. J. 81, 55 B. 576=1931 B. 313, 2 Bom. L. R. 394.

4. In transferring a case no consideration should be had to the fact that by the transfer to a particular District, the accused will have the benefit of a trial by Jury, where previously he had none. The real question is the convenience of the parties. 8 C. L. J. 59.
5. The fact that it would be inconvenient for the person proceeded against under S. 110, Cr. P. C., to summon witnesses from the place of his residence, is no ground for transferring the case to the Court in whose jurisdiction he resides. 1927 S. 59=98 I. C. 109=27 Cr. L. J. 1261.
6. The convenience of defence witnesses when they are numerous will outweigh that of the prosecution witnesses when they are few. (1897) Ratan Lal 927.

8. When proceedings were started in another District to harass the accused, case was transferred. 1927 L. 271.
9. Where accused was tried for offences committed in several places, the case was transferred to the District where bulk of the prosecution witnesses resided. 8 Cr. L. J. 121.

Transfer (Grounds of)—(contd.)

18. Consultation with superior officers.

Where a Magistrate before disposing of a bail application, consulted the District Magistrate and refused the application as advised by the latter, the case should be transferred. 9 L. 537=1928 L. 1, 1932 R. 90, 1934 N. 39.

19. Cross-complaints or counter cases. See—36.

1. It is desirable that cross complaints should be disposed of by the same Magistrate. The mere fact that the complaint of one body is dismissed and that he is apprehensive of a conviction is by itself no ground for a transfer. 1929 L. 48=111 I. C. 854=29 Cr. L. J. 934, 1923 C. 644, 56 M. 159=1933 M. 367, 1930 M. 190, 31 C. 715, 1924 O. 247, 22 Cr. L. J. 416, 1933 N. 201=34 Cr. L. J. 1035.
2. The fact that a Magistrate has discharged a cross case between the same parties is not *per se* a sufficient ground for transfer. 15 I. C. 804=13 Cr. L. J. 532. See 33 C. 904.
3. That a Magistrate in a counter case has clearly formed an opinion strongly against a party is a sufficient ground for transfer. 8 I. C. 721=11 Cr. L. J. 702, 9 Cr. L. J. 275.
4. Where in two counter complaints the parties are same, dismissal of one complaint is no ground for transfer of the other. 1935 S. 72=1935 Cr. C. 277. 1 S. L. R. 37=9 Cr. L. J. 275, 5 S. L. R. 264=13 Cr. L. J. 532 and 1929 L. 48=111 I. C. 854=29 Cr. L. J. 934 Rel. on.

20. Cross-examination of accused.

Where the Magistrate refused to give facilities to the accused to prosecute his civil case, connected with the same fact, and while examining him under S. 342, Cr. P. C., put questions by way of cross-examination and did not allow him to add to his statement. Held, the case should be transferred. 10 L. 223=1929 L. 382=110 I. C. 801=30 P. L. R. 385.

21. Cross-examination of witnesses by Court or its refusal.

1. It is not proper for a Magistrate to frequently cross-examine prosecution witnesses or disallow questions which the complainant may desire to put to the defence witnesses for the purpose of showing their partiality. It does not give rise to apprehension about the impartiality of the Magistrate. 1925 O. 52=25 Cr. L. J. 1185.
2. Where the trying Magistrate stopped the cross-examination of the complainant because he had been fully cross-examined for one hour, his action is indiscreet and the case should be transferred. 51 I. C. 847=20 Cr. L. J. 559=1919 P. 515.
3. The mere refusal by the Magistrate to allow the accused to cross-examine the complainant is no ground for transfer when the case has reached a very advanced stage. 40 I. C. 690=29 P. W. R. 1917 Cr., 1 Cr. L. J. 832.
4. In a case under S. 380, I. P. C., the Magistrate must give the opportunity to cross-examine the witnesses at once, even though the charge may not be framed, but a refusal to give such opportunity, when Magistrate acts *bona fide* under a mistaken view of law, is no ground for transfer. 8 C. W. N. 838.
5. When cross examination by Magistrate on question suggested by public prosecutor after defence cross-examination arouses suspicion in mind of accused, the case should be transferred. 1930 L. 173=124 I. C. 688=31 Cr. L. J. 736.
6. Refusal by a Magistrate to permit the cross-examination of the prosecution witnesses after all of them have been examined in chief, the refusal to give copies of Police statement and cancelling bail bond after application under S. 525 (8) are good grounds for transfer. 57 I. C. 454.
7. Magistrate put questions to witness which were prejudicial to accused, the case was transferred. 15 Cr. L. J. 234=1914 A. 49.

In transferring a case, it is the cumulative effect likely to be produced on the mind of an ordinary reasonable accused person that has to be seen. 1928 A. 396=110 I. C. 686=26 A. L. J. 1250=29 Cr. L. J. 750.

23. Copies of Police statement not given to accused.

1. Copies of statements recorded under S. 164 were not given to the accused and copies of statements recorded under S. 162 were not immediately supplied and the Magistrate asked the counsel to start cross-examination of the witness at 4.15 p.m., whose examination-in-chief lasted for a whole day. Held, that the case should be transferred. 1929 L. 429=117 I. C. 377=30 Cr. L. J. 760; 1925 L. 361 Foll.
2. A Magistrate cannot insist upon a written application for copies of statements to Police, an oral request being sufficient. Therefore insistence on a written application and refusal to grant copies on misapprehension of law or on other flimsy pretext are good grounds for transfer. 1930 A. 737=123 I. C. 685=31 Cr. L. J. 555.
3. Where the Magistrate improperly refused to furnish copies of statement under S. 162 and forwarded the record to Police to deprive him of his right under S. 191, Cr. P. Where a complaint is dismissed for default by a Magistrate, a fresh complaint based on the same facts but filed in another Court should be sent to the former for trial. 1926 L. 445=94 I. C. 911=27 Cr. L. J. 719.

25. Complaint sent to a Magistrate at the request of complainant.

26. Communal Feelings.

1. It is not a sufficient ground for transfer of a case that the presiding Judge belongs to Hindu or Moslem faith and cannot be expected to deal impartially with a communal dispute. 22 A. L. J. 1103, 1930 L. 163=121 I. C. 374=31 Cr. L. J. 257.

3. Where there is a certain amount of communal feeling over a case to such an extent that accused is unable to persuade the defence witnesses to appear before the Court and give evidence, as they are afraid of their safety, the case should be transferred to some other Court. 1927 P. 86=98 I. C. 607=27 Cr. L. J. 1391.
4. In a case of communal question, it is desirable that European Magistrate should enquire into and determine it. 1925 L. 626=87 I. C. 976=26 Cr. L. J. 1056, 1927 L. 520=28 Cr. L. J. 588, 16 Cr. L. J. 213, *Contra* 1934 L. 73.
5. Where communal questions are involved, a transfer should be granted with considerable hesitation. In such a case the matter is not to be decided in the abstract, whether a certain Magistrate would deal with a matter impartially or not; the question always would be whether through some error or unfortunate accident the Magistrate has behaved in a way to give legitimate ground for fear to one party or the other. Where a Hindu Magistrate without waiting for the report of the Police inquiry, conducted the local inquiry himself and delayed giving copies of statements to Police; held, that it was a proper case for transfer. 1930 A. 737=31 Cr. L. J. 555.

7. A Mohammadan Magistrate whose order for closing Jhatka shop was disobeyed, should not try the complaint lodged by Mohammadans, when the dispute became one of religious nature. 26 P. W. R. 1912 Cr.
8. The mere fact that a dispute is of communal nature is not sufficient to, is no ground for transfer. Reasonable apprehension that accused will not get fair trial is necessary. 1934 L. 73=15 L. 132=152 I. C. 171, 1928 N. 21 Foll. 27 I. C. 837, 1929 L. 626 and 1927 L. 520 Ref.

10. Blockstone properly observes that it is a "crime which ought to be strictly and impartially proved, and then as strictly and impartially punished. Jur.*, 1836, P. 198.

5. Impotency as defence. See Impotency.

6. Medical Examination.

1. Examination of the passive agent may show stains of blood or seminal fluid or characteristic gonorrhoeal discharge on his clothes, or person in the neighbourhood of the part. If the individual is a young boy or a person unaccustomed to the offence there may be found about the anus bruising or excoriations of the mucus membrane, or, perhaps, slight laceration of the sphincter. Dr. J. W. Johnstone in *Ind. Med. Gaz.* 1868, 213 states: "Penetration seldom reaches beyond an inch, and the force expands itself on the semi-lunar folds which in the empty gut droop on either side.....In every case of clear penetrative contact rupture will be found cutting horizontally outwards at the left superior or right inferior angle.....The shape of the wound is characteristic, and it cannot be produced by any hard substance. A true sodomy wound is triangular; the base external, with the sides of the triangle retreating into the fundament. Any other portion of the mucus membrane is not ruptured by a specific act of sodomy." *Lyon's Med. Jur.*, 1901, P. 252. *Taylor's Med. Jur.*, 1928, P. 285. *Ryan's Med. Jur.* 1836, P. 322.

Unnatural Offence—(concl'd.)

7. Sentence.

1. Juvenile offender should be awarded whipping instead of imprisonment. 3 P. R. 1834 Cr.
2. Sentence of whipping is reserved for sodomy with aggravating circumstances. 1932 S. 143.

8. Signs of habitual—.

Male adults who *habitually* practice sodomy, often affect effeminate manners, dress like women, etc. The habitual practice of the offence as an *active* agent gives rise to certain changes in the *genital organs*, e.g., *elongation and constriction of the penis*, and *twisting of the urethra*. In an habitual *passive* agent, the skin around the anus may be found to have assumed a smooth appearance, instead of showing the usual series of folds extending "concentrically towards the anal aperture." There also may be a "funnel like" or "trumpet shaped" depression of the *vites* leading to the anus and the triangular sodomitic wound. But the absence of these signs does not necessarily establish the innocence of the accused. The presence of chancre about the anus or of gonorrhoeal discharge from the rectum, is strong evidence that the individual has been the passive agent in the offence. *Lyon's Med. Jur. Ed. 1904, pp. 261-262, and Ed. 1935, P. 414, Taylor's Med. Jur. 1928, pp. 283-284.*

VIRGINITY.

To determine virginity following points should be considered :—(a) *The Breasts.*—In young adult girls the breasts are commonly firm and hemispherical, the nipples small and surrounded by areolæ from light pink through slightly darker shades of colour. It cannot be supposed that a single act of coitus will alter this. The breasts are of little value as a sign of virginity. (b) *The Hymen.*—The hymen is practically always present in a *Virgo intacta* in some form or other, but in rare cases it is congenitally absent. The hymen may be intact, but this does not prove non-intercourse, because females have been known to conceive with hymen uninjured. The presence of the unruptured hymen affords a presumptive but not an absolute proof that the woman is virgin. A woman may have an unruptured hymen, and yet not be a *Virgo intacta*. The hymen may be ruptured by an adequate force of any kind or by presence of blood-clots during menstruation, from ulceration or other diseases. (c) *The Vagina.*—In girls who have not had intercourse the vaginal walls are rugose and firm. (d) *Fourchette and Perineum.*—The former is the thin posterior edge of the margin of the mucus membrane, the latter the edge of the skin, limiting the vaginal orifice. In a *Virgo intacta* both of them are discernible and untouched. The fourchette is frequently ruptured by the first connection. (e) In the cases of *rape* the presence of signs of violence, tears, signs of inflammation, discharges are all of material assistance. *Taylor's Med. Jur.*, 1923, pp. 27—30. *Lyon's Med.  3. A warrant was issued against an abducted person in a case under S. 498, I. P. C., on the application of complainant that she would escape. Held, that omission to record reasons is mere irregularity. 22 Cr. L. J. 111, 18 A. L. J. 1149.
 4. If the Magistrate had material before him sufficient to justify the issue of warrant and to which he applied judicial discretion and he stated in the warrant the reasons upon which he relied, the mere omission to record separately in the order sheet the reason for issuing warrant is immaterial. 51 C. 1 overruling 38 C. 89.

WASTE LAND—. See Criminal Trespass—36.

WEAK INTELLECT. See Murder 75—1. Insanity.

WEAPON. See Wound.

1. Blood on—. See Blood.

1. The weapon with which a wound has been inflicted is not necessarily covered with blood. The popular view is that if much blood is found about a dead body, the weapon ought always to be more or less bloody. In reference to heavy blunt instruments applied with force to the head, severe contusions and fractures may be produced without immediate effusion of blood. In reference to stabs, the knife is frequently without any stains of blood upon it, or there is only a light film, which on drying gives to the surface a yellowish colour. The explanation is that in a rapid blow or plunge the vessels are compressed, so that the bleeding takes place only after the sudden withdrawal, when the pressure is removed. Even if blood should be effused, the weapon, in being withdrawn, is sometimes clearly wiped against the edges of the wound owing to the elasticity of the skin. The blood may have been removed by washing from the blade of a knife or dagger. The handle and inner portions should therefore be closely examined. If the blood on the weapon is coagulated, this would render it probable that it had issued from the body of a living person. *Taylor's Med. Jur.*, 1928, pp. 415-416.

2. The discovery of blood-stained weapons does not by itself prove that a person at whose instance these articles were discovered, is necessarily connected with the murder of a particular person. The discovery must definitely be shown to be connected with the murder of the person alleged to have been murdered. 1935 L. 805 (806).

2 Evidence from—.

1. The alleged weapon may affect the question of the guilt or innocence of the accused. Thus the character of the injury may show that it could not have been caused by the weapon produced by the prosecution. The alleged weapon should be compared with the wounds themselves and with any cuts on the clothes. It should be also examined for stains of blood and fragments of hair. If a fire arm it may show signs of recent discharge. *Lyon's Med. Jur.*, 1901, P. 127, *Taylor's Med. Jur.*, 1928, P. 417.

2. Weapons with sharp points but blunt edges, such as arrows and spears, tear through the tissues causing lacerated wounds, as also do weapons with blunt points. Pointed cylindrical instrument may produce linear wounds with irregular edges. The cheap soft-iron clasp-knives, so common in this country, tend to bend on encountering resistance; evidence of impact on bone may explain the bent state of the tip of a knife produced in Court as the one used. *Lyon's Med. Jur.*, 1935, P. 182.

9. Hair and other substance on the weapon. See Hair.

In some instances no blood may exist on the weapon, but few hairs or fibres may be found adhering to it, if the weapon is of bruising or cutting kind. Under severe injuries to the head, a portion of brain may escape and deposited with the blood on weapon or elsewhere. Such cerebral matter can be examined by a powerful microscope. *Taylor's Med. Jur., 1928, pp. 417-418.*

10. Nature of—. See Murder—80.

It should be noticed whether the weapon is sharp or blunt, straight or bent, and whether the edge is or is not notched. These circumstances may throw light on the question of suicide or murder. *Taylor's Med. Jur., 1928, P. 415.*

11. Position of—.

If a person has died from an accidental or self-inflicted wound, likely to cause death either immediately or within a few minutes, the weapon is commonly found near the body or within a short distance of it. If there has been any interference with the body, evidence from the relative position of it and the weapon will be inadmissible. It is compatible with suicide that a weapon may be found at some distance, or in a concealed situation; but it is much more frequently found either grasped in the hand or lying by the side of the deceased. If the instrument is firmly grasped in the hand of the deceased, no better circumstantial evidence of suicide can be offered. If the weapon is not found or is found concealed at a distance, this is strongly presumptive of homicide, provided the wound is of such a nature as to prove speedily fatal. *Taylor's Med. Jur., 1928, P. 414.*

12. What weapon caused the wound? See Wound.

When a weapon is produced there is practically no difficulty in answering the question, "could this weapon have inflicted this wound?" But the difficulties immediately begin when no weapon is forthcoming, and the witness's opinion is to be founded on an examination of the wound only. There are two fundamental properties of the skin which have great bearing on the subject, viz., the skin is elastic, and is in a living healthy state slightly on the stretch in all directions parallel to its surface. It therefore follows that in punctures with blunt weapons the hole must be as a rule a little smaller than the diameter of the weapon, for the skin yields by stretching without tearing round the actual breach of continuity. If the weapon is sharp at its point, but blunt elsewhere, the inequality may even be greater between the orifice and the weapon. Similarly in incised wound the tension will draw the edges apart, so that the aperture has no accurate relation to the width of cutting edge. A state with a double-edged weapon may show a complete diamond-shaped aperture, while one with a single edge and blunt back may show a half diamond shape, but unless the blunt edge is very broad it is unlikely to leave more than an elliptical split with one extremity torn. The skin is movable on the subcutaneous tissues; it is flexible, fairly tough, and somewhat sticky. It follows then that when an edged weapon is drawn across the skin we may get several cuts from one action, separated from one another by small bridges of uncut skin. Its stickiness and the jaggedness of the weapon explain the inversion and eversion of the edges of a stab wound, showing the direction of the last force used. *Taylor's Med. Jur., 1928, pp. 352-353.* It occasionally happens that the shape of a bruise corresponds closely with the shape of bruising violence or implement. More frequently in bruises beneath the skin (superficial) the bruise has no relation whatever either to the shape of the object producing it or the amount of violence employed. There may be deep effusion of the blood without any visible external bruise whatever. *Taylor's Med. Jur., 1928, pp. 359-360.*

Hence the existence on the body of the same individual of wounds belonging to two or more of these four classes, does not necessarily indicate that two or more weapons were employed or that more than one person was concerned in their infliction. *Lyon's Med. 5. The mere fact that a Judge omits to put on the record preliminary questions to a child to test his capacity to give evidence, will not render the evidence inadmissible, if the Judge as a matter of fact is satisfied about the capacity to give the evidence. 1923 P. 91=65 I. C. 73=23 Cr. L. J. 233, 41 C. 406.

10. Children are a most untrustworthy class of witnesses, for they often mistake dreams for reality and repeat glibly as of their own knowledge what they have heard from others, and are greatly influenced by fear of punishment, by hope of reward, and by desire of notoriety. 1933 L. 667=34 Cr. L. J. 606.

16. Competency of—

1. The only test of competency is that the witness should not be prevented from understanding the question put to him or from giving rational answers due to tender years or other causes. 1927 P. 406=102 I. C. 349=28 Cr. L. J. 541.

*Witness—(contd.)***36. Disbelieved as to one accused.** *See Evidence.*

Evidence of a witness if held to be unreliable in respect of one accused, cannot be held to be reliable in respect of the other. 99 I. C. 857=3 L. L. J. 147=28 Cr. L. J. 185, 1934 O. 286.

37. Discharged accused as—. *See—2.*

An accused who is discharged or against whom prosecution is withdrawn is a competent witness against persons who are jointly tried with him. 25 B. 422, 1 B. 610, 56 C. 1023, 1933 C. 148=34 Cr. L. J. 675.

38. Disinterested—. *See—61.*

Disinterestedness of a witness is no ground for believing him to be true. The Court has to see whether his evidence is in consonance with probabilities and consistent with other evidence and generally so fits in with the material details of the case for the prosecution as to carry conviction of truth to a prudent mind. 1930 N. 103=122 I. C. 434=31 Cr. L. J. 417.

39. Distinction between prosecution and defence.

S. 118, Evidence Act, makes no distinction between prosecution and defence witnesses about their competency, credibility, etc. 3 R. 11=1925 R. 122=85 I. C. 236=26 Cr. L. J. 492.

40. Doubts about the veracity of—.

In order to discredit a witness it is not enough to suggest doubts about his veracity. 49 C. 132.

41. Dumb. S. 119, Evidence Act.

When a witness is so deaf and dumb that it is impossible to make him understand the question put to him in cross examination, he is not a competent witness and conviction cannot be based solely on his evidence. 14 I. C. 655=13 Cr. L. J. 271=1912 M. W. N. 100.

42. Enemy.

1. If the prosecution evidence is disbelieved and conviction is based on the evidence of complainant who has serious enmity with the accused, the conviction is not sound. 1923 P. 519=72 I. C. 360=24 Cr. L. J. 360.
2. In case of enmity between the parties, their evidence requires independent corroboration. 1925 L. 42=84 I. C. 937=26 Cr. L. J. 393.

43. Examination of—. *See Examination of witnesses.***44. Examination of—by Pleader in his chamber.**

There is nothing wrong in the Pleader or Advocate examining the witnesses in chambers before they appear in Court, as it is intended to find out what they have to say and conduct the case properly. 14 I. C. 763=13 Cr. L. J. 299.

45. Exclusion of—.

1. The rule as to exclusion of witnesses from Court until they have been examined is not without exception. It does not extend to parties or their Counsels who have to conduct the case. 44 M. 916, 62 I. C. 828, 1934 A. 840.
2. S. 352, Cr. P. C., gives to the Court the power of ordering that any particular person shall not remain in Court, and the section makes no exception in the case of Police Officer. 1925 N. 296=26 Cr. L. J. 1130.

52. Impeaching credit of—. S. 155, I. E. Act. *See* Impeaching credit of witness.
53. Implicated in the crime himself.
When the witnesses in a murder case implicate the accused only when they are faced with the necessity of exculpating themselves, their evidence is open to grave suspicion and no sufficient weight should be attached to such evidence. 1930 P. 338=1930 Cr. C. 710.
54. Implicating innocent persons. *See* Evidence—3.
55. Important—.
A Court should make every attempt to secure the evidence of persons whose evidence is extremely important for the case either by procuring their attendance or by Commission. 99 I. C. 599=27 P. L. R. 501=28 Cr. L. J. 167.
56. Improving upon former statement.
1. It is unsafe to rely upon a witness who materially improves upon his former statement. 212 P. L. R. 1915, 1934 N. 204.
2. In this country, complainants with good and true cases, frequently are foolish enough to try to improve it by devices so transparent that Courts have little difficulty in separating the false from true. 31 P. R. 1914 Cr.
57. Imputation against—. S. 148, Evidence Act.
1. A question put to an intended surety about his conviction thirty years old should be disallowed on the ground that it related to matter so remote in time that it ought to influence Court's decision as to the fitness of such surety. 26 A. 371.
2. Though evidence may be given of facts, as that the witness has brought or defended actions which have been dismissed or decreed against him, or that he made false charge and so forth but the evidence of particular opinion formed by a Judge in another case of the credit to be attached to the testimony of a witness who is cross-examined, in a subsequent trial, is inadmissible. 4 C. A Court ought not to permit the making of insinuations against the defence witnesses as being related to accused, when the witnesses have not been questioned with regard to it. 53 I. C. 156=70 Cr. L. J. 748.
61. Interested—.
1. It is open to Magistrate to rely on the evidence of any person, although interested 1930 C. 645, 51 M. 956, 1931 L. 529, 1929 M. W. N. 587.
2. Conviction based on the evidence of interested witnesses whose names were not mentioned in the First Information Report as eye witnesses and whose evidence is contradicted by other witnesses, is not maintainable. 92 I. C. 175=27 Cr. L. J. 223.
3. Conviction on the uncorroborated evidence of an interested witness, who was a collateral, though not a near relative of the deceased whose family had enmity with the accused, is not safe. 1922 L. 76.
4. The mere fact that witnesses are relatives and interested is no ground to disbelieve them if the point can only be established by their testimony. 32 I. C. 350.
5. Where a fight takes place in a shop, it is scarcely likely that the shopkeeper and his family members would give evidence against their own customers. Their inclination would be to say that nothing disorderly had taken place at their shop, which they hold under a license from the Government. 2 P. 369=1923 P. 413=24 Cr. L. J. 801.

Witness—(contd.)

6. Where witness's brother brought a complaint against accused's cousin one year back, the witness is not an interested one. 1925 L. 318=26 Cr. L. J. 757.
7. Zaildars and *Sufaidposhes* are interested to give evidence on the Police side. 110 L. C. 674=29 P. L. R. 539.
8. The evidence of a servant who is not respectable is not of much value. 1922 P. 88.

1. Where in an examination of medical witness, the Magistrate instead of recording the statement describing the injuries on the person injured, recorded a brief statement to the effect that the witness had examined the injured person and the injuries were given in detail in a certain exhibit, the procedure is illegal. 1928 L. 69=28 Cr. L. J. 969.
2. It cannot be laid down as a general proposition that medical evidence is of less value than that of eye witnesses. When the doctor states what he saw as to the contents of the stomach and the food regurgitated into the larynx, it requires no expert to draw conclusions from those facts. The Judge himself can draw the conclusion, as well as the doctor as to the cause of death. 1929 O. 248=31 Cr. L. J. 181.
3. Court should not accept blindly the medical evidence. 1924 B. 457, 50 C. 100.

70. Non-production of—. S. 114, III. (G). Ev. Act

1. Prosecution is under no obligation to examine witnesses who, it has reason to believe will not speak the truth. 1930 C. 134=34 C. W. N. 170=125 I. C. 746=31 Cr. L. J. 918, 8 C. 121, too widely stated. 1935 R. 506, 1933 C. 600.

3. Where the prosecution has reason to believe that the inmates of the house of the accused, if examined, would not tell the truth, not being inclined to help the prosecution, there is sufficient cause for omitting to call them. 49 C. 358=1922 C. 382
4. The non-production of material witness like the investigation officer is a serious omission which cannot but throw suspicion on the whole prosecution case. 1 P. 630=71 I. C. 219=1922 P. 582=24 Cr. L. J. 91
5. Failure of prosecution to examine a material witness justifies the inference that the witness if examined, would have deposed against the prosecution. 1923 L. 125=107 I. C. 100=29 P. L. R. 14=29 Cr. L. J. 212.
6. A prosecution witness examined in the Committing Magistrate's Court but was not examined by the Public Prosecutor in the Sessions Court on the ground that the witness was hostile. The witness was present and not availed of by the defence. Held, that the Public Prosecutor was not bound to produce any witness who was not expected to give true evidence. 1930 L. 82=31 Cr. L. J. 176, 1922 L. 1.

Witness—(contd.)

7. Non-production of some of the witnesses cannot in any way affect the credibility of the witnesses that have been produced. 1924 L. 241=73 I. C. 932=5 L. L. J. 524=24 Cr. L. J. 702, 2 P. 309=1923 P. 413=74 I. C. 705.
8. It is of course not for the Police or Public Prosecutor to champion a particular theory and to suppress the evidence of a reliable witness simply because his testimony is inconsistent with it. 2 P. 309=1923 P. 413=74 I. C. 705=24 Cr. L. J. 801.
9. All witnesses who prove their connection with the transaction, connected with the prosecution must be called excepting those that are untruthful or unnecessary. 1924 M. 239=75 I. L. 987=25 Cr. L. J. 75.

11. The Police are entitled, if they like, to rest their case on the evidence of two or three eye-witnesses but where there are many other people who could have given evidence in the matter, they should be called. Omission to do so is a circumstance against the prosecution. 1929 M. W. N. 587.
12. In a capital case, it is the duty of the crown to place before the Court all materials irrespective of the question whether they help the accused or the prosecution. 8 P. 279=1929 P. 275=116 I. C. 773=30 Cr. L. J. 675, 8 P. 625=1929 P. 343=120 I. C. 37=30 Cr. L. J. 1136, 42 L. 422.
13. If a witness can on reasonable grounds be an accomplice, the prosecution need not produce him. 43 I. C. 241=19 Cr. L. J. 81=21 C. W. N. 1152.
14. The duty of Counsel for the crown is not to secure a conviction but to assist the Court in arriving at the truth and consequently to call all such evidence as may throw light on the case. 44 C. 477, 30 I. C. 128=19 C. W. N. 923=16 Cr. L. J. 576=21 C. L. J. 396, 42 C. 957.
15. In a criminal trial it is not incumbent upon the prosecution to produce all the persons who happened to have gathered at the spot where the offence occurred and the prosecution of two or three of the respectable and leading members of the village would suffice. 112 I. C. 215=29 Cr. L. J. 999=10 L. L. J. 229.
16. The duty of seeing that all evidence essential to the prosecution case is before the Court is thrown by Cr. P. C., upon the Magistrate himself. It is not open to a Magistrate to acquit on the ground that the prosecution had failed to produce a necessary witness 1925 O. 667=88 I. C. 1012=26 Cr. L. J. 1266.
17. Where a number of witnesses who could have given important information were not produced, the Judge should direct the jury to draw an inference adverse to the prosecution. His omission to do so amounts to misdirection. 50 C. 318, 7 P. 50=1928 P. 31=104 I. C. 459, 33 C. L. J. 180.
18. If the person who figured very largely in the evidence of approver is not produced, an inference against prosecution may be drawn. 1931 L. 408=132 I. C. 185=32 Cr. L. J. 818.
19. Withholding of evidence is a flaw in prosecution, still each case depends on its circumstances. 1932 L. 500=33 Cr. L. J. 497.
20. When some of the eye-witnesses prove the prosecution case and the rest are not produced, there is no presumption in favour of defence. 1932 C. 871=36 C. W. N. 1038.
21. Every person examined by Police need not be produced. But in murder cases witnesses supporting the plea of *alibi* must be produced. 1934 A. 908.
22. If the crown does not produce a witness in Sessions Court, although examined in Committing Magistrate's Court the Judge cannot compel crown to examine him or to tender him for cross-examination. He can examine him as Court witness or draw an inference against the prosecution for his non-production. 1935 S. 60=1935 Cr. C. 248.

Eye-witness did not rescue the accused, the presumption is that he did not see the fight. 132 P. L. R. 1915, 100 I. C. 357.
- 74. Not remembering details.**
The fact that the witnesses do not speak to details too minor to be remembered at a time of excitement does not affect the truth of their testimony. 1925 O. 468=36 Cr. L. J. 1151.
- 75. Not summoned.**
Evidence of witnesses should not be discarded merely because they are caste fellows and not summoned. 1934 A. 735=152 I. C. 120, 43 A. 186=1921 A. 278.

 6. The quantum of evidence does not depend upon the enormity of crime, yet it is safer to follow the rule that "fouler the crime, the clearer and the plainer the proof ought to be." 59 I. C. 858=22 Cr. L. J. 154, 1933 S. 166.

9. If a single witness attest several circumstances, each of which is capable of corroborating evidence, and if no such corroborating evidence is produced, there must be great confidence in the integrity and veracity of this single witness before all these circumstances can be believed on his sole testimony. *Gilbert on Evidence*, P. 180. See *Field's Law of Evidence in Br. India 8th Ed.*, P. xxvi.
10. As a general rule, a Judge should weigh nor number witnesses. But the witnesses under certain circumstances can be of great importance. "Where direct testimony is opposed by conflicting evidence, or by ordinary experience, or by probabilities supplied by circumstances of the case, the consideration of number of witnesses becomes most material, *Ibid*, at P. xxx.
11. In false cases there is generally no lack of witnesses, and any deficiency in the weight of witnesses is made up by number *Ibid*, at P. xxx.
12. Uncorroborated statements of single witness especially when they testify to atrocious crimes, like rape, etc., or a known accomplices, to be persons of bad character, or are interested in the result, are insufficient for conviction. *Ibid*.

For the defence.

1. Where a number of respectable persons have given evidence in favour of accused, the court should not reject their evidence simply because prosecution have produced larger number of respectable witnesses. 1925 O. 501=85 I. C. 370=26 Cr. L. J. 530, 1935 A. 850=158 I. C. 424.

104. Villagers as—

For some reasons best known to himself an Indian villager never says "there was general kicking and beating" but works out an analysis of fists and feet and right sides and left sides, which is easily shown to be ridiculous, but which does not prove him to be telling lies. It is merely his habit of thought and speech. 123 I. C. 43 = 31 Cr. L. J. 477 = 1930 M. W. N. 74.

105. Voluntary.—

The evidence of voluntary witnesses who come forward as friends or associates of accused to give him good character, without being summoned, should not be brushed aside, unless discredited with regard to their honesty or good faith. 1923 A. 35, 43 A. 186, 1925 O. 473.

106. Waj Takar—

1. A witness who deposes that they saw the abducted woman at different times and different places, should not be believed in S. 498 cases, as they cannot be adequately cross-examined. 100 P. L. R. 1916, 5 L. 396.

WOUND.

1. Abrasions.

1. Abrasions are indications of friction between the surface of the body and some hard object being in most cases the ground. *Lyon's Med. Jur.*, 1935, P. 147.
2. Extensive abrasions are always suggestive of accidents. Smaller abrasions, over points where bone closely underlies the surface are usually the result of falls. Such injuries are generally found on the forehead, elbows and the knees, in falls forward; falls in other directions may be indicated by abrasions over the scapula, over the crest of the scapula or over one or other crest of the ilia. *Ibid*, P. 143.
3. Abrasions may be of ante mortem or post mortem production. *Ibid*.
4. The shape of an abrasion may on occasions give useful information. A person knocked down by a motor car may bear on his body the mark of the shape of a honey-comb like abrasions made by the radiator. *Ibid*, P. 150.
5. The abrasions caused by the finger nails are crescentic in shape. They are seen in case of throttling children and adults. The marks are seen on both sides of the neck. But if only one hand has been used there may be several crescentic abrasions on one side of the throat and there will be only one on the other. *Lyon's Med. Jur.*, 1935, P. 172.
6. Mark left by ligatures used in hanging or in strangling are in effect abrasions caused by destruction of the epidermis. Strangulation is sometimes accomplished by compressing the throat with some hard object, e.g. a ball of wood; in such cases abrasions will be formed on the front of throat. *Lyon's Med. Jur.*, 1935, P. 201.

2. Concussion or commotion.

It is a term applied to the shaking of an organ by a blow or fall, more or less remote from it, which causes derangement of its function or lesion of its structure. Thus a blow or fall on the head, feet, knees or body, causes concussion of the brain, which may be followed by slight stunning, by hæmorrhage from the ears, nose or eyes or by immediate death. Concussion of the spine may or may not affect the brain, and if violent, will be followed by paralysis of all the parts.....A violent blow on the stomach, will suddenly extinguish life, by injury of the nerves, and paralysis of the whole nervous system, and yet no mark of lesion can be observed in the organ on dissection. *Ryan's Med. Jur., 1836, P. 325.*

3. Contused wounds,

1. *Definition and cause.*—(a) Concussion is an injury, and sometimes a wound, inflicted by a hard, blunt instrument without loss of substance, or wound of the skin, but with laceration of the cellular tissue, and extravasation of blood, either diffused or congested on the skin or in the cellular tissue, if the skin be divided, it is designated a contused wound. *Ryan's Med. Jur. 1836, P. 323. Lyon's Med. Jur., 1935, P. 172.*
- (b) Contused and lacerated wounds are often the result of injury by means other than the employment of a weapon. They may result from (1) injuries by broken glass. If slight they resemble incised wound; (2) Fall on some projecting, more or less sharp object; (3) Injuries from wild animals; or (4) Machinery and Railway accidents. Severe contused and lacerated wounds are often accompanied by very little hæmorrhage due to shock or bursting or crushing of vessels. Contusions or bruises include all degree of injury produced by blows, kicks or sudden pressure from explosion's. *Lyon's Med. Jur., 1904, pp. 120—123.*
2. *Duration of injury.*—In almost all contusions there is more or less extravasation of blood into the tissue constituting ecchymosis. Ecchymosis shows itself as a dark dull reddish blue discoloration of the skin, which in about twenty four hours begins to change colour, becoming lighter, and finally disappears altogether in about five or six days. Superficial ecchymosis appears within a few minutes after injury, and is first of a bluish black colour. *Lyon's Med. Jur., 1935, P. 174.*
3. If a weapon has been used, it will probably have been a blunt or rounded one, such as a stick or club. Frequently the shape, etc., of the weapon or instrument employed can be *inferred* from the shape, and situation of the patch or patches or ecchymosis. *Ibid.*
4. *Weapons.*—Weapons commonly employed are laths, laths bound with iron (*loha bandi*) rice-pounder, shoes, ropes, or cords or split cane. *Taylor's Med. Jur., 1924, P. 356.*
5. The injuries produced by blows from blunt instruments on the scalp, owing to the free manner in which it moves or closely to adjacent bones, has a close superficial resemblance to cut-wounds. *Taylor's Med. Jur., 1924, pp. 322-23.*
6. *Force of blow*—Effusion of blood proves little in itself as to the force of blow. The amount of blood varies with the form of instrument, the part of the body struck, and even with the individual young or old. *Criminal Investigation by Dr. Hans Gross, 1934, Ed. P. 416.*

Wound—(contd.)

2. Death from a mortal injury may occur by ; (a) Coma, e. g., from pre brain or fragments of bone or effused blood. (b) Asphyxia, e. g., from the movements of respiration, or mechanical interference with this. (c) Syncope from loss of blood or from mechanical impediment to the heart. (d) Shock, as in death from concussion of the brain, or from the effects of a blow over the region of the solar plexus. *Lyon's Med. Jur.* 1904, P. 17

6. Ecchymosis.

Ecchymosis or blackness is an extravasation of blood by the rupture of the capillary vessels ; and hence it follows contusion. When ecchymosis is caused by injury, it generally appears in a short time, or in a few hours, sometimes not before the lapse of days. The part appears red and bluish, then leaden colour, next violet and yellow, and is marked most in the centre. The progress and duration will be modified by age and constitution. *Ryan's Med. Jur.* 1836, P. 323.

7. Fall from height.

1. When considerable force is exerted, as in the case of a fall from a height, or under a heavy weight, etc., serious internal injuries may be caused without external marks. *Criminal Investigation by Dr. Hans Gross, Ed. 1934,*
2. Even when there is no internal rupture, death may follow from shock. A man thrown from the top of balcony or verandah, but there was no external injury. Four days after he died. *Post mortem* disclosed a rupture of the liver near the surface, 4 inches in length. A man was thrown from the bullock cart, and fell on his head without losing his hat, which saved him from external injury. His death was due to shock. *Ibid.* P. 417.
3. A blow or fall on the head, feet, knees or body, causes concussion of the brain, may be followed by slight stunning, by hæmorrhage from the ears, nose or eye by immediate death. Concussion of the spine may or may not effect the brain, if violent, will be followed by paralysis of all the parts. A violent blow on the stomach, will suddenly extinguish life, by injury of the nerves, and paralysis of the whole nervous system, and yet no mark of lesion can be observed in the organs at dissection. *Ryan's Med. Jur.* 1836, P. 325.
4. The term *Distortion* is a serious injury followed by engorgement, which may be dissipated for weeks or months, according to the habit and constitution of the patient. There is sometimes stiffness of joints ; sometimes relaxation of the joints, which is to be ascribed to scorfulous or rickety disposition. *Ryan's Med. Jur.* 1836, P. 326.
5. A blow from the front will cause a fall on the back, a push from behind will throw the recipient on his face. When the fall is not due to any force, but to sudden loss of consciousness, the body will fall on its face. The question of the direction of the fall may be of great importance in some cases. *Lyon's Med. Jur.* 1935, P. 133-134.
6. Smaller abrasions, over points where bone closely underlies the surface, are usually the result of falls. *Lyon's Med. Jur.* 1935, P. 147.

8. Fracture of bones (and fall)

1. The bones of aged persons are sometimes very brittle and slight violence will produce fracture. Fracture may be ascribed to spontaneous causes. Thus bones have been fractured by moderate muscular exertion. The elbow, heel bone, and knee bone and femur in old people are particularly exposed to this accident. The arm of a healthy man has been broken by throwing a cricket ball. *Taylor's Med. Jur.* 1928, pp. 468-469.
2. Fractures if simple are not dangerous, but if compound or comminuted, especially in or near joints, they are often serious and may terminate fatally. *Ryan's Med. Jur.* 1835, P. 326, *Taylor's Med. Jur.* 1928, P. 470.
3. The period of consolidation of a fracture of the same kind of fracture will be 21 days in an adult, and fifty days in an infant, in thirty or forty days in a young person, or perhaps not at all.

Wound—(contd.)

4. Fractures will not be united so soon in patients affected with gout, scorfula, cancer, or venereal disease, mollities, or frigilias assium, as in healthy individuals. *Ibid.*
5. A fracture produced shortly after death, while the body is warm, and another produced shortly before death will present similar characters, except that in the former case there might be less blood effused. A fracture caused ten or twelve hours before death would be indicated by a copious effusion of blood into the surrounding parts and between the fractured edges of the bones, as well as by the laceration of the muscles, or if a longer period before death, there may be marks of inflammation. Fractures caused several hours after death are not accompanied by an effusion of blood. *Taylor's Med. Jur., 1928 Vol. I, P. 470.*
6. *Whether fracture is due to blow or fall.*—Suppose that the deceased is annoying and following prisoner. The prisoner, turns round and pushes (he says), and strikes (says the prosecution) the deceased, who falls and dies speedily from head injury. Although the evidence of a blow or push may be conflicting, it may be very material for the purpose of awarding punishment. The answer is by no means easy, but the following points may help materially to determine blow or fall—(a) The nature of spot or ground upon which the head was alleged to have fallen, soft earth, for instance, or a hard flagstone. If on soft earth, was there a sharp stone or bit of brick or other hard substance with which the head could have come in contact? (b) *How did he fall*—forwards, backwards or sideways. (c) *The number and nature of the injuries.* If a fight is admitted many of these may be due to it, but if only one blow, or none, is admitted, then one fall can only account for one injury. (d) *The position of injury.* In a simple fall it is almost impossible for the vertex to be injured, unless the victim is knocked down when standing about his own height from a wall, and in the fall thus brings the top of his head against the wall. *Taylor's Med. Jur., 1928, Vol. I, P. 441.*
7. In examining a fracture it is important to determine whether a weapon has or has not been used, and this may sometimes be ascertained by the state of the parts. It is common defence on all these occasions to attribute the fracture to an accidental fall. *Taylor's Med. Jur., 1928, Vol I, P 468.*
9. **Fracture of the skull.**
 1. *With pointed weapons,* or with weapons the striking surface of which is small in proportion to the momentum of its impact, such as the blunt end of a hammer (a) the shape of the depression on the outer surface frequently corresponds pretty closely to the shape of the contact area of the weapon; or (b) a local starred fracture is produced, which may or may not extend beyond the area of depression. *Taylor's Med. Jur. 1928, P. 439, Vol. I.*
 2. *Splintering of the tables.* In the case of local fractures the table of the skull which at the moment of impact is furthest from the force is splintered to a large extent than the table nearer to the force, owing to the fact that it is, *qua* the force unsupported. This ascertains the direction in which a solid object has passed through the skull. If such a starred local fracture has a limb extending from the locality, such limb will follow the rule, viz, the line of fracture shall be parallel to the line of direction of the crushing force, most frequently starting from the point of contact. Thus a blow on the side of the head produces a fracture running across the base and over the vertex from side to side. If the head be supported, and so prevented from moving, the fracture may start at the point of contact of the blow, or at the opposite point where the head was supported for example, in falls on the vertex the fracture may have begun either at the vertex or at the base. *Ibid, P. 439.*
 3. It is obvious that the greater the violence, as in train smashes or contact with heavy vehicles, the more difficult it is to actually trace these lines of fracture. When the force causing the fracture is broad one there may be extensive fracture and separation of the bones of the head without any division of the skin. *Ibid, P. 440.*
 4. A blow on the head may produce fracture of the inner table of the skull, and cause death by compression as a result of the fracture or of the effusion of the blood. The bones between the orbit and the brain are very thin, and, in young persons especially, very easily perforated. *Ibid, P. 440.*

Wound—(contd.)

5. A stick, a gimlet, a pair of scissors, a birch broom, a tobacco pipe, a pen holder have all been recorded as producing such fracture. *Ibid.* P. 440.
6. A person is occasionally sensible so long as the foreign substance which produced the fracture and depression remains wedged in the brain, insensibility and other fatal symptoms beginning to manifest themselves only after its removal. *Ibid.* P. 440.
7. Fracture of the skull of a fœtus in utero was caused by a fall. See Casper (iii), P. 115. *Lyon's Med. Jur.* 1934, P. 317
8. In case of fracture of skull intention to cause death is presumed. 1936 R. 46= 37 Cr. L. J. 290.
10. Gunshot. See Attempt to murder—4. Murder—30.

A. Accidental—.

1. The accidental discharge of firearm may result in the wounding of the person holding the weapon or of some other individual. In the first case the wound will be on the front of the body, and will often be from below upwards, as the weapon is generally discharged while it is being examined, when the muzzle is probably pointing upwards. *Lyon's Med. Jur.*, 1935, P. 234.
2. In connection with such accidental wounds the characteristics of a close discharge will be found. If an individual other than one handling the gun is wounded, it will not be possible to distinguish the injury from a deliberately inflicted one. In cheap revolvers, gas escapes at the time of discharge. This gas, carrying with it unconsumed powder, will stain the hand holding the weapon. Blacking of the hand is proof of suicide or of accident. *Ibid.* P. 234.

B. Diagnosis of—.

1. Gunshot wounds resemble contused and lacerated wounds. If the wound is single, it may have been caused by a firearm loaded with powder and wadding only, if the weapon has been discharged near the body. Two orifices caused by the same discharge, indicate the employment of a hard projectile. When two orifices are present, the orifice of entry will usually be found to be smaller and more depressed than that of exit, which latter is usually ragged and everted. More than two orifices may be caused by one projectile, e. g., when this has entered the body after traversing a limb or has split up against a sharp ridge of bone into two pieces, each finding a separate exit, or it may be caused by an intact bullet and a splinter of bone punched off by it. *Lyon's Med. Jur.*, 1904, pp. 120-121.
2. If only a superficial bruise or abrasion be found it is impossible to say positively that a firearm caused it, but grooved appearance in the skin and holes in the clothes may give some idea. If the missile is found in the body it is conclusive evidence of the nature of wound. *Ibid.* If the missile is found not in the body, but in the room, this is a piece of very strong circumstantial evidence to be weighed with the character of wound. The aperture of entrance is round only when the bullet strikes point blank, or nearly so; if it should strike obliquely, the orifice will have more or less of an oval or valvular form. If the projectile traverses a bone the direction of fire may be ascertained from the difference in the margin of wounds of entrance and exit. Bone always tends to bevel at the point of exit. The entrance would show as a single lacerated hole about the diameter of the gun barrel, and surrounded by a zone of blackening or burning if discharged within a short distance. *Taylor's Med. Jur.*, 1923, Vol. I, pp. 510-511.
3. With a small crushing force it naturally follows that the lower its velocity and power, the larger the wound, because the elasticity of the skin and other tissue has more time and opportunity to come into play with consequent greater tearing. It is the same with the aperture in the dress when this is formed of elastic material. *Ibid.* P. 512.
4. When an automatic pistol or revolver is fired with the muzzle touching the skin, the gases pass into the wound and lacerate the tissues by their expansion. This causes the wound of entrance to enlarge than the exit wound. *Ibid.* P. 513.
5. The chances of two different bolts making identically the same marks are too remote as to be of all intents and purposes non-existent. 1936 Pesh. 152.

Wound—(contd.)

C. Direction from which the firearm was fired.

1. A missile fired from a firearm has a tendency to continue in straight line from the point of entrance to the point of lodgment, or to the wound of exit, so that, if the internal wound be straight, this straight line proves accurately the direction in which the barrel of the weapon was pointed when fired. But sometimes it is not straight, but curved, on account of slight obstacles, such as bones, etc. The position of the wound of entrance marks the part of the body which was at the moment of discharge nearest to the muzzle of the weapon, or rather in a straight line with the muzzle. It therefore indicates with mathematical precision whether the victim was facing the muzzle or with his back or side to it. If we can discover two fixed points where a ball has touched a building without being deflected, it will be easy to determine the direction. *Taylor's Med. Jur.*, 1928, pp. 522-523.
2. The deflection of projectiles may occur not merely when they come in contact with bones, but when they meet skin, muscles, tendons, or membranes. A ball which entered at the ankle has been known to make its exit at knee and another entering the shoulder was found below the right ear. *Ibid*, P. 524.
3. When a shot is fired at a person through pane of glass the person firing must be in the same straight line when it is produced by joining the two points, viz., of the window pane and that where the victim was standing, unless it can be shown that the assailant was on horse back. *Criminal Investigation by Dr. Hans Gross*, 1934 Ed., P. 291.
4. Bullet marks or shot holes, by their situation, may indicate the position of the assailant at the time the weapon was discharged. *Lyon's Med. Jur.*, 1935, P. 237.

D. Distance of the firearm discharged.

1. If the muzzle of the weapon were in direct contact, the skin besides being burnt, is torn, and much lacerated. The bleeding is usually slight, and when it occurs it is more commonly observed from the orifice of exit than from that of entrance. *Taylor's Med. Jur.*, 1928, Vol. I, P. 511; *Lyon's Med. Jur.* 1904, P. 120, *Lyon's Med. Jur.*, 1935, P. 211.
2. If the distance from which the gun is fired is within 12 inches, the wound will, as a rule, be single, while beyond this each shot will make a separate wound. (*See Casper, I. 266*). But it will also depend on the charge, size of shot, bore of weapon and whether choke or cylinder. *Lyon's Med. Jur.*, 1904, P. 121.
3. In the case of shot guns, the distance from which the weapon was fired may be deduced from the amount of scattering of the charge. At about a yard the whole of the charge enters in a mass, producing a round hole about the size of the bore of the weapon, with ragged edges and surrounded by a zone of blackening and of burning. As a rule there is little trace of burning beyond a yard, but traces of powder marks may be found up to four yards or more. *Taylor's Med. Jur.*, 1928, Vol. I, P. 516.
4. The shot begins to disperse in an ordinary cylindrical gun at about three yards, at which distance the bulk of the shot enters to one mass and leaves a hole with a few isolated shot around it. The dispersion gradually increases, and at about five yards an open pattern about ten inches in diameter is found. *Ibid*, P. 516.
5. At ten yards the diameter of spread is about twenty inches, at twenty yards about thirty inches and so on. With fully choked barrels the dispersion is about half the above. With pistol loaded with shot the dispersion is very much greater. *Ibid*, P. 516.
6. Dispersion varies to a certain extent with different weapons, and to a great extent with the nature and quality of the powder, and the manner of filling or loading. *Ibid*, P. 516.
7. It is out of the power of a witness to say from the mere fact of a bullet lodging or traversing whether the assassin was far off or near at the time the deceased was wounded. *Ibid*, P. 517.
8. A single bullet fired from four to six yards from the person has been known to produce an extensive wound. *Ibid*, pp. 517-518.

Wound—(contd.)

9. A discharge of small shot, in contact with the skin or close to it, ge. not a round opening, but a severe lacerated wound. *Ibid*, P. 518.
10. It is unusual to get marks of burning beyond a yard or a yard an shot gun, or at more than half a yard with a revolver, *Ibid*, P. 519.
11. There are but slight signs of burning with automatic pistols, even for the charge of powder is very light, and it is completely exploded.
12. The lighter the projectile, the shorter the distance to which it can discharged near the body, it may produce penetrating fatal wound. *It*
13. If there are marks of powder or burning and the automatic pistol a more than a foot away when fired; if there are no marks it is impossible far off it was. *Ibid*, 522
14. No general rules regarding distance can be laid down. Experiments m with the weapon and with cartridges (or loading) similar to those which to have been used. *Ibid*, P. 522.
15. As distance increases, the traces of smoke, tattooing and burning disper increased area and finally disappear altogether. All may be found up to 6 inches and at ranges beyond 3 feet very little if any, trace of powe observed. Automatic pistols as a rule fire cartridges loaded with less pow those fired from revolvers and therefore produce less discolouration. *Investigation by Dr. Hans Gross, Ed. 1934, P. 424.*
16. With professionally loaded cartridges and smokeless powder a single wound up to a range of about one yard, but the burning, blackening and tatooi more intense than ever is to be found with a wound from a rifle, revolver o and the single wound has irregular, ragged edges. *Ibid*. At any range b foot, traces of individual holes made by separate shots are likely to be fo bullet usually takes a straight line between entrance and exit and from t line of fire can be deduced. Shots discharged at short range may produce a similar to that made by bullet, because the shot on quitting the barrel t packed, separating only later to form what is called the cone of dispersion. *pp 425-426.*
17. The distance at which the shot was fired is usually related to the questi premeditation, as it is manifest that a shot fired from a considerable distance not have been fired in the heat of sudden quarrel. *Lyon's Med. Jur., 1935, P.*
18. If the gun is fired at a right angle to the body the burn covers an area en in shape and about 6 inches in diameter. If the burnt area be oval in shape indication is that the barrel of the gun was inclined to the surface. *Lyon's A Jur., 1935, P. 242*
19. In the case of entry of gas in the wound or of burning of the skin, it is safe to say that the injury must have been caused by a shot fired within an inch or two of t body. *Ibid*, P. 244.
20. A shot of cartridge about No. 6 in size fired at a distance of 6 paces is very like to cause death. The accused is guilty under S. 307, I. P. C 10 Cr. L. J. 57= C. L. J. 432.

E. Kinds of firearms and use.

1. *Guns including rifles.*—Guns may be classified from several points of view single, double, or more barrelled-muzzle or breach loaders-rifles or shotgun. Shot includes all projectiles in the form of small balls, loaded into the barrel not singly but in quantities, and not compressed but simply retained by the wad. While bullets are cast in moulds, shot is obtained by allowing molten lead to fall through a sieve, from a sufficient height into the water. To render the lead more liquid from 1rd to 2 per cent of arsenic is generally added. This detail is important specially when the shot has remained sometime in the body. Shot is generally manufactured according to numbers, each number indicating a special size. They are distinguished by the number of pellets per ounce weight. The table on the next page may be accepted as a fair standard.

2. Modern *Airgun* will fire a bullet up to 22 with accuracy up to ranges of at least fifty yards and that serious damages can be done at considerable longer ranges. *Ibid*, P. 276.
3. If a *muzzle loading percussion gun* has been used we must in making search look out for accessories peculiar to this weapon, e.g., ramrod plug, wads, shot bags powder-horns, and such like which belong to a muzzle loader. *Ibid*, pp. 278-279.
4. In *Breach loading shot guns* there are three systems of percussion-pinfire, rimfire, central fire. In pinfire, a pin passes through the cartridge perpendicular to the axis, the hammer falls on the pin, which causes the cap to explode. Rimfire is unknown in common use. Central fire cartridges are now universally employed. *Ibid*, P. 279.
5. When it becomes necessary to distinguish between shots fired from a muzzle loading rifle and a breach loading rifle, we must remember the way in which muzzle loaders are charged. The powder is first poured down the barrel, the mouth of the barrel is then covered with a well-greased piece of cloth, called a "patch" on which the bullet is placed, pressed down and finally rammed home. Hence only certain projectiles can be used. A round bullet is almost certain mark of a muzzle loader. Marks are also left by the patch, but this happens on the contrary when the bullet fits very tightly. *Ibid*, pp. 280-281
7. *Pistols*. In all pistol shooting the shooter looks at the object aimed at and not at the pistol. *Ibid*, P. 284.
8. *Revolver*. A service revolver, firing a .455 calibre soft lead bullet, will stop any body if it hits him anywhere. Very compact weapons of .38 calibre or less will not seriously disable unless a vital spot is hit. Although shots from a revolver or pistol can be effective at long ranges, the weapons are ordinarily used only at close quarters. There are many varieties of country made revolvers in India from which shots can be fired. *Ibid*, pp. 285-286

F. Marks on dress and size of shots.

1. It is possible to find large gun shot wounds while the dress covering them is not in the slightest degree injured. Dr. Bick says that he found a deep wound in the arm with fracture of the humerus without any corresponding hole in either the cloak or tunic. *Criminal Investigation by Dr. Hans Gross, Ed, 1934, P. 429.*
2. At very close ranges there may not be much difference in the appearance of wounds caused by shots of various sizes; the smaller the shot the more minutely irregular edges are likely to be. Small shot will usually lodge in the body, large ones are likely to pass through and to make exit wounds, if fired from close range. The shot most commonly responsible for injuries here are of size SG, BB, Nos. 4 and 6. *Lyon's Med. Jur., pp. 244-245*

G. When was the firearm discharged

1. For a few hours there is a smell of hydrogen sulphide, and on chemical examination of fouling, a reaction for sulphides will be obtained for five or six hours. Sulphates are found only in traces for the first few days, then they gradually increase. Iron salts in the ferrous state are usually found in traces in the early stages, and gradually become converted into ferric salts. *Taylor's Med. Jur., 1928, Vol. I, P 544.*
2. Recently discharged firearms will be found blackened inside the barrel, from the residue left by the gun powder after ignition. This residue consists mainly of finely divided carbon and potassium sulphide, and yields to water a dark-coloured liquid, divided carbon and potassium sulphide, and yields to water a dark-coloured liquid, alkaline in reaction, and which, after filtration, strikes a black colour with a solution of a bad salt. After a time the potassium sulphide becomes oxidised into potassium sulphate. Again the weapon alleged to have been used may show signs of recent

Wound—(contd.)

fracture, or be bent, or otherwise injured as the result of its use. *Lyon's Med. Jur.*, 1904, P. 127.

H. When was it inflicted.

1. A gunshot wound undergoes no marked change for an hour or so after its infliction. *Taylor's Med. Jur.*, 1928, P. 513.
2. If the wound be something over ten or twelve hours in age, its age must be judged by the amount of swelling, sloughing, suppuration, etc., for it becomes then merely a bruised, probably septic, wound. *Ibid*, P. 513.

I. Whether dangerous to life.

1. Gunshot wounds are dangerous to life, *first* from shock; *secondly* from laceration of a large blood vessel or important viscus, such as heart, brain, liver, etc., and *thirdly*, being contused wounds, the tissues are killed and consequently slough, with danger of hæmorrhage or septicæmia, etc. *Taylor's Med. Jur.*, 1928, P. 515.
2. So long as the missile still remains in the body danger exists. *Ibid*, P. 515.
3. Instances of gunshot wounds proving fatal after a year and a day are not infrequent, and they show the inconsistency of limiting the legal responsibility of an assailant by the period at which death takes place, *Ibid*, pp. 515-516.
4. Fatal wounds may be caused by gun powder and wadding alone if fired within about four inches from the body. *Lyon's Med. Jur.*, 1904, P. 121.
5. A single pellet of shot may cause death by penetrating the aorta or the brain through the eye. *Ibid*, P. 121.
6. The question as to how long did the victim survive can be answered by (a) nature of the wound, (b) the organ wounded, (c) the state of the wound as regards suppuration, gangrene, healing, etc., and (d) the amount of blood lost. *Taylor's Med. Jur.*, 1928, P. 513.

J. Whether due to accident, suicide or homicide.

The evidence to determine this question may be detailed (a) from the situation of the wounds; (b) from the design, (c) from the proximity of the weapon on discharge; (d) from the position of weapon when found after death; (e) from the direction of the wound, (f) from the nature of the projectile, wadding, etc. *Taylor's Med. Jur.*, 1928, Vol. I, P. 528 to P. 542

K. Whether one bullet can cause more wounds.

One ball may sometimes produce several wounds on the body and then there will be only one orifice of entrance, but owing to the ball splitting within the body and dividing itself into three or four pieces, there may be several orifices of exit. This splitting of a ball has repeatedly occurred when the projectile in its course has encountered an angular surface, or a projecting ridge of bone. *Taylor's Med. Jur.*, 1928, P. 525.

L. Whether shots can be fired from pistol and revolver.

1. That many strange varieties of country-made revolver exist in India is certain. *Criminal Investigation by Dr. Hans Gross*, Ed. 1934, P. 236.
2. In a recent case a number of eye witnesses testified that the accused had shot the deceased several times with a revolver and made off. Four shots were fired and in three of these a round bullet being used and in the fourth small shot. The bullets were weighed and expert evidence was given that they could not have been fired from any known revolver. Indeed 12 bore gun would have been required to take them. On the other side a Police Officer gave evidence that he had seen a country made revolver which he thought might be of sufficient calibre to take such a bullet. The appeal was adjourned by the High Court, and such a weapon was produced. It was a muzzle loads having four short barrells welded together. All four were rotated by hand, bringing a cap under the hammer. The conviction was upheld. (By Madras High Court). At the same time a two-barrelled muzzle loading revolver of larger calibre was found in which the barrells had been bored through one rectangular piece of metal. This case exemplifies the danger of accepting dogmatic statements from experts of the layman variety. *Ibid*, P. 236.

Wound—(contd.)

3. Naturally when we find shot we suppose it has been fired from a shot gun and when we find a bullet we conclude that it has been fired from a rifle of corresponding calibre and rifling but we must not forget that the fact may be quite otherwise, and above all we must not dismiss legitimate suspicion on the sole ground that "the projectile does not fit the gun". *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 275.*

M. Whether self-inflicted. See —37.

11. How long a person lived after the blow. See—12—D.

1. In India a great many cases turn upon the question as to how long a person could have lived or what actions could have been performed by him after having received a given wound or wounds. *Criminal Investigation by Dr. Hans Gross, 1934 P. 421.*
2. Accused thrust his knife into the head of the victim and $4\frac{1}{2}$ inches of blade had penetrated the brain. His relatives tried to pull it out, but without success. He was taken home and then across country to a hospital. At midnight after half an hour's hard work the knife was drawn out. The man perfectly recovered and gave evidence against the assailant. *Ibid, P. 421.*
3. The right pulmonary artery had been severed by a severe stab. The deceased was said to have run a distance of 200 yards before he fell dead, and it was said that this was impossible after such a wound. The Court held that no definite conclusion could be come to in such a case as to how far a man could go. *Ibid, pp. 421-422.*

12. Incised.

A. By axe.

Wounds caused by axe are characterised by their great depth. They may be long if the weapon does not strike squarely on the surface. If it does so, the length of the wound, corresponding to that of the blade will be comparatively short. If the head of the axe strikes the surface first it will sink deeper into the tissue than the toe and the corresponding end of the wound will be the deeper...The deeper end, therefore, indicates the position of the assailant. ...Axe wounds on the head or trunk are very fatal. *Lyon's Med Jur., 1935, P. 179.*

B. By knife or dagger.

1. In the case of knife the opening made at the moment of penetration will be lengthened by the act of withdrawing the weapon. They almost, always, present the form of slit having two pointed extremities, so much so that one is tempted to believe that the wound has been inflicted by a *dagger*, an instrument with two cutting edges. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 418.*
2. When a wound has each end sharp and pointed, it must not be concluded that wound has been inflicted by a dagger or other double-edged instrument; more frequently the wound has been caused by a knife with a round or square back. Frequently the wound is somewhat narrower than the instrument employed. The maximum difference between the size of the wound and that of knife may be according to Hofmann $\frac{1}{2}$ to $\frac{3}{4}$ inch. An error may arise with reference to number of blows struck by the knife; often one might think there have been several, while in reality there has been only one. This will occur when the blow has been struck on a part of the body when the skin is folded back on itself, as on the necks of old and thin persons. On stretching the skin, one sees several cuts connected together in the form of the letter Z, or even completely separated one from the other. *Ibid, P. 419.*
3. Regarding the direction of blow of knife a medical man can seldom give precise information. All the necessary circumstances must be observed. *Ibid, P. 420.*
4. Very sharp knives do not always produce clean cuts. They can produce only slashed and irregular wounds, if its blade instead of being guided in the direction of the wound, is held obliquely thereto. *Ibid, P. 422.*
5. The edges of typical incised wound are clean cut. When examined with lens, they are seen to be perfectly regular. *Lyon's Med. Jur., 1935, P. 177.*
6. A blunt knife, sword or axe causes tearing of tissues and therefore irregular edges. *Ibid.*

Wound—(contd.)

C. Dangerous to life.

1. Incised wounds may prove fatal though there is no trace of hemorrhage. *Criminal Investigation by Dr. Hans Gross, Ed. 1934, P. 420.*
2. The wound caused by bayonet is seldom perceived as the mark left on body is insignificant. The problem is more difficult when the wounded person has turned at the moment of receiving the wound. The parts are then twisted, when they regain their previous position the twisting disappears and the different layers of pierced flesh are super imposed differently from before; they have been displaced and no longer correspond. Each layer pierced is closed by an unperforated portion. *Ibid, P. 420.*
3. Some knife wounds present a horrible aspect and yet are not mortal or even dangerous. A knife was struck into the head of a person and it could not be drawn out by a blacksmith. He walked for 45 minutes and went to a doctor who pulled it out with the help of a crow-bar. He was cured in 15 days. Similarly a shoe-maker drove 5 nails of about 2 inches each in his head and was cured. *Ibid, P. 421.*

D. How long a person lived after the blow. See—11.

1. In India a great many cases turn upon the question as to how long a person could have lived or what action could have been performed by him after having received a given wound or wounds. *Criminal Investigation by Dr. Hans Gross, 1934 P. 421.*
2. Accused thrust his knife into the head of the victim and $4\frac{1}{2}$ inches of blade had penetrated the brain. His relatives tried to pull it out, but without success. He was taken home and then across country to a hospital. At midnight after half an hour's hard work the knife was drawn out. The man perfectly recovered and gave evidence against the assailant. *Ibid, P. 421.*
3. The right pulmonary artery had been severed by a severe stab. The Court held that no definite conclusion could be come to in such a case as to how far a man could go. *Ibid, P. 421—422.*

E. Incised wound with blunt weapons.

It is not always possible to decide from the nature of the wound itself what kind of instrument was used, indeed the wound sometimes presents appearance pointing to cutting or stabbing instrument as the cause:—(a) There are cases where an instrument to all appearance perfectly blunt yet has some sharp or, pointed projection, more or less visible, such as a fence stake with a nail not very readily observed, or a small sharp splinter on a branch of wood. (b) Instruments really blunt may in certain cases inflict long wounds with clean cut edges, especially on those parts of the body (as the skull) where the skin is stretched tightly over the bone. *Hofmann* has laid down that wound caused by cutting instruments are always wedge-shaped at the base, while the base of the wound caused by a blunt instrument is crushed or bruised, but the latest surgical authorities declare that it is often difficult and sometimes quite impossible to draw any distinction. *Criminal Investigation by Dr. Hans Gross, Ed., 1934, pp. 415—416.*

F. Kind of weapon used.

In examining an apparently incised wound with the object of ascertaining the kind of weapon, if any, used in producing it, it is important to note:—(a) Situation of the wound. An apparently incised wound on a part where the skin closely overlies a bone, or sharp ridge of bone, may be produced without a weapon or by blunt weapon. Blows with the fist over sharp ridges of bone such as chin or orbital ridge or blows with a club on the scalp, may produce wounds closely resembling incised wounds. Wounds caused in this way are generally, but not invariably, vertical to the bone. *Lyon's Med. Jur., 1904, P. 119.* (b) Edges of the wound. Edges should be examined with a lens. Sharp, clean cut, uninverted edges, indicate the use of a sharp-edged weapon tearing and inversion indicate the employment of a blunt weapon, or production without a weapon. *Ibid, P. 119.* (c) Length and depth of the wound. Long incised wounds indicate the use of a sharp-edged weapon, and may either be caused by a single blow from one with a long, tolerably straight edge, such as a sword, or by a drawing cut from one with a short edge, such as a razor. In the case of sword, the method of production is often indicated

by the underlying bones being clean cut through; and in the case of razor by the wound tailing off at one end into a superficial scratch. *Ibid*, P. 119. (d) Generally the shape of the wound, its dimensions and its situation, will afford some information to the nature of weapon used, although it is very difficult for a medical man to distinguish blows by some instrument. *Criminal Investigation by Dr. Hans Gross, 1931, P. 417.* (e) It is easy to confound a blow from a hatchet with one from a knife, or a blow from a piece of wood with sharp angular sides with that made by a sword. *Ibid*, P. 417. (f) The wounded person should be placed in the same position in which the blow was given and whole scene must be reconstituted in the mind and its possibility verified. *Ibid*, P. 417. (g) It is of very little use to compare with any instrument wounds which are in their swollen or cicatrised condition. The process of healing which commences from the moment the wound has been inflicted, rapidly transforms the wound and it is hardly possible to recognise the primitive form. *Ibid*, P. 418. (h) The wound lengthens out when it runs along the muscle, on the contrary, when it runs across the muscle it contracts. *Ibid*, P. 418.

G Weapons.

1. *Axe or hatchet* usually produces comparatively short incised wounds, either deep or accompanied by indentation and extensive fractures of the bones beneath. Cutting instruments with a concave edge and projecting point often cause linear wounds resembling a punctured wound at one end and gradually decreasing in depth towards the other end. If the wound has been inflicted on curved surface, the puncture caused by the point, and the incised wounds caused by the edge, may be separated by an unwounded portion of the skin. Weapons which produce incised wounds are: (1) short edged light weapons such as razor and knife, (2) heavy short-edged weapons of the hatchet class such as axe, *kulhar*, *garasi*, *gandasa tarsh* and sacrificial knife (*khanda*). Weapons allied to this class are the hor spade (*phaori* or *kudale*) and the Gurkha *kukri*, *khurpa* or gross-cutter's knife also belong to the spade class, (3) Long edged weapons represented by the curved swords (*talwar*) or the straight sword (*kurich*) and curved edge weapons with a concave edge and projecting point, such as the (*dao kotta*) and the sickle (*haswa*, *darauti* or *ela*). *Lyon's Med. Jur., 1904 P. 119, Lyon's Med. Jur., 1935, P. 175.*
2. Wounds inflicted by axes or axe heads with convex edges on longshafts, are often, especially if well aimed, straight and clean cuts. *Criminal Investigation by Dr. Hans Gross, 1934 P. 418.*
3. Wounds caused by broken glass (which frequently occur in tavern brawls) are arched and somewhat shell shaped, like the broken outline of the glass itself. Straight cuts due to broken glass are rarely observed. *Ibid*, P. 117.
4. Wounds inflicted by sickles and scythes never show a straight line but a broken zig zag line. This is because they are never sharpened like knives. *Ibid*, P. 117.
5. In wounds caused by cutting instruments the form of wound rarely corresponds to the true form of weapon. *Ibid*, P. 118.

H Warding off blows by victim.

1. Injuries are seen on the inner side of the forearms and on the hands. These are received during the victim's attempt to ward off the blows or to grasp the weapon. Such injuries form conclusive proof of homicide. *Lyon's Med. Jur., 1935, P. 177.*
2. A man in attempting to ward off a blow directed at his head throws up his arms above his head and the inner side of forearm is uppermost and injured. *Ibid*, P. 177.

I Indirectly fatal. See Culpable homicide—21—13—19—8—36.

Wounds which cause death indirectly, it is assumed that the deceased survives for a certain period, and that the wound is followed by inflammation, septicæmia, toxæmia, tetanus or some other mortal disease which is a consequence of the injury. Under this head may be also arranged all those cases which prove fatal by reason of surgical operations rendered imperative necessary for the treatment of injuries. A wounded person may have been the subject of subsequent and fatal treatment, and the question will arise to which of the two causes his death was really due. It is to be observed in such cases, that the supervening disease, the poison, or the subsequent ill-treatment, should be of such a nature as to account for sudden or rapid death. *Taylor's Med. Jur., 1925, Vol. I, P. 326.*

Wound—(contd.)

14. Lacerated—.

A lacerated wound is one in which the tissues have been torn apart, not cleanly cut. Such wounds result from assaults with blunt weapons, from falls, machinery and traffic accidents, attacks by animals, etc. They are frequently accompanied by bruising, and there may be much loss of tissue. Lacerated wounds caused by blunt weapons or by falls are invariably situated on regions where unyielding bone closely underlies the surface. *Lyon's Med. Jur., 1935, P. 183.*

15. Negligent or unskilful treatment of— See Culpable homicide—35. Murder—82 Death by negligence—7.

1. No conviction for murder can take place if the medical evidence showed that the injury was not originally mortal, but became so through unskilful or negligent treatment. If death has been caused by a wound, it is immaterial that in more favourable circumstances, and with more skilful treatment, a fatal result might have been averted. *Taylor's Med. Jur., 1928, pp. 99-100.*
2. The true distinction is that if the death is occasioned by grossly erroneous medical treatment, the original author of the violence will not be answerable; but if it arises from the want of merely of that higher degree of skill which is available only in big towns, the perpetrator of the unlawful act will be responsible, because he has wilfully exposed the deceased to a risk from which he has practically no means of escaping... If the wound had not been likely to produce death, but through unskilful treatment, death ensued, that would not be murder. Where owing to obvious mal-treatment of the original wound, an operation became necessary, and resulted fatally, the assailant would probably not be guilty of murder. *Ibid.*

16. No external marks :—Dangerous wound—Surviving—

If the blow has caused rupture of the internal organ, it is almost fatal. Yet the wounded person may live for sometime; for example, with a rupture of the liver, skull, intestine from five to eleven days, with a fracture of the base of the skull, three to twelve days; with a rupture of the intestine, ten hours. When considerable force is exerted, as in the case of a fall from a height, crushing under a heavy weight, etc., serious internal injuries may be caused without slightest external mark. Even when there is no internal rupture, death may follow from shock. *Criminal Investigation by Dr. Hans Gross, 1934 Ed., P. 416.*

17. Of the neck and throat. See Strangulation.

1. *Abrasions.*—Marks left by ligature used in hanging or in strangling are in effect abrasions caused by the destruction of epidermis. Small abrasions are seen in case of throttling; the finger nails sinking into the skin have typical crescent-shaped marks. Strangulation is sometimes accomplished by compressing the throat with some hard substance, e. g., hillet of wood; in such cases abrasions will be formed on the front of the throat. *Lyon's Med. Jur., 1935, P. 204.*
2. *Bruises.*—The pressure of any hard object on the throat will cause bruising. The murderer always uses more force than is necessary for the accomplishment of his purpose, thereby leaving traces of his work. *Ibid., P. 204.*
3. *Incised wounds.*—Incised wounds made with the edge of weapon of the knife or razor type are very common. But those caused with heavy striking weapons are on the back of neck. They are very fatal injuries owing to the close proximity of the spinal cord to the surface. *Ibid., P. 204.*
4. *Stab wounds.*—Stab wounds on throat or neck are not uncommon. Their chief danger is hæmorrhage, following on injury to the blood vessels, and death is due to it. Wounds of the large vessels are not necessarily rapidly fatal. *Ibid., P. 205.*
5. *Lacerations.*—Laceration of the structures of the neck is not uncommon in hanging with a drop, and may be extreme, all tissues of the neck being ruptured. *Ibid., P. 205.*

18. Of the scalp and brain.

1. Wounds of the scalp are always serious, no matter how they are produced, for they are inevitably septic when inflicted. If the division of tissues has penetrated below the dense layer of the skin of the scalp, it is practically impossible to be at all sure of being able to cleanse them. *Taylor's Med. Jur., 1928, P. 422. Lyon's Med. Jur., 1935, P. 190.*

2. If suppuration ensues, these wounds are liable to give rise to fatal complications owing to the ease with which the septic microbes can reach the brain... There is a further reason for considering scalp wounds dangerous in that it is difficult to be sure whether the skull or brain has not at the same time been damaged. *Ibid*, p. 422.
3. Injuries produced by blows from blunt instruments frequently bear a close superficial resemblance to cut wounds. It is advisable, in all scalp wounds, to shave the scalp closely and examine the edges and terminations of the wound with special care and to closely examine the deeper parts of the injuries to see if the tissues are cut or torn, and to observe the presence of foreign bodies, such as fragments of glass, rock, earth, etc. *Ibid*, p. 423.

9. Of the head, vs. alcoholic intoxication.

1. There is nothing in the state of the brain in a dead body which will enable a practitioner to say whether shock or intoxication had existed and had been the cause of the symptoms which ended fatally. *Taylor's Med. Jur.*, 1928, p. 425.
2. The discovery of alcoholic liquid in the stomach or the presence of alcohol in the blood or urine might lead to presumption that the deceased had been drunk, and marks of violence on the skull or in the brain might prove that he had been injured but it does not prove whether alcohol or injury was the primary and sole cause of death. The following are the tests:—(a) The history of the case should be obtained. (b) The smell of the breath should be noted. Drink does not prevent but renders easy injury to the head and again it is almost invariable to find that brandy is poured into the mouth of a man found insensible. (c) The pupils should be noted. If they are dilated, alcohol may be more suspected, if contracted opium poisoning may be the more suspected; if unequal, they rouse a strong suspicion of serious head injury, and if inactive to light the case is serious. (d) Note the temperature. If raised, this suggests head injury and possibly of hæmorrhage into the brain; if lowered, this in itself has not signified danger. (e) Local paralysis as opposed to general helplessness suggests local lesion, and therefore strongly suggests serious injury and not intoxication. (f) The urine should be examined. (g) Note the general condition of the skin flushed and sweating, probably drunk; cold and blue, collapse of a dangerous description; cold and sweating suggests opium poisoning. *Taylor's Med. Jur.*, 1928, 8th Ed., pp. 425 & 426.

0. Of the face.

Wounds of the face are usually followed by great deformity; and when they penetrate the cavities in which the organs of the senses are situated, they often prove fatal either by involving the brain and its membranes or by giving rise to inflammation of this organ. *Taylor's Med. Jur.*, 1928, p. 412.

1. Of the nose.

Wounds of the nose are, generally speaking, of a simple nature, rarely giving rise to serious symptoms. If the injury is a contusion and, at the same time, extensive a loss of the sense of smell will probably result. A penetrating wound of the nose, produced by passing a sharp pointed instrument up the nostrils, may destroy life by perforating the cribriform plate of the ethmoid bone and injure the brain. Such a wound might be produced without leaving any external marks of injury. *Taylor's Med. Jur.*, 1928 p. 442.

2. Of the chest.

Incised wounds of the chest-walls which do not penetrate the cavity are rarely followed by dangerous consequences. The bleeding is not considerable, and is generally arrested without much difficulty. Fracture of the ribs are dangerous for several reasons:—The bones may be splintered and driven inwards, thereby wounding the lung hæmorrhage. Simple fracture of the chest bone without displacement of the bone is rarely attended with danger, unless the concussion has at the same time produced mischief internally. When the bone is depressed as well as fractured the viscera behind may be mortally injured. Wounds penetrating into the cavity of the chest are generally dangerous, even one slight inconsequence of the innumerable accidents with which they are liable to be complicated. *Taylor's Med. Jur.*, 1928, p. 446.

3. Of the lungs.

The immediate cause of danger from wounds of the organs is the consequent hæmorrhage,

Wound—(contd.)

which is profuse in proportion to the size of the wound and the size of the vessels wounded. Should the weapon divide any of the trunks or the main branches of the pulmonary vessels the individual may speedily die. The degree of hæmorrhage cannot be determined by the quantity of blood which escapes from the wound. A wound of the lung is generally known, among other symptoms, by the frothiness and florid colour of the blood which issues from the orifice....There may be no external marks of violence or symptoms indicative of danger for some hours...A young man while riding fell from his horse on his left arm. He complained of no pain for five hours but in 12 hours he bled profusely from the mouth and died in a few days. There were no external marks of the injury to the chest but the right lung was found ruptured throughout its length. A boy aged 14 fell from the height of 20 feet and died within 3 hours. There was no external marks of injury but collar bone was fractured and right lung was ruptured to depth of 4 inches into its substance, from this rupture a large quantity of blood has escaped causing death. *Taylor's Med. Jur., 1928, P. 417.*

Of the heart.

Wounds of the heart are among most fatal of penetrating wounds of the chest. It was frequently considered that all wounds of the heart were necessarily and instantly mortal, a view which must now be considerably modified. The presence of weapon in the wound, by mechanically obstructing the effusion of blood, retards the fatal result. *Taylor's Med. Jur., 1928, P. 418.*

If the right cavities of the heart are more frequently wounded than the left, of these the right ventricle is most commonly the seat of injury. The heart is liable to be ruptured either from disease or accident. In the latter case the organ generally gives way towards the base, and through one of its cavities from the right side. In ruptures from the natural causes it is the left side of the heart, and particularly the left ventricle in which rupture is most frequently found. Symptoms are sudden pain, collapse, cramps, cold extremities, and rapid death. *Ibid, P. 419.*

Rupture of the heart from blows or falls is not always accompanied by marks of external violence, or any fracture or other injury to the exterior of the chest. The natural causes of rupture of the heart are violent mental emotions, such as anger, fright, terror; sudden or excessive muscular efforts or violent physical exertions in constrained positions. The heart like any other muscle, may give way from its own powerful contractions. It is of importance to note that rupture of the heart may prove suddenly and rapidly fatal to life, although the lesion may not involve the cavities. When the heart is in a diseased condition, as in fatty degeneration, slight causes of excitement or exertion are sufficient to produce rupture and sudden death. Walking may thus give rise to fatal consequence. *P. 420.*

When air enters the chest through a wound in a vein death is produced by the heart the resultant mixture causing asphyxia.

Death may take place from shock. A person stabbed to the heart or shot through the heart may still be capable of considerable muscular effort, such for instance as running a hundred yards or more. A person might be quite capable, not perhaps of giving any detailed account of the occurrence, but of calling out that he had been stabbed by a particular individual. *Lyon's Med. Jur., 1935, pp. 206-207.*

The heart may be lacerated by the jagged ends of fractured ribs or by a broken sternum. It may be shattered by severe compression of the chest or by a gunshot discharged at close range. *Ibid, P. 208.*

Spontaneous rupture of the heart is of rare occurrence. *Ibid.*

Of the abdomen.

Concerning the walls of the abdomen.

Incised and punctured wounds which affect the walls of the abdomen without penetrating the cavity, offer no special dangers over and above their proximity to the peritoneum and the dangers of extension of inflammation thereto.

Penetrating wounds are not always fatal. A very large number of gunshot wounds have apparently done no damage to the viscera.

A soldier by accident so fell up on his bayonet that although the weapon traversed

Wound—(contd.)

the whole cavity of the abdomen (entering at the back and coming out in front below the navel), the man recovered in about six weeks. *Taylor's Med. Jur.*, 1928, P. 154.

4. The contusions on the cavity of the abdomen are attended generally with far more serious effects than those on the chest due to covering of the abdomen having less power to resist external shock. Death may be the immediate result of a blow in the upper and central portions and no particular morbid changes may be apparent on inspection. Death may be ascribed to fatal shock. *Ibid*, P. 155.
5. Blows on the abdomen, when they do not destroy life by shock, may cause death by inducing peritonitis, which may extend to other membranes. *Ibid*, P. 156.
6. Blows on the abdomen are not always accompanied by visible bruise or injury to the skin, and indeed, it must be remarked that when such a bruising is found without injury to the skin it may possibly have been produced by violent muscular action, as in trying to escape a blow and not by blow itself. *Ibid*, P. 157.

B. Rupture of the Liver.

1. Ruptures of the liver may occur from falls or blows or by sudden action of the abdomen muscles. *Taylor's Med. Jur.*, 1928, P. 157. An accident of this kind happened to a person who was endeavouring to avoid a fall from his horse. *Ibid*. A fall on the feet from an elevated spot may also produce laceration of the liver. Ruptures of the liver, if fatal, generally cause death within 48 hours. In a case in which the liver was found adhering to the floating ribs, a fatal rupture was caused as a result of violent muscular action. *Ibid*, pp. 157-158.
2. Considerable power of locomotion may remain after receipt of injury. *Lyon's Med. Jur.*, 1937, P. 210.

C. Abrasions.

Abrasions on the abdominal wall are the result of traffic. *Lyon's Med. Jur.*, 1937, P. 208.

D. Bruises.

Bruises on the abdominal wall are uncommon. The severest injury may be sustained by one or more of these organs without the abdominal wall showing any trace of bruising. *Ibid*, P. 208.

E. A stab wound of the abdomen may be considerably deeper when measured at the post-mortem table than when it was at the moment of infliction. The hand clasping the knife pushes the belly wall inward to a distance of two or more inches. *Ibid*, P. 209.F. A blow over the abdomen may kill almost immediately or after a short interval, without causing any visible injury. In these cases death is due to syncope from reflex paralysis of the heart. *Ibid*, P. 209.

26 Of bladder.

Rupture of the bladder is frequently the result of blows on the lower part of the abdomen. The usual period at which the death occurs from this accident is from three to seven days. The cause of death is usually peritonitis but a person may die suddenly from this injury as a result of shock. When ruptures are produced by blows they are rarely accompanied by marks of ecchymosis, or of injury to the skin. A rupture is almost always the result of violence. (a) When the bladder is ruptured from disease; (b) When the bladder is ulcerated, (c) When there is an obstruction in the urethra from stricture. (d) From some undressable cause. Owing to the short and simple nature of the female urethra, the rupture of the female bladder by violence in the ordinary way is very rare. *Taylor's Med. Jur.*, 1928, pp. 463-465.

27. Of the stomach.

Wounds and ruptures of the stomach may cause death by shock. Rupture commonly gives rise to severe pain, sufficient in itself to bring about speedy death. A stomach may be ruptured from spontaneous causes, as in ulceration from disease. Penetrating wounds of the stomach generally prove rapidly mortal. *Taylor's Med. Jur.*, 1928, P. 463.

Wound—(contd.)

28. Of the genital organs—(male organ—vulva)—.

1. Wounds of the genital organs, whether in the male or female, may prove fatal to life by excessive hæmorrhage. The practice of circumcision on infants is sometimes followed by fatal results. Owing to the proximity of the pubic bones, blunt violence may produce an apparently incised wound. *Ibid*, P. 466. When deeply incised wounds are inflicted upon the genital organs of either sex, the fact of their existence in such a situation is strongly presumptive of wilful and deliberate malice on the part of an assailant, or deliberate suicide. Kicks or blows on the vulva, if they destroy life at all cause death by copious effusion of blood. Violence to this part after death would not produce such an effusion as would account for death. *Taylor's Med. Jur.*, 1928, pp. 466-467.
2. Severe contusion on the male organ may cause death. Severe compression of the testicles may prove fatal from shock. *Lyon's Med. Jur.*, 1935, P. 217.
3. Incised or contused wounds on the female genitals may prove fatal by loss of blood. *Ibid*, P. 217.
4. A kick on the vulva—like a blow on the head—may cause an apparently incised wound and prove fatal from hæmorrhage. *Ibid*, P. 217.
5. Wounds of the female genitals are sometimes the result of an accidental fall on some projecting sharp or pointed object. In India cases of injury by thrusting a stick into the vagina are not uncommon. *Ibid*, P. 218.

30. Position of assailant. See—4.

31. Punctured.

1. A punctured wound is one in which the depth is greater in proportion to the length. *Taylor's Med. Jur.*, 1928, Vol. I, P. 318.
2. Punctured wounds may be caused accidentally by projecting nails, fragments of crockery, etc. If the edges of the puncture are free from laceration or contusion, the indication is that a sharp-pointed weapon has been employed. The obliquity or directness of the thrust, and also the state of tension or relaxation of the skin, may affect the shape of the puncture, and hence two punctures from the same weapon may differ in shape. Very often, owing to the elasticity of the skin, punctured wound is of less diameter than the weapon which has been used. The existence of several punctured wounds of course very strongly indicates the employment of a weapon and if all are similar in size and shape the probabilities are in favour of their being due to repeated thrusts with the same weapon. Weapons commonly used are daggers, spears, arrows, sickle, pickaxe, hoe, fork, etc. *Lyon's Med. Jur.*, 1904, pp. 123-124, *Lyon's Med. Jur.*, 1935, pp. 180-181.
3. If it be asserted that a punctured wound was produced by a fall on some sharp body such as glass, pot, sharp stone, etc., it is almost impossible for the wound to be of great depth without a part at least of the material being found broken off in the wound. *Taylor's Med. Jur.*, 1928, Vol. I, P. 355.

32. Rupture of intestine.

Rupture of intestine is usually fatal, the cause of death being peritonitis. Rupture may occur solely from disease or from violence. Rupture even of a healthy portion of intestine may occur from a comparatively slight amount of violence. *Ibid*. Accidental cases are due to traffic accidents, kicks from horses, falls, etc. In cases of assault a blunt weapon or a blow with the fist or a kick may have been employed. *Lyon's Med. Jur.*, 1935, P. 215.

34. Ruptures of the spleen. See Spleen—4.

35. Scars.

A. Time required for the formation of scars.

It varies according to the nature, size, cleanliness, etc., of the wound (a) In clean incised wounds, the edges are firmly united in about five or six days, and a definite reddish scar is formed in something like a fortnight. (b) In wounds which are suppurated (septic) the time is from a week to two or three months, according to the size

Wound—(contd.)

of the wound and treatment applied. (c) In small wounds on fingers etc., a scab forms in about thirty-six to forty-eight hours, and if on removal of this some granulation tissue be found or attempts at scarring, it may safely be said that the wound was inflicted at least four or five days previously. (d) In larger ragged wounds involving many structures no appreciable amount of granulation tissue will be formed under a week, and no real scar for at least two or three weeks. (e) The age and health of the wounded person have material influence even on these averages. *Taylor's Med. Jur., 1928, P. 131. Lyon's Med. Jur., 1935, pp. 101-103.*

B. Age of scar.

A scar consists of fibrous tissues and blood capillaries, and the contraction of former tends to obliterate many of the latter. When first formed a cicatrix looks red or bluish and angry, and is tender. As its age increases it becomes smaller, whiter, thicker, more shining and less sensitive. In about two months or so a scar acquires those permanent characters by which its individuality will be known during the life of its bearer. Some scars get red, shiny and angry looking after 35 years, when local irritation is applied. When once a scar has become firm and white there are no data of a medical nature which will enable us to say when the wound producing it was inflicted, whether two, ten or twenty years before. *Ibid.*

C. Relationships of shape and size of the scar and the wound.

There is a broad general likeness between a wound and its scar. A straight simple incised wound will have a straight linear cicatrix as a rule. If the incision was of some length so that the skin gaped, or if the wound suppurated, the cicatrix will probably be wider and thicker in the middle than at the ends. Wounds of irregular shape and contused wounds commonly leave irregular scars. If there has been definite loss of substance in a wound from sloughing, the scar will be in some measure proportionately thick. Burns and scalds are generally large and very irregular, often showing keloid patches or lines. Surgical operations. These are commonly indicated by their regular form and situation, the marks of stitches which held them in position can also be usually made out. Tubercular and syphilitic scars are generally much depressed, irregular and thick in parts. Ulcer is for medico-legal purposes, an unhealed wound, though the word is used in surgery rather to express the result of disease than those of an aseptic wound. Vaccination and small-pox scars have an irregular honey combed appearance with white streaks, and are slightly depressed below the level of the surrounding skin. Punctured wounds—stabs, bullets, etc., generally leave puckered cicatrices, from which it is generally impossible to give evidence as to the nature of weapon inflicting them. It may be asserted that they are usually smaller than the weapon. Scars in children—The large scars on chests or limbs grow in size with the growth of child, so that approximately the same proportion of circumference is still involved when the child becomes an adult. *Taylor's Med. Jur., 1928, pp. 135-136; Lyon's Med. Jur., 1935, P. 103.*

D. Removal or alteration of scar by time.

No scar can be removed by cutting or excision without leaving another behind. It is quite possible that a criminal or designing person may get rid of an inconvenient scar by substituting another one for it. Scars of wounds involving a definite loss of tissue are permanent and indelible and last through life, with but little change, but scars of small wounds become indistinct. If no marks of cutting can be perceived within a few months of the period at which a severe wound is alleged to have been inflicted, it is reasonable to infer that there has been some mistake, or that the circumstances have been greatly exaggerated. *Taylor's Med. Jur., 1928 pp. 136-137.*

36. Scratches.

Scratches are very important, especially when they arise from resistance of the victim to an attack. Nails of scratcher must be examined to see if there is any relation between the nails and the scratches observed. The dirt under the nails often affords strong evidence and should be examined by a specialist. *Criminal Investigation by Dr. Haus Gross, 1934, Ed., P. 422.*

36. Scratches.

Nails of scratcher must be examined to see if there is any relation between the nails and the scratches observed. The dust under the nails often affords strong evidence and should be examined by a specialist. *Criminal Investigation by Dr. Hans Gross. 1934, Ed., P. 422.*

37. Self inflicted—.

A. Bruises or contusions.

As regards bruises inflicted by another with a view to substantiating a false story, it may be impossible to distinguish these from genuine injuries... These contusions are the result of the use of stick, and their usual position is on the back. They are practically always single, and are such as would not require the use of much force for their production. Their direction may be quite irreconcilable with the complainant's version of their infliction. *Lyon's Med. Jur., 1935, P. 239.*

B. Gunshot.

1. The most convenient site for a self-inflicted gunshot wound is the temple of the same side as the hand used in shooting. Less commonly the heart region is selected. If the weapon is a long one, such as gun or rifle, the muzzle may be placed in the mouth or under the chin. Wounds situated elsewhere, if accident can be excluded, are homicidal... In cases of accidental discharge of the firearm, the wound will be for the front of the body, and will often be from below upwards... Blackening of the hand with unconsumed powder is a proof of suicide or of accident. *Lyon's Med. Jur., 1935, P. 234.*
2. Self-inflicted gunshot wounds will be found to involve non-vital parts, except in cases of attempted suicide. They will be near wounds. The skin will be more or less lacerated and bruised. There will be much ecchymosis and the hand holding the weapon, as well as the dress and the wounded skin may be blackened or burnt by the exploded gun powder. *Taylor's Med. Jur., 1928 P. 544.*

C. Incised.

1. In the case of incised wounds if these are slight or if severe they tail off at one end into a superficial scratch, and are in the accessible position on the left side in the case of light handed man, the presumption is in favour of self infliction. In suicidal cases, in about four-fifths of the cases the head is chosen for injury. *Lyon's Med. Jur., 1904 pp. 155-157, Lyon's Med. Jur., 1935, P. 238.*
2. Where several incised wounds are accompanied by cuts on the hands of the injured individual, and in female subjects, in cases of wounds of the genitalia or castration or mutilating wounds of the nose, ears, or breast, the presumption is in favour of infliction by another person. *Ibid.*
3. Self-inflicted incised wounds, as a rule (a) end on the same side as the hand employed, and (b) begin from below if on the lower part, or from above if on the upper part of the body. *Ibid.*
4. Self-inflicted incised wounds of the throat, as a rule possess the first of these characteristics, but may or may not possess the second, i. e., they may be transverse, or run from above down or from below up. *Ibid.*
5. Self-inflicted several incised wounds all slight are sometimes self-inflicted, with the object of averting suspicion. *Ibid.*
6. Want of correspondence in situation between cuts on the clothes and wounds on the body is often found when the wounds have been self-inflicted for the purpose of supporting a false charge or averting suspicion. *Lyon's Med. Jur., 1901 P. 160.*
7. When the weapon used is found tightly grasped in the hand of the dead body, it indicates self infliction. A weapon, however, found loosely lying in the hand of dead body, may have been placed there, with the view of fabricating evidence in favour of suicide. *Ibid.*
8. Imputed wounds except in cases of attempted suicide are (a) of superficial character, (b) are in front of the person and may be on the right or left side according to whether person is right or left handed, (c) they are generally numerous and sometimes they have had a complete parallelism, unlike those caused by adversary, (d) the hands are seldom wounded, (e) the injuries are not usually situated over those parts of the body in which wounds are by common repute considered mortal, (f) the cuts on the dress are not reconcilable with the articles of dress having been worn when they were produced, (g) there is in general an entire want of correspondence between the situation of the wounds on the person and cuts or other marks on the dress. *Taylor's Med. Jur., 1928 P. 471, Vol. I.*

Wound—(contd.)

9. No hard and fast rules can be laid down for the detection of self-inflicted wounds. Each case must be decided by the facts which accompany it. However the following facts must be ascertained. (a) The relative positions of the assailant and the assailed person at the time of the alleged attack. (b) The situation, direction and depth of the wound or wounds. (c) The situation or direction of marks of blood or wounds on the person or dress of either, or of both the assailant and assailed. (d) The marks of blood and the quantity effused at the spot where the struggle is alleged to have taken place. *Taylor's Med. Jur., 1928, Vol. I, P. 475.*
 10. Imputed wounds are generally cuts or stabs. They are seldom of the contused kind. Some cases in which females labouring under hysterical attacks, have inflicted upon themselves, severe contusions and have charged innocent persons with attempt to murder are on record. *Taylor's Med. Jur., 1928, P. 476, Vol. I.*
 11. The question whether a wound is self-inflicted may be answered by, (1) the nature or appearance of the wound, (2) the position of the wound, (3) the direction of the wound, (4) the number of wounds or injuries, (5) the position and surroundings of the injured individual. *Lyon's Med. Jur., 1935, P. 227.*
 12. Blood stains on the back of the hand, thumb and first finger, point to self destruction. A cut in the clothing corresponding in position to that on the body is almost proof of murder. *Ibid., P. 232.*
 13. A fabricator will be careful to avoid doing himself any serious harm; he will not wound those regions of the body that he considers are dangerous. *Ibid., P. 238.*
 14. Wounds on the face or genital organs are never the work of the fabricator. *Ibid., P. 238.*
 15. In case of suspected fabrication of wound, clothing must be examined. The individual will always bare a part before wounding it, in order to see what he is about. He may then forget to make cuts in the clothing. *Ibid., P. 238.*
- D. *Inflicted with consent.*

In India severe, even fatal, injuries are sometimes inflicted on an individual with his consent, for the purpose of supporting a false charge against some other person. *Lyon's Med. Jur., 1935, P. 220, P. 138. Lyon's Med. Jur. 1904, P. 153.*

E. *Punctured.*

Punctured wounds except of very slight depth are not self-inflicted. *Lyon's Med. Jur., 1935, P. 238.*

38. Shock—Death from.

Shock is sometimes direct cause of death, under the infliction of external violence, and in this case life is destroyed without the injury being sufficient to account for a result so speedily fatal...A person may have received many injuries, as by blow; in medical language be turned mort; violence either on the spot or very of shock, like, fainting from fright or from some unpleasant sight or smell. *Taylor's Med. Jur., 1928, Vol. I, pp 330—332.*

39 Whether caused before or after death ?

1. If a wound has been observed :—(a) signs will be signs of inflammation. (d)
2. Contusions inflicted during life, if severe, are generally, but not variably, followed by ecchymosis. If the individual has lived for sometime, say more than twenty-four hours after receiving the injury, changes in colour will probably be found at the circumference of ecchymosed patch, from purple to black, violet green to yellow. Thus the purplish black becomes by third day violet, by the fifth day green and by eighth to tenth day yellow and the injured part will probably be found swollen...An injury inflicted after death, while the blood is still fluid, may be followed by effusion of blood. Blood effused from a wound made more than ten minutes after death rarely coagulates...Much hæmorrhage also indicates ante mortem infliction. *Lyon's Med. Jur., 1904, pp. 128-129.*

Wound—(contd.)

3. When a wound is inflamed, in a state of suppuration or cicatrization, it must have been produced before death. If it is inflicted, in the last moments of life, its edges are more or less retracted and tumid, it is covered with a clot of blood. When a wound is made some hours after death its lips are retracted as if inflicted during life, but they are pale, not tumefied, without any trace of blood. *Ryan's Med. Jur.*, 1836, P. 340.
4. *Ante mortem* injuries are distinguished from *post-mortem* injuries by the presence of signs indicative of vital reaction. These are:—(a) *Bruising*. Contusions may appear even if an individual has lived only a short time after receipt of the injury; and bruising from blows inflicted during life may not become apparent until after death has taken place. If the individual lived more than twenty-four hours after the injury, changes in colour will be found at the circumference of the ecchymosed patch. (b) *Effusion of blood*. In a dead body the blood remains fluid for some time after death, rarely beginning to coagulate until four hours, and sometimes not until twelve hours, after death. Hence an injury inflicted after death, while the blood is still fluid, may be followed by effusion of blood. Blood effused from a wound made after death rarely coagulates. Marks of arterial spouting indicate infliction while the heart is beating. Much hæmorrhage also indicates *ante-mortem* infliction. *Post-mortem* infliction is indicated if the effused blood is found fluid. (c) *Reaction and eversion* of the edges of wound follow the infliction of an incised wound made during life or shortly after death. Hence in *incised wounds*, indication of infliction during life or shortly after death, are: (1) retraction and eversion of the edges of the wound; (2) hæmorrhage into the wound and into the cellular tissue around it, and (3) presence of coagula. (d) One of the most reliable signs of *ante-mortem* infliction, is the *staining of the wound* by blood that has been forced into tissue interspaces by the active bleeding of life. This blood clots in position, and the stains produced by it cannot be removed even by washing the wound, while any blood stains due to *post-mortem* bleeding are easily removed with a damp rag, leaving the tissues unstained. *Lyon's Med. Jur.*, 1935, pp. 186-187-188.

40. Whether dangerous to life?

1. The danger primarily depends on (a) the amount of hæmorrhage, (b) the organ wounded whether liver, brain, heart, lungs, etc. (c) shock; and *secondarily* on the chance of (d) secondary hæmorrhage following sepsis (e) specific infection, e.g., tetanus, gas gangrene; or *more remotely* (f) the effects of scarring....As a general principle, the Court is likely to consider as dangerous to life in a legal sense only those wounds in which the danger is imminent and not remote. *Taylor's Med.
